Benchmark 1	2.21	—	—	—	—	—	—	—	—	—
Benchmark 2	9.55	—	—	—	—	—	—	—	—	—

Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expense or sales charges. Returns for periods of less than one year are not annualized. For current month-end performance, please visit franklintempleton.com.

Net Asset Value (NAV) returns are based on the NAV of the ETF; Market Price returns are based upon the official closing price of the ETF's shares. Returns are average annualized total returns, except for those periods of less than one year, which are cumulative. Market Price returns are calculated using the closing price as of 4 p.m. Eastern time on each trading day (when NAV is normally determined for most funds), and do not represent the returns you would receive if you traded shares at other times. Performance for the ETF and its benchmark index are as of the ETF's last trading day before the end of the period. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading December 16, 2022, the NAV of the Fund is used as a proxy for the Market Price to calculate market returns.

The total annual operating expenses are as of the fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.

Growth of \$10,000

Inception through September 30, 2024

Market Price Returns, assuming dividends reinvested

With a legacy dating back over 60 years, ClearBridge Investments is a leading global equity manager committed to delivering differentiated long-term results through authentic active management.

What should I know before investing?

All investments involve risks, including possible loss of principal. The fund is newly organized, with a limited history of operations. **Equity securities** are subject to price fluctuation and possible loss of principal. Companies in the **infrastructure** industry may be subject to a variety of factors, including high interest costs, high degrees of leverage, effects of economic slowdowns, increased competition, and impact resulting from government and regulatory policies and practices. **International investments** are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in **emerging markets**. The managers' **environmental, social and governance (ESG) strategies** may limit the types and number of investments available and, as a result, may forgo favorable market opportunities or underperform strategies that are not subject to such criteria. There is no guarantee that the strategy's ESG directives will be successful or will result in better performance. **Real estate investment trusts (REITs)** are closely linked to the performance of the real estate markets. REITs are subject to illiquidity, credit and interest rate risks, and risks associated with small- and mid-cap investments. Investments in energy-related **master limited partnerships (MLPs) and midstream entities** are subject to risks of declines in energy and commodity prices, decreases in energy demand, adverse weather conditions, natural or other disasters, changes in government regulation, and changes in tax laws. These and other risks are discussed in the fund's prospectus.

Important Information

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.

ETF shares may be bought or sold throughout the day at their market price, not their Net Asset Value (NAV), on the exchange on which they are listed. Shares of ETFs are tradable on secondary markets and may trade either at a premium or a discount to their NAV on the secondary market.

Canada: This content is intended only for Canadian institutional investors that qualify as "permitted clients" as defined in National Instrument 31-103 - Registration Requirements, Exemptions and Ongoing Registrant Obligations. U.S. securities laws generally limit a non-U.S. fund's purchase of a U.S. registered mutual fund or ETF (a "U.S. Fund") to no more than 3% of the U.S. Fund's voting stock. You should consult your legal counsel prior to investing in a U.S. Fund.

The **FTSE Global Core Infrastructure 50/50** includes developed and emerging market infrastructure and infrastructure-related listed securities allocated to 50% utilities, 30% transportation, including capping of 7.5% for railroads/railways, and a 20% mix of other sectors including pipelines, satellites and telecommunication towers. Source: FTSE. The **OECD G7 CPI + 5.5%** (Organisation for Economic Cooperation and Development G7 Consumer Price Index + 5.5%) is calculated by combining the measure of inflation across the G7 countries (Canada, France, Germany, Italy, Japan, the U.K. and the U.S.) plus 5.5%.
