# Franklin Disruptive Commerce ETF

This annual report for Franklin Disruptive Commerce ETF covers the fiscal year ended March 31, 2024.

#### **Fund Overview**

#### Q. What is the Fund's investment strategy?

**A.** The Fund seeks capital appreciation. Under normal market conditions, the Fund invests at least 80% of its net assets in equity securities of companies that are relevant to the Fund's investment theme of disruptive commerce. The Fund invests predominantly in common stock.

# Q. What were the overall market conditions during the Fund's reporting period?

A. For the year ended March 31, 2024, U.S. and global stock markets experienced a variety of conditions on their way to solid gains that were in the 24% to 30% range, based on broad equity indexes (in U.S. dollar terms). U.S. equities were at the high end of that range and generally outperformed their non-U.S. counterparts. The year started with concerns over the banking system, corporate profitability and multi-year high interest rates. Economic activity remained robust enough for most of the world to avoid recession despite higher borrowing costs as elevated inflation gradually subsided, and major central banks continued to hike policy rates.

As the year progressed, equity markets began to fare better than anticipated, supported by enthusiasm around artificial intelligence (AI), plenty of cash on the sidelines, and resilient (though uneven) economic growth, particularly in the U.S. However, risks were still evident with potential tipping points linked to increased pressure on corporate profits, households eating through excess savings, expanding geopolitical tensions, and sluggish economic activity in key economies such as China, Europe and Japan. By March 2024, global equities had risen for a fifth consecutive month amid reduced volatility, aided in part by several central banks signaling interest-rate cuts were likely to occur later this year. In particular, the U.S. Federal Reserve (Fed) shifted its monetary policy, moving from a tightening stance early in the period to a more neutral one in July, when it said that the post-pandemic tightening cycle was finished.

# Q. How did we respond to these changing market conditions?

**A.** We are not focused on short-term market fluctuations but rather emphasize picking the best stocks based on fundamentals.

# Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +34.42% based on market price and +34.26% based on net asset value (NAV). In comparison, the Russell 3000® Index, which measures the performance of the largest 3,000 U.S. companies representing the majority of the U.S. market's total capitalization, posted a +29.29% cumulative total return for the same period. You can find more of the Fund's performance data in the Performance Summary beginning on page 5.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

### **Portfolio Composition**

3/31/24

	% of Total Net Assets
Broadline Retail	21.6%
Hotels, Restaurants & Leisure	14.2%
Ground Transportation	10.1%
Trading Companies & Distributors	9.9%
Financial Services	9.8%
Software	7.0%
IT Services	6.5%
Consumer Staples Distribution & Retail	5.2%
Commercial Services & Supplies	3.9%
Entertainment	3.2%
Interactive Media & Services	2.9%
Other	5.0%
Other Net Assets	0.7%

The index is unmanaged and includes reinvestment of any income or distributions. It does not reflect any fees, expenses or sales charges. One cannot invest directly in an index, and an index is not representative of the Fund's portfolio.

Important data provider notices and terms available at www.franklintempletondatasources.com.

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Schedule of Investments (SOI). The SOI begins on page 113.

### **Top 10 Holdings**

3/31/24

Company Sector/Industry	% of Total Net Assets
Amazon.com, Inc. Broadline Retail	10.1%
Uber Technologies, Inc. Passenger Ground Transportation	7.5%
Shopify, Inc. Internet Services & Infrastructure	6.5%
DoorDash, Inc. Restaurants	5.8%
WW Grainger, Inc. Trading Companies & Distributors	5.3%
Costco Wholesale Corp. Consumer Staples Merchandise Retail	5.2%
Fastenal Co. Trading Companies & Distributors	4.6%
MercadoLibre, Inc. Broadline Retail	3.9%
Copart, Inc. Diversified Support Services	3.9%
Booking Holdings, Inc. Hotels, Resorts & Cruise Lines	3.8%

#### Q. What were the leading contributors to performance?

A. Three of the Fund's four primary sector allocations were also its strongest contributors to absolute returns: industrials, consumer discretionary and information technology (IT). Industrials holdings had the highest overall returns for the year, led by innovative ground transportation and logistics companies such as Uber Technologies and XPO. Trading companies and distributors such as W.W. Grainger and Fastenal further boosted our results in industrials, as did Copart in the commercial services and supplies industry. Some of these key contributors more than doubled in value during the year under review.

The Fund's core consumer discretionary holdings had mixed but overall positive returns that were aided foremost by hotels, restaurants and leisure-related names such as DoorDash and Booking Holdings. Amid a wide disparity of returns in the broadline retail industry, our positions in e-commerce conglomerates such as Amazon.com, Latin America-focused MercadoLibre, and China-based PDD Holdings (known for its Pinduoduo and Temu online marketplaces) had the largest positive impact. Commerce-oriented IT companies like Shopify (merchant services tech) and software firms like Manhattan Associates (cloud-based supply chain solutions) were also important contributors.

Elsewhere in the portfolio, the consumer staples sector was not a major fund focus, but our two related holdings enjoyed exceptional one-year rallies, including standout contributor Costco Wholesale. To a lesser extent, our even smaller exposures to materials and real estate companies also fared well in aggregate as all related holdings traded higher. Mixed results in the communication services sector were aided by gains for three out of six positions, with Meta Platforms (purchased during the period) providing the biggest boost to absolute returns. And while our financials sector holdings were down for the year, their overall losses were mitigated by solid returns for fintech and credit card giants Mastercard and Visa.

#### Q. What were the leading detractors from performance?

A. Financials and communication services stocks were net detractors, though their negative impact was minor given the magnitude of the Fund's overall gain for the year; when combined, they reduced the portfolio's absolute return by less than one percentage point. Seven out of 10 financials sector holdings hindered results, none more so than Adyen and Flywire (bought and sold during the period). In communication services, entertainment industry stocks—including Sea Limited (sold by period-end) and Roblox—were generally weak, though key contributor Netflix provided a measure of relief with its robust countervailing rally. In the interactive media and services space, Shutterstock and Tencent Holdings were the worst of three net detractors.

The rest of the key detractors served to reduce our overall gains in other sectors, and they were centered on e-commerce names such as Etsy, Alibaba Group Holding and JD.com. Specialty retailers also fared poorly as all four related holdings traded lower; the group featured large losses for pet-focused companies Chewy and Petco Health & Wellness ahead of their eventual liquidation, thereby denting overall results in the consumer discretionary sector.

# Q. Were there any significant changes to the Fund during the reporting period?

**A.** The Fund's exposure to ground transportation stocks nearly doubled this year, thereby lifting our overall exposure to the industrials sector. Other areas of increased exposure included hotels, restaurants and leisure; IT services; and consumer staples.

Conversely, we substantially reduced investments in the financial services industry and the real estate sector, and we eliminated exposure to the air freight and logistics industry with the complete sale of United Parcel Service. We also moved away from specialty retailers by exiting three out of four related holdings, resulting in a tiny, sub-1% exposure to

this industry by March-end. And though none of the Fund's real estate holdings were sold entirely, they were trimmed substantially following a period of gains. Aside from our active equity investments, we also put more cash to work and substantially reduced the portfolio's overall cash position in the process.

Thank you for your participation in Franklin Disruptive Commerce ETF. We look forward to serving your future investment needs.

Matthew J. Moberg, CPA Portfolio Manager

The foregoing information reflects our analysis, opinions and portfolio holdings as of March 31, 2024, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

# Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance table and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (2/27/20), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

# Performance as of 3/31/24<sup>1</sup>

	Cumulative Total Return <sup>2</sup>		Average Annual Total Return <sup>2</sup>	
	Based on NAV <sup>3</sup>	Based on market price <sup>4</sup>	Based on NAV <sup>3</sup>	Based on market price <sup>4</sup>
1-Year	+34.26%	+34.42%	+34.26%	+34.42%
3-Year	-33.88%	-33.96%	-12.88%	-12.92%
Since Inception (2/25/20)	+30.14%	+30.18%	+6.64%	+6.65%

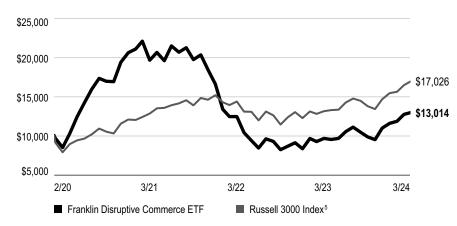

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to **franklintempleton.com** or call **(800) 342-5236.** 

See page 7 for Performance Summary footnotes.

# Total Return Index Comparison for a Hypothetical \$10,000 Investment

Total return represents the change in value of an investment over the periods shown. It includes any applicable maximum sales charge, Fund expenses, account fees and reinvested distributions. The unmanaged index includes reinvestment of any income or distributions. It differs from the Fund in composition and does not pay management fees or expenses. One cannot invest directly in an index.

#### 2/25/20-3/31/24

### Total Annual Operating Expenses<sup>6</sup>

^		^	n/
U	. ວ	U	7/0

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Equity securities are subject to price fluctuation and possible loss of principal. The Fund's investment strategies incorporate the identification of thematic investment opportunities, and its performance may be negatively impacted if the investment manager does not correctly identify such opportunities or if the theme develops in an unexpected manner. By focusing its investments in consumer discretionary-related industries, the Fund carries much greater risks of adverse developments and price movements in such industries than a Fund that invests in a wider variety of industries. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. The portfolio is non-diversified and may invest in a relatively small number of issuers, which may negatively impact the Fund's performance and result in greater fluctuation in the value of the Fund's shares. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Source: FactSet. The Russell®Index is market capitalization weighted and measures the performance of the largest 3,000 U.S. companies representing the majority of the U.S. market's total capitalization.
- 6. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

# **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

# Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		ctual after expenses)	Hypothetical (5% annual return before expenses)		
Beginning	Ending	Expenses Paid During	Ending	Expenses Paid During	
Account Value 10/1/23	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Net Annualized Expense Ratio
\$1,000.00	\$1,316.30	\$2.90	\$1,022.50	\$2.53	0.50%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin Dynamic Municipal Bond ETF

This annual report for Franklin Dynamic Municipal Bond ETF covers the fiscal year ended March 31, 2024. Effective 3/1/24, the Fund replaced its stated maturity guideline with a new duration guideline.

### **Fund Overview**

#### Q. What is the Fund's Investment Strategy?

**A.** The Fund seeks to provide a high level of current income that is exempt from federal income taxes. Under normal market conditions, the Fund invests at least 80% of its net assets in municipal securities whose interest is free from federal income taxes, including the federal alternative minimum tax. Although the Fund tries to invest all of its assets in tax-free securities, it is possible that up to 20% of the Fund's net assets may be in securities that pay interest that may be subject to the federal alternative minimum tax and, although not anticipated, in securities that pay interest subject to other federal or state income taxes.

Although the Fund does not have restrictions on the maturity of the securities it may buy, the Fund seeks to maintain a dollar-weighted average portfolio maturity of three to 10 years.

# Q. What were the overall market conditions during the Fund's reporting period?

A. The 12 months ended March 31, 2024, saw the U.S. Federal Reserve (Fed) turn more cautious in its monetary policy tightening campaign, in an effort to get inflation under control without tipping the economy into recession. The Fed delivered three 25-basis point hikes during the period, the last of which occurred in July 2023 and took the Fed funds target rate to a range of 5.25%-5.50%, a more than 20-year high. Since then, policymakers have maintained a restrictive stance, as the annual headline Consumer Price Index (CPI) declined from 6.0% for February 2023 to 3.2% in February 2024. At its most recent meeting (in March), the Fed still left the policy rate unchanged, and maintained its outlook for three rate cuts in 2024. Additionally, the Fed released updated economic projections, which indicated that policymakers expected the U.S. economy to grow by 2.1% this year, while inflation would continue to ease but still finish the year above its 2% target. Meanwhile, the U.S. economy remained robust, with real gross domestic product increasing at an annualized rate of 3.4% in the fourth quarter of 2023, underpinned by strong consumer spending.

The municipal (muni) bond market recorded positive total returns over the period under review, helped by a late-year rally in 2023 which was fueled by increased investor optimism that monetary policy tightening had come to an end. For most of the last 12 months, high levels of uncertainty kept fund flows into muni bond retail vehicles negative, though they did turn positive so far in 2024. Moreover, anecdotal feedback suggested that many asset allocators were retaining large cash and cash-equivalent balances, waiting to re-allocate funds to the sector.

# Q. How did we respond to these changing market conditions?

A. The past 12 months witnessed high levels of uncertainty. However, market volatility was largely interest-rate driven. Credit fundamentals have remained stable, with robust balance sheets that were supported by significant "rainy-day" funds which, in turn, were bolstered by federal COVID-19 aid, increased during the post-pandemic recovery, and maintained with conservative budgeting and fiscal discipline. Considering our view of the fundamental strength in the muni market, the Fund is consequently tilted toward lower-rated issuers and bonds with no external credit rating. Over the period, we looked for opportunities that had the potential to improve the overall yield of the portfolio and used our rigorous bottom-up research process to help us identify credits that represented good relative value, in our view.

#### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +6.66% based on market price and +6.37% based on net asset value (NAV). In comparison, the Bloomberg Municipal 1-15 Year Index, which is a subset of the Bloomberg Municipal Bond Index (a market value-weighted index of tax-exempt, investment-grade municipal bonds with maturities of one year or more) posted a +2.62% cumulative total return for the same period. You can find

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Schedule of Investments (SOI). The SOI begins on page 116.

<sup>1.</sup> Dividends are generally subject to state and local taxes, if any. For investors subject to alternative minimum tax, a small portion of Fund dividends may be taxable. Distributions of capital gains are generally taxable. To avoid imposition of 28% backup withholding on all Fund distributions and redemption proceeds, U.S. investors must be properly certified on Form W-9 and non-U.S. investors on Form W-8BEN.

<sup>2.</sup> Source: Morningstar. Treasuries, if held to maturity, offer a fixed rate of return and a fixed principal value; their interest payments and principal are guaranteed.

more of the Fund's performance data in the Performance Summary beginning on page 11.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Lease	1.36%
Utilities	1.19%
Other	1.07%
Utility	0.33%
Refunded	0.12%

#### Q. What were the leading contributors to performance?

**A.** The Fund's overall credit quality positioning and security selection boosted relative performance over the period. Particularly an overweight allocation to bonds with no external credit rating, as well as overweights to BBB and A rated issuers added to annual returns. Also, security selection within A and BBB rated bonds lifted relative results.

#### Q. What were the leading detractors from performance?

**A.** The Fund recorded robust positive performance over the period. However, while yield curve positioning overall supported relative returns, overweight exposure to muni bonds with five years to maturity was a drag on results.

# Q. Were there any significant changes to the Fund during the reporting period?

A. There were no significant changes to the Fund's overall

CFA® is a trademark owned by CFA Institute.

strategy. While the Fund did amend its duration guidelines, its effective duration did not change materially. However, as we gained more clarity around the Fed's monetary tightening path and became more comfortable that muni fundamentals were generally robust in the face of tighter financing conditions and slowing economic activity, the Fund increased its underweight to investment-grade rated issuers and added to its holdings of bonds with no external credit rating. The Franklin Templeton Fixed Income research team conducts an in-depth analysis of potential investment opportunities and is therefore able to find what they deem to be attractively priced securities from muni issuers with solid underlying credit fundamentals that could weather a period of below-trend growth.

Thank you for your participation in Franklin Dynamic Municipal Bond ETF. We look forward to serving your future investment needs.

#### Total Annual Operating Expenses<sup>10</sup>

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. Low-rated, high-yield bonds are subject to greater price volatility, illiquidity and possibility of default. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. Unrated debt securities have less public information and independent credit analysis and they may be subject to a greater risk of illiquidity, price changes or default. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Effective December 1, 2022, the Fund adopted a unified fee structure whereby Management has agreed to reimburse the Fund's acquired fund fees and expenses (if any) and pay all of the ordinary operating expenses of the Fund, excluding: (i) payments under the Fund's Rule 12b-1 plan (if any); (ii) brokerage expenses (including any costs incidental to transactions in portfolio securities or instruments); (iii) taxes; (iv) interest (including borrowing costs and dividend expenses on securities sold short and overdraft charges); (v) litigation expenses (including litigation to which the Trust or a Fund may be a party and indemnification of the Trustees and officers with respect thereto); and (vi) their non-routine or extraordinary expenses.
- 3. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 4. Assumes reinvestment of distributions based on net asset value.
- 5. Assumes reinvestment of distributions based on market price.
- 6. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and includes a prorated special distribution in the month it is paid. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of fund performance.
- 7. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.
- 8. Taxable equivalent yield assumes the 2024 maximum federal income tax rate of 37.00% plus 3.80% Medicare tax.
- 9. Source: FactSet. Bloomberg Municipal 1-15 Year Index is a subset of the Bloomberg Municipal Bond Index, which is a market value-weighted index of tax-exempt, investment-grade municipal bonds with maturities of one year or more.
- 10. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

# **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

# Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		ctual after expenses)	Hypothetical (5% annual return before expenses)		
Beginning Account Value 10/1/23	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24 <sup>1</sup>	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23-3/31/241	Net Annualized Expense Ratio
\$1,000.00	\$1,085.50	\$1.56	\$1,023.50	\$1.52	0.30%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin Exponential Data ETF

This annual report for Franklin Exponential Data ETF covers the fiscal year ended March 31, 2024.

#### **Fund Overview**

#### Q. What is the Fund's investment strategy?

**A.** The Fund seeks capital appreciation. Under normal market conditions, the Fund invests at least 80% of its net assets in equity securities of companies that are relevant to the Fund's investment theme of exponential data. The Fund invests predominantly in common stock.

# Q. What were the overall market conditions during the Fund's reporting period?

A. For the year ended March 31, 2024, U.S. and global stock markets experienced a variety of conditions on their way to solid gains that were in the 24% to 30% range, based on broad equity indexes (in U.S. dollar terms). U.S. equities were at the high end of that range and generally outperformed their non-U.S. counterparts. The year started with concerns over the banking system, corporate profitability and multi-year high interest rates. Economic activity remained robust enough for most of the world to avoid recession despite higher borrowing costs as elevated inflation gradually subsided, and major central banks continued to hike policy rates.

As the year progressed, equity markets began to fare better than anticipated, supported by enthusiasm around artificial intelligence (AI), plenty of cash on the sidelines, and resilient (though uneven) economic growth, particularly in the U.S. However, risks were still evident with potential tipping points linked to increased pressure on corporate profits, households eating through excess savings, expanding geopolitical tensions, and sluggish economic activity in key economies such as China, Europe and Japan. By March 2024, global equities had risen for a fifth consecutive month amid reduced volatility, aided in part by several central banks signaling interest-rate cuts were likely to occur later this year. In particular, the U.S. Federal Reserve (Fed) shifted its monetary policy, moving from a tightening stance early in the period to a more neutral one in July, when it said that the post-pandemic tightening cycle was finished.

# Q. How did we respond to these changing market conditions?

**A.** We are not focused on short-term market fluctuations but rather emphasize picking the best stocks based on fundamentals.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +35.04% based on market price and +34.70% based on net asset value (NAV). In comparison, the Russell 3000® Index, which measures the performance of the largest 3,000 U.S. companies representing the majority of the U.S. market's total capitalization, posted a +29.29% cumulative total return for the same period. You can find more of the Fund's performance data in the Performance Summary beginning on page 18.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

The index is unmanaged and includes reinvestment of any income or distributions. It does not reflect any fees, expenses or sales charges. One cannot invest directly in an index, and an index is not representative of the Fund's portfolio.

Important data provider notices and terms available at www.franklintempletondatasources.com.

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Schedule of Investments (SOI). The SOI begins on page 132.

#### **Top 10 Holdings**

3/31/24

Company Sector/Industry	% of Total Net Assets
Microsoft Corp. Information Technology	8.8%
MongoDB, Inc. Information Technology	6.0%
Crowdstrike Holdings, Inc., Class A Information Technology	5.5%
ServiceNow, Inc. Information Technology	5.3%
Datadog, Inc., Class A Information Technology	5.1%
Palo Alto Networks, Inc. Information Technology	4.8%
Alphabet, Inc., Class A Communication Services	4.5%
Meta Platforms, Inc., Class A Communication Services	4.2%
Fair Isaac Corp. Information Technology	4.0%
Equinix, Inc. Real Estate	3.9%

#### Q. What were the leading contributors to performance?

A. Amid widespread gains, the Fund's two most-dominant industry exposures—software and IT services—also provided the bulk of its overall return (in absolute terms). The value of most software holdings rose by high double-digit percentages, as was the case with key contributors Microsoft, Datadog, ServiceNow, Fair Isaac, Palo Alto Networks, Monday.com and Zscaler. At the same time, our investment in CrowdStrike Holdings—the single-largest contributor of the fiscal year—more than doubled in value. Most IT services holdings also advanced, with the contributions to absolute returns led by MongoDB and Gartner. In the communications equipment industry, a solitary position in Arista Networks enjoyed a huge rally.

Communication services sector holdings also showed plenty of upside as all but one of our holdings traded substantially higher, including Alphabet and Meta Platforms (purchased during the period). A similar pattern emerged in the financials sector, where S&P Global and all but one of our other data-intensive capital markets industry holdings advanced. In the real estate sector, Equinix was the sole outlier to the upside during what was an otherwise lackluster fiscal year for the group.

#### Q. What were the leading detractors from performance?

**A.** Across the entire portfolio, there were only 11 detractors of substance; when combined, they had only a modest negative impact on the Fund's overall advance. The gains associated with Equinix were more than offset by the losses from Crown Castle and SBA Communications; all three companies are linked to technology infrastructure—including data centers—within the specialized REITs (real estate investment trusts) industry.

All of the other detractors served to reduce our absolute gains in other industries, including ZoomInfo Technologies, which was the only losing stock among the Fund's communication services sector investments. In the capital markets industry, MSCI was a minor detractor. The rest of the detractors restrained our otherwise robust performance in the IT sector, where Fortinet, Sprout Social and GitLab worked against us in the software industry. In the IT services space, the Fund's holdings in Endava and ThoughtWorks Holding (sold by period-end) sustained major losses, while EPAM Systems (sold by period-end) had a much smaller negative impact on returns. The only other notable detractor was Keysight Technologies, which traded slightly lower for the year and impacted our results in the electronic equipment, instruments and components industry.

# Q. Were there any significant changes to the Fund during the reporting period?

**A.** Software industry holdings increased as a portion of the overall portfolio due to a combination of strong appreciation among existing securities and the addition of new positions (Qualys and Adobe). Interactive media and services holdings also expanded with the purchase of Meta Platforms (Facebook's parent company) and the sharp appreciation associated with our existing stake in Alphabet (Google's parent company).

Commensurate reductions made room for the expansions outlined above, with the largest reductions occurring in specialized REITs, due to depreciation and strategic reductions of existing positions; IT services, through reductions of some key contributors into market strength and the liquidations of underperforming ThoughtWorks Holding and EPAM Systems; and electronic equipment, instruments and components (based on the partial sale and aforementioned depreciation tied to Keysight Technologies).

Thank you for your continued participation in Franklin Exponential Data ETF. We look forward to serving your future investment needs.

Matthew J. Moberg, CPA Portfolio Manager

The foregoing information reflects our analysis, opinions and portfolio holdings as of March 31, 2024, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

# Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance table and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (1/14/21), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

# Performance as of 3/31/24<sup>1</sup>

	Cumulative Total Return <sup>2</sup>		Average Annu	al Total Return²
	Based on NAV <sup>3</sup>	Based on market price <sup>4</sup>	Based on NAV <sup>3</sup>	Based on market price <sup>4</sup>

See page 20 for Performance Summary footnotes.

# Total Return Index Comparison for a Hypothetical \$10,000 Investment

Total return represents the change in value of an investment over the periods shown. It includes any applicable maximum sales charge, Fund expenses, account fees and reinvested distributions. The unmanaged index includes reinvestment of any income or distributions. It differs from the Fund in composition and does not pay management fees or expenses. One cannot invest directly in an index.

#### 1/12/21-3/31/24

See page 20 for Performance Summary footnotes.

### Total Annual Operating Expenses<sup>6</sup>

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Equity securities are subject to price fluctuation and possible loss of principal. The Fund's investment strategies incorporate the identification of thematic investment opportunities, and its performance may be negatively impacted if the investment manager does not correctly identify such opportunities or if the theme develops in an unexpected manner. By focusing its investments in information technology-related industries, it carries much greater risks of adverse developments and price movements in such industries than a fund that invests in a wider variety of industries. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

# **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

# Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		ctual after expenses)	Hypothetical (5% annual return before expenses)		
Beginning Account Value 10/1/23	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24 <sup>1</sup>	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23-3/31/241	Net Annualized Expense Ratio
\$1,000.00	\$1,264.50	\$2.77	\$1,022.55	\$2.48	0.49%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin Focused Growth ETF

At a meeting held on June 30, 2023, shareholders of Franklin Focused Growth Fund approved the reorganization of the fund into the newly created exchange-traded fund, Franklin Focused Growth ETF (the "Fund"), a series of Franklin Templeton ETF Trust (the "Reorganization"). The Reorganization occurred after the market close on November 3, 2023, (the "Closing Date"). As approved by the Board of Trustees at a meeting held on November 30, 2023, the fiscal year-end for the Fund was changed to March 31, effective March 31, 2024. This inaugural annual report for the Fund covers the shortened fiscal year for the transitional six-month period between the predecessor mutual fund's fiscal year-end, September 30, 2023, and March 31, 2024.

### **Fund Overview**

#### Q. What is the Fund's investment strategy?

**A.** The Fund seeks capital appreciation. Under normal market conditions, the Fund invests predominantly in equity securities of companies that the investment manager believes offer compelling growth opportunities.

# Q. What were the overall market conditions during the Fund's reporting period?

A. Global equities collectively posted strong gains during the five-month rally that characterized part of the Fund's shortened annual reporting period. Better-than-expected corporate earnings reports, growth opportunities tied to artificial intelligence (AI) and optimism about an economic soft landing in certain regions bolstered investor sentiment. Meanwhile, expectations for interest-rate cuts in the U.S. and Europe diminished amid cautious central bank comments, along with some higher-than-anticipated U.S. inflation data. Global manufacturing activity returned to growth in February and flash reports indicated continued expansion in several regions through March, while global services sector activity generally grew at a more resolute pace.

In this environment, equities as measured by the MSCI All Country World Index generated positive returns for the period. All 11 equity sectors rose, led by financials, information technology (IT) and communication services, while utilities and energy were notable laggards. Developed market equities collectively reached a new record high and modestly outperformed on a global basis, while emerging and frontier market equities underperformed. In terms of investment style, global growth stocks generally outpaced their value-oriented counterparts across the market-capitalization spectrum.

# Q. How did we respond to these changing market conditions?

**A.** We are not focused on short-term market fluctuations but rather emphasize picking the best stocks based on fundamentals.

#### Performance Overview

During the transitional six-month period under review, the Fund posted cumulative total returns of +35.81% based on market price and +35.73% based on net asset value (NAV). In comparison, the Fund's benchmark, Russell 1000® Growth Index, which measures the performance of the largest 1,000 U.S. companies representing the majority of the U.S. market's total capitalization, posted a +27.19% cumulative total return. You can find more of the Fund's performance data in the Performance Summary beginning on page 25.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

The index is unmanaged and includes reinvestment of any income distributions. It does not reflect any fees, expenses or sales charges. One cannot invest directly in an index, and an index is not representative of the Fund's portfolio.

Important data provider notices and terms available at www.franklintempletondatasources.com.

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Schedule of Investments (SOI). The SOI begins on page 135.

<sup>1.</sup> The Fund adopted the performance of the predecessor mutual fund as a result of the Reorganization. Prior to the Reorganization, the Fund had not yet commenced operations. The returns shown for periods ended on or prior to November 3, 2023, are those of the predecessor mutual fund. The predecessor mutual fund's performance is represented by the performance of the predecessor mutual fund's Advisor Class Shares. Prior to the Fund's listing on November 6, 2023, the NAV performance of the Class Advisor Shares of the predecessor mutual fund is used as a proxy for the Fund's market price returns. Had the predecessor mutual fund been structured as an ETF, its performance may have differed.

#### Q. What were the leading contributors to performance?

A. On an absolute basis, eight of the Fund's nine equity sector exposures advanced with solid, double-digit percentage returns, led by IT, health care and communication services stocks. When combined, these three allocations covered just nearly three-quarters of the portfolio's overall composition, so their impact was considerable. Semiconductor and semiconductor equipment companies such as NVIDIA and ASML Holding were standouts that provided roughly a third of the Fund's overall gain, with NVIDIA serving as a distinct outlier to the upside. All six of the Fund's software holdings also enjoyed large rallies including key contributors Microsoft, ServiceNow and Cadence Design Systems. All IT services industry holdings also advanced, though they comprised a much smaller portion of the Fund's IT exposure.

The Fund held six health care sector stocks covering various investment themes in pharmaceuticals, health care equipment and supplies, and life sciences tools and services. They all traded higher, with Eli Lilly and Intuitive Surgical serving as standout contributors. A smaller allocation in communication services was led higher by Meta Platforms foremost.

To a lesser extent, additional absolute gains were generated in the consumer discretionary, consumer staples, financials, industrials and materials sectors. Mixed but overall positive returns in the consumer discretionary sector were aided by online retailers, including a substantial rally for Amazon.com. Consumer staples was a single-asset allocation with Costco Wholesale serving as the sole contributor. The Fund's smaller exposure to financial services and capital market companies was boosted primarily by Mastercard's strong return, while industrials sector gains were lifted foremost by an impressive rally in Axon Enterprise.

#### Q. What were the leading detractors from performance?

A. Across the entire portfolio, there were only three detractors at the individual security level. At the sector level, the Fund's small exposure to energy companies began to stage a comeback in February and March, but both of the Fund's related holdings—including key detractor Schlumberger—still ended the reporting period in negative territory. The only other area of weakness occurred in the consumer discretionary sector, where Tesla was a notable outlier to the downside.

# Q. Were there any significant changes to the Fund during the reporting period?

24

**A.** Portfolio shifts were subtle, though we did move most of the Fund's neutral holdings in cash and equivalent short-term securities into active stock positions, thereby reducing the balance to less than 1% of total net assets by the end of March. We also reduced industrials sector holdings, eliminating exposure to the commercial services and supplies industry with the complete sale of Veralto. Elsewhere in the industrials space, we shifted the Fund's exposure to ground transportation industry names as an existing stake in railroad operator Canadian Pacific Kansas City was sold while we initiated a new position in Uber Technologies. In the energy sector, a small investment in Hess was liquidated, thereby reducing the Fund's exposure to oil, gas and consumable fuels industry firms to zero.

The largest increases to the Fund's industry exposures occurred in semiconductors, and in interactive media and services. Among the notable reductions to industry-level allocations were life sciences tools and services; e-commerce companies in the broadline retail industry; automobiles (focused exclusively on Tesla); financial services; and oilfield services, in which Schlumberger was the Fund's only investment.

Thank you for your continued participation in Franklin Focused Growth ETF. We look forward to serving your future investment needs.

Matthew J. Moberg, CPA Portfolio Manager

The foregoing information reflects our analysis, opinions and portfolio holdings as of March 31, 2024, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. # Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance table and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (November 6, 2023), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

# Total Return Index Comparison for a Hypothetical \$10,000 Investment

Total return represents the change in value of an investment over the periods shown. It includes any applicable maximum sales charge, Fund expenses, account fees and reinvested distributions. The unmanaged index includes reinvestment of any income or distributions. It differs from the Fund in composition and does not pay management fees or expenses. One cannot invest directly in an index.

u	. 33 70	

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results

All investments involve risks, including possible loss of principal. To the extent the portfolio invests in a concentration of certain securities, regions or industries, it is subject to increased volatility. The investment style may become out of favor, which may have a negative impact on performance. Active management does not ensure gains or protect against market declines. Small- and mid-cap stocks involve greater risks and volatility than large-cap stocks. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks could be magnified in emerging markets. Because the Fund is non-diversified, it may be more sensitive to economic, business, political or other changes affecting individual issuers or investments than a diversified fund. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's annual report available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. The Fund adopted the performance of the predecessor mutual fund as a result of the Reorganization. Prior to the Reorganization, the Fund had not yet commenced operations. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized. The returns shown for periods ended on or prior to November 3, 2023, are those of the predecessor mutual fund. The predecessor mutual fund's performance is represented by the performance of the predecessor mutual fund's Advisor Class Shares. Prior to the Fund's listing on November 6, 2023, the NAV performance of the Advisor Class Shares of the predecessor mutual fund is used as a proxy for market price returns. Had the predecessor mutual fund been structured as an ETF, its performance may have differed.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Source: FactSet. The Russell 1000® Growth Index is market capitalization weighted and measures the performance of those Russell 1000® Index companies with relatively higher price-to-book ratios and higher forecasted growth rates.
- 6. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

 $Important\ data\ provider\ notices\ and\ terms\ available\ at\ www.franklintempleton data sources.com.$ 

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

# **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

# Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		ctual after expenses)	Hypothetical (5% annual return before expenses)		
Beginning Account Value 10/1/23	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24 <sup>1</sup>	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23-3/31/24 <sup>1</sup>	Net Annualized Expense Ratio
\$1,000.00	\$1,357.30	\$3.59	\$1,021.95	\$3.08	0.61%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin Genomic Advancements ETF

This annual report for Franklin Genomic Advancements ETF covers the fiscal year ended March 31, 2024.

### **Fund Overview**

### Q. What is the Fund's investment strategy?

**A.** The Fund seeks capital appreciation. Under normal market conditions, the Fund invests at least 80% of its net assets in equity securities of companies that are relevant to the Fund's investment theme of genomic advancements. The Fund invests predominantly in common stock.

# Q. What were the overall market conditions during the Fund's reporting period?

A. For the year ended March 31, 2024, U.S. and global stock markets experienced a variety of conditions on their way to solid gains that were in the 24% to 30% range, based on broad equity indexes (in U.S. dollar terms). U.S. equities were at the high end of that range and generally outperformed their non-U.S. counterparts. The year started with concerns over the banking system, corporate profitability and multi-year high interest rates. Economic activity remained robust enough for most of the world to avoid recession despite higher borrowing costs as elevated inflation gradually subsided, and major central banks continued to hike policy rates.

As the year progressed, equity markets began to fare better than anticipated, supported by enthusiasm around artificial intelligence (AI), plenty of cash on the sidelines, and resilient (though uneven) economic growth, particularly in the U.S. However, risks were still evident with potential tipping points linked to increased pressure on corporate profits, households eating through excess savings, expanding geopolitical tensions, and sluggish economic activity in key economies such as China, Europe and Japan. By March 2024, global equities had risen for a fifth consecutive month amid reduced volatility, aided in part by several central banks signaling interest-rate cuts were likely to occur later this year. In particular, the U.S. Federal Reserve (Fed) shifted its monetary policy, moving from a tightening stance early in the period to a more neutral one in July, when it said that the post-pandemic tightening cycle was finished.

# Q. How did we respond to these changing market conditions?

**A.** We are not focused on short-term market fluctuations but rather emphasize picking the best stocks based on fundamentals.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +7.83% based on market price and +7.76% based on net asset value (NAV). In comparison, the Russell 3000® Index, which measures the performance of the largest 3,000 U.S. companies representing the majority of the U.S. market's total capitalization, posted a +29.29% cumulative total return for the same period. You can find more of the Fund's performance data in the Performance Summary beginning on page 32.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to **franklintempleton.com** or call **(800) 342-5236.**

Important data provider notices and terms available at www.franklintempletondatasources.com.

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Schedule of Investments (SOI). The SOI begins on page 138.

#### **Top 10 Holdings**

3/31/24

Company Sector/Industry	% of Total Net Assets
Medpace Holdings, Inc. Life Sciences Tools & Services	7.4%
Thermo Fisher Scientific, Inc. Life Sciences Tools & Services	4.9%
Vertex Pharmaceuticals, Inc. Biotechnology	4.6%
Regeneron Pharmaceuticals, Inc. Biotechnology	4.5%
Krystal Biotech, Inc. Biotechnology	4.2%
Eli Lilly & Co. Pharmaceuticals	4.1%
Danaher Corp. Life Sciences Tools & Services	3.9%
Bruker Corp. Life Sciences Tools & Services	3.4%
Sartorius AG, 0.39% Life Sciences Tools & Services	3.3%
Samsung Biologics Co. Ltd. Life Sciences Tools & Services	3.1%

#### Q. What were the leading contributors to performance?

A. Absolute returns were positive in just four out of nine industry allocations, but these included the Fund's core exposures—life sciences tools and services, and biotechnology, which at March-end covered more than four-fifths of the portfolio (when combined). Mixed results in the life sciences tools and services space were buoyed by several holdings that posted robust, double-digit percentage gains, including Charles River Laboratories, ICON, Danaher and Bruker. At the same time, Medpace Holdings—the Fund's top contributor of the year under review—eclipsed them as its equity value more than doubled. We also had some major outliers to the upside in biotech, including Krystal Biotech and 4D Molecular Therapeutics (purchased during the period). They were joined by Vertex Pharmaceuticals, Regeneron Pharmaceuticals and many others that had smaller but still-impressive gains.

Elsewhere in the portfolio, overall declines for three pharmaceuticals industry holdings were more than offset by a huge rally in Eli Lilly, while our single-asset exposure to the application software industry fared well as the shares of Cadence Design Systems vaulted to all-time highs.

### Q. What were the leading detractors from performance?

A. Seed, fertilizer and agricultural chemicals companies

30

Corteva and FMC (sold by period-end) fared poorly, as did health care services firms such as Guardant Health. The Fund also had minimal exposure to three other industries that had a slightly negative combined impact on absolute returns: environmental facilities and services (allocation initiated and sold during the year under review), health care technology, and health care-focused office REITs (real estate investment trusts).

Nearly all of the other substantive detractors were individual stocks that reduced our overall gains in the biotech and life sciences tools industries. Biotech investments were hindered foremost by the selloffs in Avid Bioservices, Moderna, Sarepta Therapeutics, BioNTech, PTC Therapeutics (sold by period-end) and Alnylam Pharmaceuticals. Our largest detractors in life sciences tools and services, meanwhile, were PerkinElmer, Repligen, Oxford Nanopore Technologies, Bio-Rad Laboratories and Sartorius.

# Q. Were there any significant changes to the Fund during the reporting period?

A. Life sciences tools and services holdings were meaningfully reduced to make way for greater investment in biotechnology and, to a much lesser extent, pharmaceuticals. Despite the trimming in life sciences tools and services, we only eliminated one existing stock (Illumina), while introducing three new ones to the portfolio (Fortrea Holdings, 10X Genomics and Pacific Biosciences of California). Trading in the biotechnology industry was even more active as we initiated 10 new holdings, partially offset by the complete sales of two existing holdings. We also reduced the Fund's small exposures to health care services, fertilizers and agricultural chemicals, and office REITs during the year under review.

Thank you for your continued participation in Franklin Genomic Advancements ETF. We look forward to serving your future investment needs.

Matthew J. Moberg, CPA Portfolio Manager

The foregoing information reflects our analysis, opinions and portfolio holdings as of March 31, 2024, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

# Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance table and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (2/27/20), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

n	50%	

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Equity securities are subject to price fluctuation and possible loss of principal. The Fund's investment strategies incorporate the identification of thematic investment opportunities, and its performance may be negatively impacted if the investment manager does not correctly identify such opportunities or if the theme develops in an unexpected manner. By focusing its investments in health care-related industries, the Fund carries much greater risks of adverse developments and price movements in such industries than a fund that invests in a wider variety of industries. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. The portfolio is non-diversified and may invest in a relatively small number of issuers, which may negatively impact the Fund's performance and result in greater fluctuation in the value of the Fund's shares. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

## **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

# Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

	Actual (actual return after expenses)		Hypothetical (5% annual return before expenses)		
Beginning	Ending	Expenses Paid During	Ending	Expenses Paid During	
Account Value 10/1/23	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Net Annualized Expense Ratio
\$1,000.00	\$1,155.10	\$2.69	\$1,022.50	\$2.53	0.50%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin High Yield Corporate ETF

This annual report for Franklin High Yield Corporate ETF covers the fiscal year ended March 31, 2024.

## **Fund Overview**

### Q. What is the Fund's Investment Strategy?

A. The Fund seeks to earn a high level of current income. Its secondary goal is to seek capital appreciation to the extent it is possible and consistent with the Fund's principal goal. Under normal market conditions, the Fund invests at least 80% of its net assets in high yield corporate debt securities and investments that provide exposure to high yield corporate debt securities. High yield debt securities are those that are rated below investment grade, also known as "junk bonds." High yield debt securities are rated at the time of purchase below the top four ratings categories by at least one independent rating agency such as S&P Global Ratings (S&P®) (rated BB+ and lower) and Moody's Investors Service (Moody's) (rated Ba1 and lower) or, if unrated, are determined to be of comparable quality by the Fund's investment manager. Corporate issuers may include corporate or other business entities in which a sovereign or governmental agency or entity may have, indirectly or directly, an interest, including a majority or greater ownership interest.

# Q. What were the overall market conditions during the Fund's reporting period?

A. Fixed income markets experienced a high-volatility environment as concerns over high levels of inflation and the U.S. Federal Reserve's (Fed) policy response dominated the economic and market discussion. Yields changed rapidly in response to an evolving macroeconomic landscape and changing global monetary policies. Geopolitical risk remained an overhang to the market throughout the quarter as the war in Ukraine continued and a new conflict in the Middle East emerged, putting temporary pressure on global energy prices. Inflation, as reflected in the Consumer Price Index, moderated towards the end of 2023. While markets were unsettled, corporate fundamentals continued on a robust pace, which benefited the Fund's loan and bond holdings. The U.S. Fed paused its interest rate hikes at the September and subsequent meetings. Although 2024 began

with financial market exuberance as investors anticipated imminent rate cuts from developed market central banks, sentiments turned cautious upon the end of the first quarter as economic growth continued to be robust (especially in the U.S.) and price pressures persistent. March 2024's Fed Summary of Economic Projections continued to project three rate cuts for the year. Ten-year U.S. Treasury yields traded in a wide range, peaking at 5.0% in October before falling, ending March at 4.20%.

# Q. How did we respond to these changing market conditions?

**A.** While debate about the likelihood of a recession was a constant theme, no matter the outcome the fact remains that the lower end consumer has faced increasing pressure from inflation and high interest rates. We positioned the portfolio to minimize exposure to the lower end consumer. Overall, we retained a keen focus on security selection, favoring higher-quality companies as defined by the sustainability of their business models, industry positioning, and financial liquidity that can withstand a higher for longer rate environment as well as any potential economic volatility in the coming years.

## Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +10.98% based on market price and +12.13% based on net asset value (NAV). In comparison, the ICE BofA U.S. High Yield Constrained Index, which tracks the performance of U.S. dollar denominated below investment-grade corporate debt publicly issued in the U.S. domestic market, posted a +11.06% cumulative total return for the same period. You can find more of the Fund's performance data in the Performance Summary beginning on page 39.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Schedule of Investments (SOI). The SOI begins on page 141.

### Q. What were the leading contributors to performance?

**A.** Yield curve positioning, quality allocation and security selection all contributed favorably to returns. We maintained a lower duration positioning than the index, which benefited as interest rates generally rose over the course of the year. Quality allocation and security selection, which are essentially two sides of the same coin, were most pronounced in the utility, automotive, and entertainment industries.

### Q. What were the leading detractors from performance?

**A.** Detractors included our underweight exposure to the retail sector, as several distressed retailers rebounded during the year, as well as security selection in the technology sector.

# Q. Were there any significant changes to the Fund during the reporting period?

**A.** There were no significant changes, as our strategy continues to apply a disciplined approach to individual security selection.

37

Thank you for your participation in Franklin High Yield Corporate ETF. We look forward to serving your future investment needs.

The foregoing information reflects our analysis, opinions and portfolio holdings as of March 31, 2024, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

# Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance tables and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (6/1/18), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

# Performance as of 3/31/24<sup>1</sup>

# Total Return Index Comparison for a Hypothetical \$10,000 Investment

Total return represents the change in value of an investment over the periods shown. It includes any applicable maximum sales charge, Fund expenses, account fees and reinvested distributions. The unmanaged index includes reinvestment of any income or distributions. It differs from the Fund in composition and does not pay management fees or expenses. One cannot invest directly in an index.

### 5/30/18-3/31/24

See page 47 for Performance Summary footnotes.

40

# **Distributions** (4/1/23–3/31/24)

Net Investment Income \$1.537322

### Total Annual Operating Expenses<sup>8</sup>

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. Distributions are not guaranteed and are subject to change. Low-rated, high-yield bonds are subject to greater price volatility, illiquidity and possibility of default. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. Liquidity risk exists when securities or other investments become more difficult to sell, or are unable to be sold, at the price at which they have been valued. Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and includes a prorated special distribution in the month it is paid. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of fund performance.
- 6. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.
- 7. Source: FactSet. The ICE BofA U.S. High Yield Constrained Index tracks the performance of U.S. dollar-denominated below investment-grade corporate debt publicly issued in the U.S. domestic market.
- 8. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

# **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

## Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

	Actual (actual return after expenses)		Hypothetical (5% annual return before expenses)		
Beginning Account Value 10/1/23	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24 <sup>1</sup>	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23-3/31/241	Net Annualized Expense Ratio
\$1,000.00	\$1,089.90	\$2.09	\$1,023.00	\$2.02	0.40%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin Income Focus ETF

This inaugural annual report for Franklin Income Focus ETF (the "Fund") covers the period since the Fund's inception on June 6, 2023, through March 31, 2024.

### **Fund Overview**

#### Q. What is the Fund's investment strategy?

A. The Fund seeks high current income while maintaining prospects for capital appreciation. Under normal market conditions, the Fund invests in a diversified portfolio of debt and equity securities and derivatives. The Fund may dynamically shift its investments from one asset class to another based on the investment manager's analysis of the best opportunities for the Fund's portfolio in a given market. "Income Focus" in the Fund's name refers to the Fund's strategy of seeking to maximize income over a full market cycle by investing opportunistically across different asset classes, markets and sectors and utilizing income generation strategies.

# Q. What were the overall market conditions during the Fund's reporting period?

A. The Fund generated positive returns during the period, driven by strong performance from both fixed income and equities. Relative to the Fund's blended benchmark, security selection within its overweight fixed income allocation supported absolute performance. However, stock selection and an underweight equity allocation hindered relative returns. The Fed raised interest rates in July, then held them there for the duration of the period to counteract stubborn inflation. The U.S. economy remained resilient and continued to grow with gross domestic product in excess of 2%, which was largely driven by a balanced labor market and robust consumption in goods and services.

# Q. How did we respond to these changing market conditions?

**A.** The Fund entered the period with an equity weighting of 39.2% and a fixed income weighting of 57.4% (while holding 3.4% in cash equivalents). Interest rates were volatile during the 10-month period and the Fund shifted its asset allocation to take advantage of higher yield investment opportunities as

rates rose. By the end of the period, allocation reverted to levels similar to those at inception; equity allocation had increased to 40.8% and fixed income allocation was 58.2%, while cash equivalents comprised almost 1.0% of the Fund.

## Performance Overview

During the period since the Fund's inception on June 6, 2023, through March 31, 2024, the Fund posted cumulative total returns of +8.60% based on market price and +8.40% based on net asset value (NAV). In comparison, the blended 50% Standard & Poor's® 500 (S&P 500®) Index + 50% Bloomberg U.S. Aggregate Index, posted a +12.94% cumulative total return. Individually the S&P 500® Index, which is a market capitalization-weighted index of 500 stocks designed to measure total U.S. equity market performance, posted a +24.2% cumulative total return, while the Bloomberg U.S. Aggregate Index, which measures the performance of the investment-grade, U.S. dollardenominated, fixed-rate taxable bond market, posted a +2.37% cumulative total return. You can find more of the Fund's performance data in the Performance Summary beginning on page 45.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

## Q. What were the leading contributors to performance?

**A.** Fixed income holdings contributed to the Fund's returns during the period under review, led by the health care, financials, and consumer discretionary sectors. Within health care, Community Health Systems and Tenet Healthcare performed best, while Ford Motor added value within the consumer discretionary sector. Mauser Packaging Solutions also contributed to absolute performance within the materials sector. In terms of the Fund's equity allocation, the most notable contributors to Fund performance were S&P 500 Index-Linked Notes and the financials sector, followed by the consumer staples and energy sectors. JP Morgan Chase & Co. led returns within financials, while Target added value within consumer staples. AbbVie also contributed within the health care sector.

### Q. What were the leading detractors from performance?

**A.** In aggregate, no sectors detracted from absolute returns within the Fund's fixed income or equity allocation. However, U.S. Treasuries were the largest detractors within the Fund's fixed income allocation. CommScope Holding and Ardagh Packaging also hindered returns within the information technology and materials sectors, respectively. Within equities, Bristol-Myers Squibb and Pfizer detracted within

44

health care, while United Parcel Service hindered returns within industrials. The Fund no longer holds a position in Bristol-Myers Squibb, as of the period-end on March 31, 2024.

Thank you for your continued participation in Franklin Income Focus ETF. We look forward to serving your future investment needs.

### Total Annual Operating Expenses<sup>8</sup>

0.38%	

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. The Fund is newly organized, with a limited history of operations. Bond prices generally move in the opposite direction of interest rates. Thus, as the prices of bonds in the Fund adjust to a rise in interest rates, the Fund's share price may decline. Changes in the financial strength of a bond issuer or in a bond's credit rating may affect its value. Low-rated, high-yield bonds are subject to greater price volatility, illiquidity and possibility of default. Stock prices fluctuate, sometimes rapidly and dramatically, due to factors affecting individual companies, particular industries or sectors, or general market conditions. Investments in equity index-linked notes often have risks similar to their underlying securities, which could include management risk, market risk and, as applicable, foreign securities and currency risks. The allocation of assets among different strategies, asset classes and investments may not prove beneficial or produce the desired results. Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risk considerations are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and includes a prorated special distribution in the month it is paid. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of Fund performance.
- 6. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

# **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

## Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		tual after expenses)	Hypothetical (5% annual return before expenses)		
Beginning Account Value 6/6/23	Ending Account Value 3/31/24	Expenses Paid During Period 6/6/23–3/31/24 <sup>1,2</sup>	Ending Account Value 3/31/24	Expenses Paid During Period 6/6/23-3/31/24 <sup>1,2</sup>	Net Annualized Expense Ratio <sup>2</sup>
\$1,000.00	\$1,103.10	\$2.00	\$1,023.10	\$1.92	0.38%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

<sup>2.</sup> Reflects expenses after fee waivers and expense reimbursements.

# Franklin Intelligent Machines ETF

This annual report for Franklin Intelligent Machines ETF covers the fiscal year ended March 31, 2024.

## **Fund Overview**

### Q. What is the Fund's investment strategy?

**A.** The Fund seeks capital appreciation. Under normal market conditions, the Fund invests at least 80% of its net assets in equity securities of companies that are relevant to the Fund's investment theme of intelligent machines. The Fund invests predominantly in common stock.

# Q. What were the overall market conditions during the Fund's reporting period?

A. For the year ended March 31, 2024, U.S. and global stock markets experienced a variety of conditions on their way to solid gains that were in the 24% to 30% range, based on broad equity indexes (in U.S. dollar terms). U.S. equities were at the high end of that range and generally outperformed their non-U.S. counterparts. The year started with concerns over the banking system, corporate profitability and multi-year high interest rates. Economic activity remained robust enough for most of the world to avoid recession despite higher borrowing costs as elevated inflation gradually subsided, and major central banks continued to hike policy rates.

As the year progressed, equity markets began to fare better than anticipated, supported by enthusiasm around artificial intelligence (AI), plenty of cash on the sidelines, and resilient (though uneven) economic growth, particularly in the U.S. However, risks were still evident with potential tipping points linked to increased pressure on corporate profits, households eating through excess savings, expanding geopolitical tensions, and sluggish economic activity in key economies such as China, Europe and Japan. By March 2024, global equities had risen for a fifth consecutive month amid reduced volatility, aided in part by several central banks signaling interest-rate cuts were likely to occur later this year. In particular, the U.S. Federal Reserve (Fed) shifted its monetary policy, moving from a tightening stance early in the period to a more neutral one in July, when it said that the post-pandemic tightening cycle was finished.

# Q. How did we respond to these changing market conditions?

**A.** We are not focused on short-term market fluctuations but rather emphasize picking the best stocks based on fundamentals.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +32.49% based on market price and +32.13% based on net asset value (NAV). In comparison, the Russell 3000® Index, which measures the performance of the largest 3,000 U.S. companies representing the majority of the U.S. market's total capitalization, posted a +29.29% cumulative total return for the same period. You can find more of the Fund's performance data in the Performance Summary beginning on page 52.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

NVIDIA Corp. Semiconductors & Semiconductor Equipment	11.0%
ASML Holding NV Semiconductors & Semiconductor Equipment	5.2%
Intuitive Surgical, Inc. Health Care Equipment & Supplies	4.9%
Cadence Design Systems, Inc. Software	4.8%
Synopsys, Inc. Software	4.6%
Apple, Inc. Computers & Peripherals	3.6%
Axon Enterprise, Inc. Aerospace & Defense	3.3%
Taiwan Semiconductor Manufacturing Co. Ltd. Semiconductors & Semiconductor Equipment	3.3%
Applied Materials, Inc. Semiconductors & Semiconductor Equipment	3.2%
Advanced Micro Devices, Inc. Semiconductors & Semiconductor Equipment	3.0%

#### Q. What were the leading contributors to performance?

A. The Fund had exposure to 13 industry groups, 10 of which added to its absolute returns. Our two largest industry allocations—semiconductor-related companies and software developers—covered about two-thirds of the portfolio, and they were also the biggest contributors by far. Semiconductor and semiconductor fabrication equipment makers started the Fund's fiscal year on a difficult and volatile path but many of them eventually recovered their initial losses and regained strong positive momentum in the latter half of the period. NVIDIA, ASML Holding, Applied Materials and Taiwan Semiconductor Manufacturing were among those winners. with our considerable stake in NVIDIA more than tripling in value amid parabolic demand for its GPU chips in data centers and Al-related applications. Several smaller industry contributors posted large double-digit percentage gains including ASM International, Entegris and Lam Research.

Software industry investments were more consistent as all but one of them rallied solidly during the year under review, including key contributors Synopsys, Cadence Design Systems and Constellation Software. Elsewhere in the IT sector, our single-asset exposure to the technology hardware, storage and peripherals industry was focused on Apple, which ultimately posted a modest gain amid a roller-coaster year in the stock market that saw its equity

value remaining nearly unchanged from September 2023 through March 2024.

It was also a year of revived investor interest in a wide range of industrials sector companies. Most of the highly innovative industrials companies held by the Fund posted strong, double-digit percentage gains, including standout contributors Axon Enterprise (sublethal weaponry, body cams and law enforcement software), Quanta Services (tech and telecommunications infrastructure construction and engineering) and Eaton (electrical equipment). Elsewhere in the portfolio, Intuitive Surgical (minimally-invasive robotic surgery systems) was the best of three absolute contributors in the health care equipment and supplies industry.

## Q. What were the leading detractors from performance?

A. Even with the stellar returns outlined above, our overall results in the semiconductors and semiconductor equipment industry were uneven. Several related holdings did not recover their initial losses by the time we either sold them (Enphase Energy and SolarEdge Technologies) or the annual period concluded (Wolfspeed, SiTime, Infineon Technologies, First Solar and more), which in the latter scenario was the case for several stocks that we intended to hold for the longer term despite recent setbacks. In another setback for the Fund's IT sector investments, our positions in electronic equipment, instruments and components industry companies failed to advance as four out of seven holdings traded lower, none more so than Samsung SDI as the company shed more than half of its equity value before we eliminated it from the portfolio.

A small portion of the portfolio was dedicated to consumer discretionary sector companies, and our results there were negative overall as a substantive position in Tesla ended a volatile period with a significant loss as sales of its electric vehicles began to cool off. In the health care sector, our overall gains were clipped by a major selloff in Insulet (sold by period-end) and smaller losses for Inspire Medical Systems and others. The Fund's industrials sector allocation also had a couple outliers to the downside, including key detractor Valmont Industries in construction and engineering.

# Q. Were there any significant changes to the Fund during the reporting period?

**A.** The most notable portfolio shift was the increase in exposure to semiconductor-related companies, based on both appreciation and the introduction of new holdings such as Advanced Micro Devices, Broadcom and Intel. At the same time, holdings in the electronic equipment, instruments and components industry were reduced by both depreciation and security sales. In industrials, the 12-month appreciation of existing assets and a new position in the ground

51

transportation industry (Uber Technologies) helped bump up the portfolio's overall exposure to the sector. Meanwhile, the portfolio saw a notable drawdown in its health care holdings through a combination of partial sales in select holdings that had performed well, complete sales of select laggards, and the introduction of two new holdings (Shockwave Medical and Align Technology). Consumer discretionary names were also reduced through the depreciation of Tesla shares and the partial sale of Panasonic Holdings into strength.

Thank you for your continued participation in Franklin Intelligent Machines ETF. We look forward to serving your future investment needs.

Matthew J. Moberg, CPA Portfolio Manager

The foregoing information reflects our analysis, opinions and portfolio holdings as of March 31, 2024, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

# Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance table and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (2/27/20), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

# Performance as of 3/31/24<sup>1</sup>

	Cumulative Total Return <sup>2</sup>		Average Annual Total Return <sup>2</sup>	
	Based on NAV <sup>3</sup>	Based on market price <sup>4</sup>	Based on NAV <sup>3</sup>	Based on market price <sup>4</sup>
1-Year	+32.13%	+32.49%	+32.13%	+32.49%
3-Year	+35.18%	+35.21%	+10.57%	+10.58%
Since Inception (2/25/20)	+133.84%	+134.04%	+23.05%	+23.07%

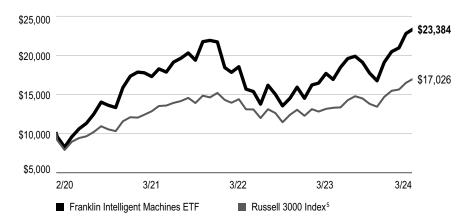

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to **franklintempleton.com** or call **(800) 342-5236.** 

See page 54 for Performance Summary footnotes.

# Total Return Index Comparison for a Hypothetical \$10,000 Investment

Total return represents the change in value of an investment over the periods shown. It includes any applicable maximum sales charge, Fund expenses, account fees and reinvested distributions. The unmanaged index includes reinvestment of any income or distributions. It differs from the Fund in composition and does not pay management fees or expenses. One cannot invest directly in an index.

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Equity securities are subject to price fluctuation and possible loss of principal. The Fund's investment strategies incorporate the identification of thematic investment opportunities, and its performance may be negatively impacted if the investment manager does not correctly identify such opportunities or if the theme develops in an unexpected manner. By focusing its investments in technology-related industries, the Fund carries much greater risks of adverse developments and price movements in such industries than a fund that invests in a wider variety of industries. The portfolio is non-diversified and may invest in a relatively small number of issuers, which may negatively impact the Fund's performance and result in greater fluctuation in the value of the Fund's shares. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. The manager may consider environmental, social and governance (ESG)criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Source: FactSet. The Russell 3000<sup>®</sup> Index is market capitalization-weighted and measures the performance of the largest 3,000 U.S. companies representing the majority of the U.S. market's total capitalization.
- 6. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

## **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

## Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		ctual after expenses)	Hypothetical (5% annual return before expenses)		
Beginning Account Value 10/1/23	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24 <sup>1</sup>	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24 <sup>1</sup>	Net Annualized Expense Ratio
\$1,000.00	\$1,318.90	\$2.90	\$1,022.50	\$2.53	0.50%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin International Aggregate Bond ETF

This annual report for Franklin International Aggregate Bond ETF covers the fiscal year ended March 31, 2024.

## **Fund Overview**

### Q. What is the Fund's investment strategy?

**A.** The Fund seeks total investment return, consistent with prudent investing, consisting of a combination of interest income and capital appreciation. Under normal market conditions, the Fund invests at least 80% of its net assets in bonds and investments that provide exposure to bonds. Bonds include debt obligations of any maturity, such as bonds, notes, bills and debentures.

# Q. What were the overall market conditions during the Fund's reporting period?

**A.** After addressing a bout of financial sector turmoil early in the second quarter of 2023, central banks returned their focus to persistent levels of core inflation. In May, the U.S. Federal Reserve (Fed) raised the Fed funds rate by 25 basis points (bps). Subsequent economic data showed a surprisingly resilient U.S. economy, raising expectations for at least one further hike by the Fed before the autumn. Nonetheless, the Fed kept rates unchanged for the first time in over a year in June, although it signaled support for two additional hikes in 2023.

Indeed, the Fed hiked rates by 25 bps to a target range of 5.25-5.50% in July, its highest level in more than 22 years, but opted for a pause at its September meeting. However, Fed Chair Powell suggested he was hesitant to call an end to the central bank's tightening cycle until a more sustained return of inflation to its target was evident.

Nonetheless, the Fed left its policy rate unchanged over the fourth quarter of 2023. The accompanying statements of its December meeting were relatively dovish, although the Fed did highlight that, while it seemed that the peak policy rate had been reached, additional hikes could be delivered, if necessary.

In the first quarter of 2024, the Fed left rates unchanged, though Powell pushed back against exuberant market expectations of imminent rate cuts, saying that the central bank needed further confirmation of the disinflationary trend.

Against this backdrop, benchmark 10-year U.S. Treasury yields showed extreme volatility but, for the 12-month period review period overall, rose by over 70 bps.

In Europe, doggedly high inflation saw the European Central Bank (ECB) raise interest rates by 25 bps in both May and June 2023, with eurozone core inflation remaining well above the central bank's target of 2%. Economic news in the region was downbeat, as revised data showed that the eurozone had entered a technical recession.

The ECB opted for two 25-bp hikes at its July and September meetings, taking the deposit rate to 4.00%, a record high. After September's hike, the central bank stated that, whilst one more hike was possible in 2023, it considered its policy sufficiently restrictive to bring inflation back down to its 2% target, if maintained for long enough.

The ECB did, in fact, keep policy rates unchanged over the fourth quarter of 2023 but pushed back against investor expectations of imminent rate cuts. ECB President Lagarde indicated that policymakers had not discussed monetary policy easing yet, as they believed that price pressures might reaccelerate.

The ECB met twice during the first quarter of 2024 and held interest rates steady at their record highs both times. At its March meeting, the ECB released statements indicating its inflation and growth projections had been revised lower, but that the monetary authority would remain data dependent going forward.

# Q. How did we respond to these changing market conditions?

**A.** We increased our duration exposure of the Fund in line with its benchmark, as we approached the peak of the interest rate hiking cycle, with interest rate cuts beginning to be priced into markets.

We increased the overall duration of the Fund from 5.45 years (1.72 years short of the benchmark) to 6.88 years (0.11 years short of the benchmark). During the period under review, we moved from a small underweight to a small overweight stance in eurozone bonds and from a small underweight to a broadly neutral position in Chinese bonds.

In terms of local market allocation, we moved from overweight to neutral in the U.S. market and lowered the overweight exposure to the eurozone market. We also moved further underweight in the Canadian market. Conversely, we reduced the magnitude of the underweight allocations to the Chinese and Japanese markets. We also

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Schedule of Investments (SOI). The SOI begins on page 161.

raised the overweight stances in the U.K., Polish and Mexican markets.

Within currencies, we slightly reduced the moderate long positions in the euro and Chinese renminbi. In contrast, we moved from a neutral to a small long position in the Mexican peso.

## Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +3.76% based on market price and +4.04% based on net asset value (NAV). In comparison, the Fund's benchmark, the Bloomberg Global Aggregate ex-USD Index Hedged USD, which measures global investment-grade debt from 24 local currency markets, posted a +5.92% cumulative total return. You can find more of the Fund's performance data in the Performance Summary beginning on page 58.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

## Geographic Composition\*

Middle East & Africa	1.0%
Short-Term Investments & Other Net Assets	3.1%

<sup>\*</sup>Categories within the Other category are listed in full in the Fund's Schedule of Investments (SOI), which can be found later in this report.

#### **Portfolio Composition**

3/31/24

	% of Total Net Assets
Foreign Government and Agency Securities	93.4%
Corporate Bonds & Notes	3.5%
Short-Term Investments & Other Net Assets	3.1%

#### Q. What were the leading contributors to performance?

**A.** The Fund's currency positioning contributed most to relative performance over the period under review, helped largely by hedging effects, as well as exposures to both the euro and Japanese ven.

#### Q. What were the leading detractors from performance?

**A.** The Fund's local market allocation detracted most from relative results, particularly exposure to the Chinese market. Its sector allocation and security selection also proved detrimental to relative returns, notably positioning in government bonds. The Fund's duration and yield-curve positioning further weighed on relative performance, most of all in Mexican, eurozone, Canadian and Chinese bonds.

Thank you for your participation in Franklin International Aggregate Bond ETF. We look forward to serving your future investment needs.

## Total Annual Operating Expenses8

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. Gross expenses are the Fund's total annual operating expenses as of the Fund's prospectus available at the time of publication. Net expenses are capped under a contractual agreement, which cannot be terminated prior to 7/31/23 without Board consent. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and includes a prorated special distribution in the month it is paid. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of Fund performance.
- 6. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.
- 7. Source: FactSet. The Bloomberg Global Aggregate ex-USD Index Hedged USD measures global investment-grade debt from 24 local currency markets. This multicurrency benchmark is 100% hedged to the U.S. dollar and includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers. Bond issued in USD are excluded.
- 8. Figures as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

## **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

## Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

	Actual (actual return after expenses)		Hypothetical (5% annual return before expenses)		
Beginning	Ending	Expenses Paid During	Ending	Expenses Paid During	
Account Value 10/1/23	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Net Annualized Expense Ratio
\$1,000.00	\$1,051.10	\$1.28	\$1,023.75	\$1.26	0.25%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin Investment Grade Corporate ETF

This annual report for Franklin Investment Grade Corporate ETF covers the fiscal year ended March 31, 2024.

### **Fund Overview**

#### Q. What is the Fund's investment strategy?

A. The Fund seeks a high level of current income as is consistent with prudent investing, while seeking preservation of capital. Under normal market conditions, the Fund invests at least 80% of its net assets in investment grade corporate debt securities and investments. Investment grade debt securities are securities that are rated at the time of purchase in the top four ratings categories by one or more independent rating organizations such as S&P Global Ratings (S&P®) (rated BBB- or better) or Moody's Investors Service (Moody's) (rated Baa3 or higher) or, if unrated, are determined to be of comparable quality by the Fund's investment manager. Corporate issuers may include corporate or other business entities in which a sovereign or governmental agency or entity may have, indirectly or directly, an interest, including a majority or greater ownership interest. The Fund invests primarily in U.S. dollar denominated corporate debt securities issued by U.S. and foreign companies. The Fund may invest in debt securities of any maturity or duration. The Fund's focus on the credit quality of its portfolio is intended to reduce credit risk and help to preserve the Fund's capital.

# Q. What were the overall market conditions during the Fund's reporting period?

**A.** Fixed income markets experienced a high-volatility environment as yields changed rapidly in response to a developing macroeconomic landscape and changing global monetary policies. Inflation numbers in the U.S. continued to decline as supply chain disruptions improved. Market focus remained on central bank action as the U.S. Federal Reserve (Fed) continued their monetary policy tightening, raising the Fed funds rate at both their May and July 2023 meeting before pausing with their policy rate of 5.25%-5.50%. The Fed kept rates stable for the remainder of the period under review. With Fed funds rates appearing to reach their peak, market participants began to consider the number and speed

of potential rate cuts in 2024. As part of the Fed's Summary of Economic Projections (SEP) released at the March 2024 meeting, the median number of 2024 cuts was three. There was considerable volatility in the U.S. Treasury market with the benchmark 10-year trading between 3.31% to 4.99%, ending the first quarter 2024 at 4.20%. There also was great variability in investment-grade (IG) corporate bond spreads, reaching a high of 148 basis points (bps) in May 2023 before rallying much of the period, ending at 90 bps by the end of March 2024.

# Q. How did we respond to these changing market conditions?

A. During the period under review, we continued to adjust our exposures in the portfolio including duration positioning. Despite indications of slowing economic growth in the U.S., index level credit spreads, which ended the period close to 10-year tights, continued to grind tighter in a beta driven rally with lower-quality IG outperforming higher quality. Yields in the IG market remained attractive to us on an all-in basis due to increased shorter interest rates associated with the Fed tightening. This brought new money into the asset class causing valuations to be based on yields and not spread levels. We continued to look to both the primary and secondary markets to identify sectors and issues that provided strong risk/return characteristics.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +3.88% based on market price and +4.13% based on net asset value (NAV). In comparison, the Bloomberg U.S. Corporate Investment Grade Index, which measures the performance of the investment grade, fixed-rate, taxable corporate bond market, posted a +4.43% cumulative total return for the same period. You can find more of the Fund's performance data in the Performance Summary beginning on page 64.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from

#### Q. What were the leading contributors to performance?

A. Credit quality allocations helped returns for the period, as the portfolio was overweight BBB rated credits and underweight single A rated credits on a market value basis. Underweight exposure to the capital goods and consumer cyclical sectors contributed to relative results, as did an overweight to insurance-related issues. Positive returns from security selection were widespread with selection in the communications, technology, and consumer cyclical segments contributing the most.

## Q. What were the leading detractors from performance?

A. Modest exposure to UST and cash hurt returns as IG

corporate bonds outperformed over the period. Security selection in banking, electric utilities, finance companies, and real estate investment trusts curbed results for the period under review.

# Q. Were there any significant changes to the Fund during the reporting period?

**A.** Over the course of the year, we adjusted our duration exposure and sector allocations to take advantage of opportunities arising from high levels of volatility across the fixed income universe and in corporate credit markets.

Thank you for your participation in Franklin Investment Grade Corporate ETF. We look forward to serving your future investment needs.

# Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance tables and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (10/5/16), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

## **Distributions** (4/1/23-3/31/24)

Net Investment Income \$0.929958

### Total Annual Operating Expenses<sup>8</sup>

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. Distributions are not guaranteed and are subject to change. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and includes a prorated special distribution in the month it is paid. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of fund performance.
- 6. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.
- 7. Source: FactSet. The Bloomberg U.S. Corporate Investment Grade Index measures the performance of the investment grade, fixed-rate, taxable corporate bond market. It includes U.S. dollar-denominated securities publicly issued by U.S. and non-U.S. industrial, utility and financial issuers.
- 8. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

# **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

## Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

	Actual (actual return after expenses)		Hypothetical (5% annual return before expenses)		
Beginning	Ending	Expenses Paid During	Ending	Expenses Paid During	
Account Value 10/1/23	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Net Annualized Expense Ratio
\$1,000,00	\$1.076.80	\$1.82	\$1.023.25	\$1.77	0.35%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin Municipal Green Bond ETF

This annual report for Franklin Municipal Green Bond ETF covers the fiscal year ended March 31, 2024.

#### **Fund Overview**

### Q. What is the Fund's investment strategy?

**A.** The Fund seeks to maximize income exempt from federal income taxes to the extent consistent with prudent investing and the preservation of shareholders' capital. Under normal market conditions, the Fund invests at least 80% of its net assets in municipal securities whose interest is free from federal income taxes, including the federal alternative minimum tax. Although the Fund tries to invest all of its assets in tax-free securities, it is possible that up to 20% of the Fund's net assets may be invested in securities that pay interest that may be subject to the federal alternative minimum tax and, although not anticipated, in securities that pay interest subject to other federal or state income taxes.<sup>1</sup>

# Q. What were the overall market conditions during the Fund's reporting period?

A. The 12 months ended March 31, 2024, saw the U.S. Federal Reserve (Fed) turn more cautious in its monetary policy tightening campaign, in an effort to get inflation under control without tipping the economy into recession. The Fed delivered three 25-basis point hikes during the period, the last of which occurred in July 2023 and took the Fed funds target rate to a range of 5.25%-5.50%, a more than 20-year high. Since then, policymakers have maintained a restrictive stance, as the annual headline Consumer Price Index (CPI) declined from 6.0% for February 2023 to 3.2% in February 2024. At its most recent meeting (in March), the Fed still left the policy rate unchanged, and maintained its outlook for three rate cuts in 2024. Additionally, the Fed released updated economic projections, which indicated that policymakers expected the U.S. economy to grow by 2.1% this year, while inflation would continue to ease but still finish the year above its 2% target. Meanwhile, the U.S. economy remained robust, with real gross domestic product increasing at an annualized rate of 3.4% in the fourth guarter of 2023, underpinned by strong consumer spending.

The municipal (muni) bond market recorded positive total returns over the period under review, helped by a late-year rally in 2023, which was fueled by increased investor optimism that monetary policy tightening had come to an end. For most of the last 12 months, high levels of uncertainty kept fund flows into muni bond retail vehicles negative, though they did turn positive so far in 2024. Moreover, anecdotal feedback suggested that many asset allocators were retaining large cash and cash-equivalent balances, waiting to re-allocate funds to the sector.

# Q. How did we respond to these changing market conditions?

A. The past 12 months witnessed high levels of uncertainty. However, market volatility was largely interest-rate driven. Credit fundamentals have remained stable, with robust balance sheets that were supported by significant "rainy-day" funds which, in turn, were bolstered by federal COVID-19 aid, increased during the post-pandemic recovery, and maintained with conservative budgeting and fiscal discipline. Considering our view of the fundamental strength in the muni market, the Fund is consequently tilted toward lower-rated investment-grade issuers. Over the period, we looked for opportunities that had the potential to improve the overall yield of the portfolio and used our rigorous bottom-up research process to help us identify credits that represented good relative value, in our view.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +3.83% based on market price and +4.31% based on net asset value (NAV). In comparison, the Bloomberg Municipal Bond Index, which is a market value-weighted index of tax-exempt, investment-grade bonds with maturities of one year or more, posted a +3.13% cumulative total return for the same period. You can find more of the Fund's performance data in the Performance Summary beginning on page 70.

Important data provider notices and terms available at www.franklintempletondatasources.com.

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Schedule of Investments (SOI). The SOI begins on page 173.

<sup>1.</sup> Dividends are generally subject to state and local taxes, if any. For investors subject to alternative minimum tax, a small portion of Fund dividends may be taxable. Distributions of capital gains are generally taxable. To avoid imposition of 28% backup withholding on all Fund distributions and redemption proceeds, U.S. investors must be properly certified on Form W-9 and non-U.S. investors on Form W-8BEN

<sup>2.</sup> Source: Morningstar. Treasuries, if held to maturity, offer a fixed rate of return and a fixed principal value; their interest payments and principal are guaranteed. The index is unmanaged and includes reinvestment of any income or distributions. It does not reflect any fees, expenses or sales charges. One cannot invest directly in an index, and an index is not representative of the Fund's portfolio.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

### **Portfolio Composition**

3/31/24

% of Total Investments Industrial Development Revenue and Pollution Control 16.24% Utilities 14.49% Transportation 13.57% Lease 12.23% Housing 9.03% Special Tax 8.94% Cash 8.13% 6.33% Education 4.77% Local Health Care 4.34% Other 1.69% Refunded 0.14% State 0.10%

#### Q. What were the leading contributors to performance?

**A**. The Fund recorded robust positive returns over the 12 months under review, with its overall credit quality positioning and security selection boosting relative performance over the period. Particularly, overweight allocations to bonds with no external credit rating and BBB rated issues, as well as an underweight allocation to AAA rated securities added to annual returns. Security selection within AA rated bonds also lifted relative results.

#### Q. What were the leading detractors from performance?

**A.** The Fund's yield curve positioning modestly weighed on relative returns, driven by overweight exposure to muni bonds with 10 to 20 years to maturity.

# Q. Were there any significant changes to the Fund during the reporting period?

**A.** There were no significant changes to the Fund's overall strategy. However, as we gained more clarity around the Fed's monetary tightening path and became more comfortable that muni fundamentals were generally robust in the face of tighter financing conditions and slowing economic activity, the Fund reduced its holdings of investment-grade rated muni bonds and modestly increased its overweight to bonds with no external credit rating. The Franklin Templeton Fixed Income research team conducts an

in-depth analysis of potential investment opportunities and is therefore able to find what they deem to be attractively priced securities from muni issuers with solid underlying credit fundamentals that could weather a period of below-trend growth.

Thank you for your participation in Franklin Municipal Green Bond ETF. We look forward to serving your future investment needs.

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. Low-rated, high-yield bonds are subject to greater price volatility, illiquidity and possibility of default. Green bonds may not result in direct environmental benefits, and the issuer may not use proceeds as intended or to appropriate new or additional projects. The managers' environmental, social and governance (ESG) strategies may limit the types and number of investments available and, as a result, may forgo favorable market opportunities or underperform strategies that are not subject to such criteria. There is no guarantee that the strategy's ESG directives will be successful or will result in better performance. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Effective December 1, 2022, the Fund adopted a unified fee structure whereby Management has agreed to reimburse the Fund's acquired fund fees and expenses (if any) and pay all of the ordinary operating expenses of the Fund, excluding: (i) payments under the Fund's Rule 12b-1 plan (if any); (ii) brokerage expenses (including any costs incidental to transactions in portfolio securities or instruments); (iii) taxes; (iv) interest (including borrowing costs and dividend expenses on securities sold short and overdraft charges); (v) litigation expenses (including litigation to which the Trust or a Fund may be a party and indemnification of the Trustees and officers with respect thereto); and (vi) their non-routine or extraordinary expenses.
- 3. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 4. Assumes reinvestment of distributions based on net asset value.
- 5. Assumes reinvestment of distributions based on market price.
- 6. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and includes a prorated special distribution in the month it is paid. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of fund performance.
- 7. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.
- 8. Taxable equivalent yield assumes the 2024 maximum federal income tax rate of 37.00% plus 3.80% Medicare tax.
- 9. Source: FactSet. The Bloomberg Municipal Bond Index is a market value-weighted index of tax-exempt, investment-grade municipal bond with maturities of one year or more.
- 10. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

### **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

### Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

	Actual (actual return after expenses)		Hypothetical (5% annual return before expenses)		
Beginning	Ending	Expenses Paid During	Ending	Expenses Paid During	
Account Value 10/1/23	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Net Annualized Expense Ratio
\$1,000.00	\$1.088.50	\$1.57	\$1.023.50	\$1.52	0.30%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

## Franklin Senior Loan ETF

This annual report for Franklin Senior Loan ETF covers the fiscal year ended March 31, 2024.

#### **Fund Overview**

### Q. What is the Fund's investment strategy?

A. The Fund seeks to provide a high level of current income. A secondary goal is preservation of capital. Under normal market conditions, the Fund invests at least 80% of its net assets in senior loans and investments that provide exposure to senior loans. Senior loans include loans referred to as leveraged loans, bank loans and/or floating rate loans. The Fund invests predominantly in income-producing senior floating interest rate corporate loans made to or issued by U.S. companies, non-U.S. entities and U.S. subsidiaries of non-U.S. entities. Floating interest rates vary with and are periodically adjusted to a generally recognized base interest rate such as the Secured Overnight Financing Rate (SOFR) or the Prime Rate. The Fund may invest in companies whose financial condition is troubled or uncertain and that may be involved in bankruptcy proceedings, reorganizations or financial restructurings.

# Q. What were the overall market conditions during the Fund's reporting period?

A. Fixed income markets experienced a high-volatility environment as concerns over high levels of inflation and the U.S. Federal Reserve (Fed) policy response dominated the economic and market discussion. Yields changed rapidly in response to an evolving macroeconomic landscape and changing global monetary policies. Geopolitical risk remained an overhang to the market throughout the quarter as the war in Ukraine continued and a new conflict in the Middle East emerged, putting temporary pressure on global energy prices. Inflation, as reflected in the Consumer Price Index, moderated towards the end of 2023. While markets were unsettled, corporate fundamentals continued on a robust pace, which benefited the Fund's loan and bond holdings. The U.S. Fed paused its interest rate hikes at the September and subsequent meetings. Although 2024 began with financial market exuberance as investors anticipated imminent rate cuts from developed market central banks, sentiments turned cautious upon the end of the first quarter

as economic growth continued to be robust (especially in the U.S.) and price pressures persistent. March 2024's Fed Summary of Economic Projections continued to project three rate cuts for the year. Ten-year U.S. Treasury yields traded in a wide range, peaking at 5.0% in October before falling, ending March at 4.20%.

# Q. How did we respond to these changing market conditions?

A. Given our constructive view on credit, we have held onto names where we have high conviction, including issuers in cyclical industries that had declined in prior periods, but could see a recovery amid a soft-landing economic outlook. However, we have remained highly selective on lower-rated loans, including those that would be negatively impacted by persistent inflation and a longer period of higher interest rates. Our largest sells during the period included names that were expected to have weak interest coverage and tight liquidity. Our largest buys included higher-rated issuers in the aerospace sector that we expected would continue to benefit from a strong economic environment. We also modestly increased our exposure to high yield bonds, with a preference for short-dated maturities and higher quality issuers.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +12.07% based on market price and +11.80% based on net asset value (NAV). In comparison, the Fund's benchmark, the Morningstar LSTA U.S. Leveraged Loan 100 Index, which reflects the performance of the largest facilities in the leveraged loan market, posted a +12.16% cumulative total return for the same period. You can find more of the Fund's performance data in the Performance Summary beginning on page 76.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

chemical industry and underweight in the utility and cable/wireless segments contributed to relative performance. Our loan selection in automotive transportation, information technology and food/tobacco issuers benefited results. The Fund's underweight in Upper-Tier loans relative to the benchmark contributed to performance, as did overweights in Middle- and Lower-Tier loans relative to the benchmark.

### Q. What were the leading detractors from performance?

**A.** Our underweight in the housing and telecommunication industries and overweight in the service segment detracted from performance. Our loan selection in leisure and retail issuers hindered results.

Thank you for your participation in Franklin Senior Loan ETF. We look forward to serving your future investment needs.

The foregoing information reflects our analysis, opinions and portfolio holdings as of March 31, 2024, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

### Q. What were the leading contributors to performance?

A. During the performance period, our overweight in the

## Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance tables and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (6/1/18), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

### **Distributions** (4/1/23-3/31/24)

Net Investment Income \$2.085760

### Total Annual Operating Expenses<sup>8</sup>

0.45%	

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. Floating-rate loans and debt securities are typically rated below investment grade and are subject to greater risk of default, which could result in loss of principal. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. Liquidity risk exists when securities or other investments become more difficult to sell, or are unable to be sold, at the price at which they have been valued. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Distribution rate is based on an annualization of the March dividend and the NAV per share on 3/31/24.
- 6. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.
- 7. Source: FactSet. The Morningstar LSTA U.S. Leveraged Loan 100 Index reflects the performance of the largest facilities in the leveraged loan market. This rules-based index consists of the 100 largest loan facilities in the benchmark Morningstar LSTA Leveraged Loan Index.
- 8. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

### **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

### Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

	Actual (actual return after expenses)		Hypothetical (5% annual return before expenses)		
Beginning Account Value 10/1/23	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24¹	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24¹	Net Annualized Expense Ratio
\$1,000.00	\$1,054.00	\$2.31	\$1,022.75	\$2.28	0.45%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin Systematic Style Premia ETF

This annual report for Franklin Systematic Style Premia ETF covers the fiscal year ended March 31, 2024.

### **Fund Overview**

### Q. What is the Fund's investment strategy?

A. The Fund seeks to provide absolute return.

# Q. What were the overall market conditions during the Fund's reporting period?

**A.** Global equities advanced sharply during the 12 months ended March 31, 2024. While inflation remained elevated in most parts of the world, it moderated substantially, bolstering equities. A significant shift in the policies of most major central banks also supported stocks, as interest rate increases stopped early in the reporting period and investors began to anticipate future easing. While economic growth slowed in some countries, most of the world avoided recession, despite higher interest rates and borrowing costs. Equity performance varied notably by region, as the impact of changing economic conditions varied depending on local circumstances. In the U.S., the economy was strong, posting solid gross domestic product (GDP) growth in the final three quarters of 2023. The U.S. Federal Reserve (Fed) shifted from a tightening stance to a more neutral policy as the period continued and inflation decelerated. The Fed raised the federal funds target rate twice, ending the period at a range of 5.25%-5.50% and pushing borrowing costs to their highest levels since 2001. However, the Fed stopped raising rates following its July 2023 meeting, signaling that the post-pandemic tightening cycle was finished. In March 2024, Fed projections showed that its tightening cycle is set to reverse, with three interest rate cuts anticipated in 2024. Economic growth in the eurozone was tepid during the period, as higher interest rates, declining business confidence and stalled consumer spending weighed on the region. The European Central Bank (ECB) followed a similar path to the Fed, raising rates four times, then holding steady from September 2023 on. In early 2024, the ECB indicated that reductions were possible later in the year.

# Q. How did we respond to these changing market conditions?

**A.** We follow a quantitative process, and our internal signals led us to take a risk-on position for the majority of the 12-month period. This means that we guided risk in our portfolios towards the upper end of our target risk range. This benefited us since spreads in our long/short strategies worked well, for most part, with the exception of the macro rates futures strategy.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +14.04% based on market price and +12.79% based on net asset value (NAV). In comparison, the ICE BofA U.S. 3-Month Treasury Bill Index, which tracks the performance of short-term U.S. government securities with a remaining term to final maturity of less than three months, posted a +5.24% cumulative total return for the same period. You can find more of the Fund's performance data in the Performance Summary beginning on page 83.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to **franklintempleton.com** or call **(800) 342-5236.**

#### Q. What were the leading contributors to performance?

A. The long-short single stock equities strategy contributed during the period. As equity markets advanced, gains from long positioning were significantly larger than losses from short positioning. Within our long-short single stock equities component, our positive exposure to the Momentum factor was a key driver of gains, while the Value and Quality factors also aided performance. The portfolio had a net long exposure in capital terms, which contributed to performance. Commodities strategies contributed substantially, even as commodity prices broadly weakened across a volatile period. The Value, Carry and Momentum factors all aided performance. The macro equity index futures strategy also contributed, led in part by long positioning in indexes from Europe, driven by our Equity Carry strategy. Our FX forwards long/short strategy contributed modestly.

### Q. What were the leading detractors from performance?

**A.** Our only detractor during the past 12 months was our macro rates futures strategy where our spreads were negative with global rates rising across the board.

81

0.65%	

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Equity securities are subject to price fluctuation and possible loss of principal. The Fund is actively managed and could experience losses if the manager's judgment about particular investments, or its evaluation of the risks, potential returns and correlation properties of the various risk premia in which the Fund invests, prove to be incorrect. The allocation of assets among different strategies, asset classes and investments may not prove beneficial or produce the desired results. Trading models used by the manager for securities selection and asset allocation may become outdated, and the historical patterns upon which the models are based may weaken or disappear. Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. Currency management strategies could result in losses to the Fund if currencies do not perform as expected. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. Liquidity risk exists when securities or other investments become more difficult to sell, or are unable to be sold, at the price at which they have been valued. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. To the extent the portfolio invests in a concentration of certain securities, regions or industries, it is subject to increased volatility. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value. Total return information is based on net asset values calculated for shareholder transactions. Certain adjustments were made to the net assets of the Fund at 03/31/2024 for financial reporting purposes. Accordingly, adjusted total returns have been disclosed in the Financial Highlights and differ from those reported here.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

### **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

### Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		ctual after expenses)	, ,	hetical before expenses)	
Beginning Account Value 10/1/23	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24 <sup>1</sup>	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24 <sup>1</sup>	Net Annualized Expense Ratio
\$1,000.00	\$1,071.90	\$3.37	\$1,021.75	\$3.29	0.65%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

## Franklin U.S. Core Bond ETF

This annual report for Franklin U.S. Core Bond ETF covers the fiscal year ended March 31, 2024.

#### **Fund Overview**

### Q. What is the Fund's investment strategy?

**A.** The Fund seeks total return. Under normal market conditions, the Fund invests at least 80% of its net assets in bonds of U.S. issuers, including government, corporate debt, mortgage-backed and asset-backed securities. Bonds include debt obligations of any maturity, such as bonds, notes, bills and debentures.

# Q. What were the overall market conditions during the Fund's reporting period?

A. Fixed income markets experienced a high-volatility environment as yields changed rapidly in response to a developing macroeconomic landscape and changing global monetary policies. Inflation numbers in the U.S. continued to decline as supply chain disruptions improved. Market focus remained on central bank action as the U.S. Federal Reserve (Fed) continued their monetary policy tightening, raising the Fed funds rate at both their May and July 2023 meeting before pausing with their policy rate of 5.25%-5.50%. The Fed kept rates stable for the remainder of the period under review. Although the Fed acknowledged the progress restrictive monetary policy had on reducing inflation, they stated that they need to see substantial movement towards reducing inflation down to its 2.0% target rate. With Fed funds rates appearing to reach their peak, market participants began to consider the number and speed of potential rate cuts in 2024. As part of the Fed's Summary of Economic Projections (SEP) released at the March 2024 meeting, the median number of 2024 cuts was three, the same number as in the December 2023 SEP. There was considerable volatility in the U.S. Treasury market with the benchmark 10-year trading between 3.31% to 4.99%, ending the first quarter 2024 at a 4.20% yield. Towards the end of the period, there was a strong risk-on shift in the market driving fixed income spreads tighter in most sectors with some reaching 10-year lows.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Q. How did we respond to these changing market conditions?

A. For most of the year, the Fund was positioned with an underweight to duration versus the index. It was our view that persistent inflation would cause the Fed to keep rates higher for longer, putting pressure on UST yields.

Additionally, we focused our duration exposure on the front end of the yield curve as short-term rates reached multi-decade highs providing strong yields and income. The Fund increased its overweight to investment grade corporate credit with security selection being a key component. Agency mortgage-backed securities (MBS) were used as a tactical allocation and moved from an underweight allocation to slight overweight in the segment as spreads traded in a wide range over the period under review.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +1.74% based on market price and +1.69% based on net asset value (NAV). In comparison, the Bloomberg U.S. Aggregate Index, which measures the performance of the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market, posted a +1.70% cumulative total return. You can find more of the Fund's performance data in the Performance Summary beginning on page 89.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Schedule of Investments (SOI). The SOI begins on page 208.

<sup>1.</sup> Source: Morningstar. Treasuries, if held to maturity, offer a fixed rate of return and a fixed principal value; their interest payments and principal are guaranteed. The index is unmanaged and includes reinvestment of any income or distributions. It does not reflect any fees, expenses or sales charges. One cannot invest directly in an index, and an index is not representative of the Fund's portfolio.

### **Portfolio Composition**

U.S. Treasury Notes, 4.00%, 10/31/29	1.3%
Federal Home Loan Mortgage Corp., 2.00%, 3/01/51	1.3%

#### Q. What were the leading contributors to performance?

A. Duration positioning across the yield curve was a strong contributor to absolute returns for the year. The Fund benefited from strong interest rate carry from our credit spread products and exposure to investment-grade corporate bonds. We also saw accretive returns from our holdings of taxable municipal bonds and agency mortgage-backed securities (MBS). Security selection in sovereign emerging market debt and commercial MBS benefited performance.

#### Q. What were the leading detractors from performance?

**A.** Security selection within IG corporate bonds weighed on relative performance.

# Q. Were there any significant changes to the Fund during the reporting period?

**A.** Over the course of the year, we adjusted our duration exposure and sector allocations to take advantage of opportunities arising from high levels of volatility across the fixed income universe.

Thank you for your participation in Franklin U.S. Core Bond ETF. We look forward to serving your future investment needs.

Patrick Klein, Ph.D. Tina Chou Joshua Lohmeier, CFA

Portfolio Management Team

The foregoing information reflects our analysis, opinions and portfolio holdings as of March 31, 2024, the end of the reporting period. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

## Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance tables and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (9/19/19), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

90

## **Distributions** (4/1/23–3/31/24)

Net Investment Income \$0.759847

### Total Annual Operating Expenses<sup>8</sup>

0.15%	

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. Asset-backed, mortgage-backed or mortgage-related securities are subject to prepayment and extension risks. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and includes a prorated special distribution in the month it is paid. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of fund performance.
- 6. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.
- 7. Source: FactSet. The Bloomberg U.S. Aggregate Index measures the performance of the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities and commercial mortgage-backed securities (agency and nonagency).
- 8. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

### **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

### Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		ctual after expenses)	,,	hetical before expenses)

\$1,000.00	\$1,059.50	\$0.77	\$1,024.25	\$0.76	0.15%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin U.S. Low Volatility ETF

This annual report for Franklin U.S. Low Volatility ETF covers the fiscal year ended March 31, 2024. On February 29, 2024, the Board of Trustees of the Trust approved changes to the Fund's name and ticker symbol, investment goal, strategies and policies (including the Fund's 80% investment policy), primary benchmark index, and other related changes. Effective on or about May 31, 2024, the Fund will be renamed the Franklin Income Equity Focus ETF (Ticker: INCE). The Fund's investment goal will change to seek income and capital appreciation with an emphasis on lower volatility. The information below reflects the Fund's investment goal, strategies, policies, risks and the Fund's primary benchmark index that were in effect during the reporting period.

### **Fund Overview**

### Q. What is the Fund's investment strategy?

**A.** The Fund seeks capital appreciation with an emphasis on lower volatility. Under normal market conditions, the Fund invests at least 80% of its net assets in U.S. investments. The Fund invests primarily in equity securities (principally common stocks) of U.S. companies.

# Q. What were the overall market conditions during the Fund's reporting period?

A. U.S. equities fell for the 12-month period, with gains in the period's second half paring losses from the first half. Throughout the period, investor sentiment vacillated as to whether the U.S. Federal Reserve (Fed) can maneuver the U.S. economy into a soft landing while curtailing high inflation, or will it drive the economy into a recession. Financial market volatility surged in the second and third weeks of March as two mid-sized U.S. banks collapsed and a Swiss bank was forced into a merger. However, the Federal Deposit Insurance Corporation's backstop of deposits at the two U.S. firms and the Fed's emergency lending facility for banks calmed financial markets. In an effort to bring down inflation, the Fed raised the federal funds target rate eight times during the period to the highest level since 2007. On the economic front, the U.S. economy grew in 2022's second half after contracting in the first half. Meanwhile, manufacturing activity contracted in March for the fifth

consecutive month, while services activity expanded for the third successive month.

# Q. How did we respond to these changing market conditions?

**A.** U.S. equity markets rallied strongly during the period. The Fund responded by taking gains in appreciating common stocks and closely managing position sizes, given increasing valuations across U.S. equity markets.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +18.15% based on market price and +18.04% based on net asset value (NAV). In comparison, the Russell 1000® Index, which measures the performance of the approximately 1,000 largest companies in the Russell 3000® Index, which represents the majority of the U.S. market's total capitalization, posted a +29.87% cumulative total return for the same period. You can find more of the Fund's performance data in the Performance Summary beginning on page 96.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

The dollar value, number of shares or principal amount, and names of all portfolio holdings are listed in the Fund's Schedule of Investments (SOI). The SOI begins on page 219.

<sup>1.</sup> Source: Morningstar. Treasuries, if held to maturity, offer a fixed rate of return and a fixed principal value; their interest payments and principal are guaranteed. The index is unmanaged and includes reinvestment of any income or distributions. It does not reflect any fees, expenses or sales charges. Energy	4.1%
Materials	2.6%
Real Estate	2.6%

#### Top 10 Holdings

3/31/24

94

Company Sector/Industry	% of Total Net Assets
Vontier Corp. Information Technology	1.9%
Oracle Corp. Information Technology	1.8%
International Business Machines Corp.  Information Technology	1.8%
Amphenol Corp., Class A Information Technology	1.8%
ANSYS, Inc. Information Technology	1.8%
Microsoft Corp. Information Technology	1.7%
PTC, Inc. Information Technology	1.7%
Intuit, Inc. Information Technology	1.6%
Roper Technologies, Inc. Information Technology	1.6%
Texas Instruments, Inc. Information Technology	1.6%

### Q. What were the leading contributors to performance?

**A.** Information technology exposure, positions in Apple, Black Knight and Vontier contributed to relative performance. Though management reported solid free cash flow and expanding profit margins, shares of Apple recently moved lower on disappointing iPhone sales in China, its largest overseas market. Our underweight relative the benchmark index in Apple supported relative returns in this environment. Meanwhile, performance benefited from an overweight position in Black Knight Financial Services. Shares of the

provider of data and analytics for the mortgage and finance industries advanced as its acquisition by Intercontinental Exchange was completed during the period. Black Knight also reported double-digit growth in net revenue, year over year, as well as record adjusted operating income. A relative overweight position in Vontier was another contributor. Though investors had their concerns, namely the impact of electric vehicles (EV) and the U.S. Eurocard, Mastercard, Visa (EMV) payment standard on Vontier's growth prospects, the industrial technology company's recent financial results outperformed expectations, with an increase in revenue growth and free cash flow, along with raised guidance for 2024.

### Q. What were the leading detractors from performance?

**A.** The information technology sector's underperformance was due in part to stock selection, including a position in Microsoft. The enterprise software company released robust financial reports during the period, bolstered by growth in its cloud-based services and other artificial intelligence (AI) projects. Our underweight position in Microsoft relative to the benchmark detracted as a result. A lack of exposure to select benchmark names, among the semiconductor industry in particular, also pressured relative returns.

Stock selection in communication services hindered relative performance, with underperformance from Liberty Broadband. Liberty is a media holding company that includes a large investment in cable operator Charter Communications. New broadband subscriber trends for Charter tended to disappoint, and our overweight relative to the benchmark index in Liberty detracted as a result. Similarly, an overweight position in Telus had a negative impact on returns. During the period, the telecommunications company announced job cuts and restructuring plans to manage regulatory and competition headwinds. Telus, however, posted record subscriber growth in its latest quarter, along with increased free cash flow. Management also increased its quarterly dividend and operating revenue expectations for 2024.

Thank you for your participation in Franklin U.S. Low Volatility ETF. We look forward to serving your future investment needs.

Todd Brighton, CFA Portfolio Manager

### Total Annual Operating Expenses<sup>8</sup>

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Equity securities are subject to price fluctuation and possible loss of principal. Dividends may fluctuate and are not guaranteed, and a company may reduce or eliminate its dividend at any time. Investments in equity index-linked notes often have risks similar to their underlying securities, which could include management risk, market risk and, as applicable, foreign securities and currency risks. Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. To the extent the portfolio invests in a concentration of certain securities, regions or industries, it is subject to increased volatility. There can be no guarantee that the fund's volatility strategy will be successful, and achieve a positive or competitive return. The volatility strategy can also be expected to limit the fund's participation in market price appreciation when compared to similar funds that do not attempt this strategy. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. These and other risk considerations are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and includes a prorated special distribution in the month it is paid. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of fund performance.
- 6. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.
- 7. Source: FactSet. The Russell 1000® Index is market capitalization weighted and measures the performance of the approximately 1,000 largest companies in the Russell 3000® Index, which represents the majority of the U.S. market's total capitalization.
- 8. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

### **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

### Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		ctual after expenses)	,,	hetical before expenses)	
Beginning	Ending	Expenses Paid During	Ending	Expenses Paid During	
Account Value 10/1/23	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Account Value 3/31/24	Period 10/1/23–3/31/24 <sup>1</sup>	Net Annualized
\$1.000.00	\$1.164.50	\$1.57	\$1.023.55	\$1.47	Expense Ratio 0.29%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

# Franklin U.S. Treasury Bond ETF

This annual report for Franklin U.S. Treasury Bond ETF covers the fiscal year ended March 31, 2024.

### **Fund Overview**

### Q. What is the Fund's investment strategy?

**A.** The Fund seeks income. The Fund normally invests at least 80% of its net assets in direct obligations of the U.S. Treasury, including Treasury bonds, bills, notes and Treasury Inflation-Protection Securities (TIPS), and investments that provide exposure to direct obligations of the U.S. Treasury. The Fund may invest in U.S. Treasury securities of any maturity and intends to primarily focus on U.S. Treasury securities with a remaining maturity of between 1-30 years.

# Q. What were the overall market conditions during the Fund's reporting period?

**A.** Fixed income markets experienced a high-volatility environment as yields changed rapidly in response to a developing macroeconomic landscape and changing global monetary policies. Inflation numbers in the U.S. continued to decline as supply chain disruptions improved. Market focus remained on central bank action as the U.S. Federal Reserve (Fed) continued their monetary policy tightening raising the Fed funds rate at both their May and July 2023 meetings before pausing with their policy rate of 5.25%-5.50%. The Fed kept rates stable for the remainder of the period under review. Although the Fed acknowledged the progress restrictive monetary policy had on reducing inflation, they stated that they need to see substantial movement towards reducing inflation down to its 2.0% target rate. With Fed funds rates appearing to reach their peak, market participants began to consider the number and speed of potential rate cuts in 2024. As part of the Fed's Summary of Economic Projections (SEP) released at the March 2024 meeting, the median number of 2024 cuts was three, the same number as in the December 2023 SEP. There was considerable volatility in the U.S. Treasury market with the benchmark 10-year trading between 3.31% to 4.99% ending the first quarter 2024 at 4.20% yield.

# Q. How did we respond to these changing market conditions?

**A.** For most of the year, the Fund was positioned with an underweight to duration versus the index. It was our view that persistent inflation would cause the Fed to keep rates higher for longer, putting pressure on U.S. Treasury (UST) yields. Additionally, we focused our duration exposure on the front end of the yield curve as short-term rates reached multi-decade highs providing strong yields and income.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +0.01% based on market price and +0.01% based on net asset value (NAV). In comparison, the Bloomberg U.S. Treasury Index, which measures the performance of U.S. dollar-denominated, fixed-rate, nominal debt issued by the U.S. with at least one year until final maturity, posted a +0.05% cumulative total return. You can find more of the Fund's performance data in the Performance Summary beginning on page 102.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

-	

Q. What were the leading contributors to performance?

**A.** Overall duration positioning contributed to returns, led by our underweight to the 10-year portion of the yield curve throughout much of the period. A slight overweight to TIPS boosted relative results.

#### Q. What were the leading detractors from performance?

**A.** In contrast, our exposure to the longer end of the benchmark universe weighed on our results.

# Q. Were there any significant changes to the Fund during the reporting period?

**A.** The portfolio manager actively adjusted duration during the period. Through the first half 2023, the Fund was underweight duration versus the benchmark, but as UST yields began to rise, the portfolio manager moved the duration to neutral in the fourth quarter 2023. As yields moved even higher in 2024, the portfolio manager extended duration, moving to an overweight exposure by the end of the period under review.

Thank you for your participation in Franklin U.S. Treasury Bond ETF. We look forward to serving your future investment needs.

Warren Keyser Patrick Klein, Ph.D.

Portfolio Management Team

The foregoing information reflects our analysis, opinions and portfolio holdings as of March 31, 2024, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

## Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance tables and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (6/11/20), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

## Total Return Index Comparison for a Hypothetical \$10,000 Investment

Total return represents the change in value of an investment over the periods shown. It includes any applicable maximum sales charge, Fund expenses, account fees and reinvested distributions. The unmanaged index includes reinvestment of any income or distributions. It differs from the Fund in composition and does not pay management fees or expenses. One cannot invest directly in an index.

### 6/9/20-3/31/24

See page 104 for Performance Summary footnotes.

### **Distributions** (4/1/23-3/31/24)

Net Investment Income \$0.732846

### Total Annual Operating Expenses8

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and includes a prorated special distribution in the month it is paid. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of Fund performance.
- 6. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.
- 7. Source: FactSet. The Bloomberg U.S. Treasury Index measures the performance of U.S. dollar-denominated, fixed-rate, nominal debt issued by the U.S. Treasury with at least one year until final maturity. Treasuries, if held to maturity, offer a fixed rate of return and a fixed principal value; their interest payments and principal are guaranteed.
- 8. Figures as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

### **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

### Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		ctual after expenses)	,,	hetical before expenses)	
Beginning Account Value 10/1/23	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24 <sup>1</sup>	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23-3/31/241	Net Annualized Expense Ratio
\$1,000.00	\$1,044.10	\$0.46	\$1,024.55	\$0.46	0.09%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

## Franklin Ultra Short Bond ETF

This annual report for Franklin Ultra Short Bond ETF covers the fiscal year ended March 31, 2024.

### **Fund Overview**

### Q. What is the Fund's investment strategy?

**A.** The Fund seeks to provide a high level of current income as is consistent with prudent investing, while seeking preservation of capital. Under normal market conditions, the Fund invests at least 80% of its net assets in bonds and investments that provide exposure to bonds. Bonds include, but are not limited to, a variety of fixed and variable rate debt obligations, including government and corporate debt securities; money market instruments; mortgage- and asset backed securities; and municipal securities.

# Q. What were the overall market conditions during the Fund's reporting period?

A. Fixed income markets experienced a high-volatility environment as concerns over high levels of inflation and the U.S. Federal Reserve (Fed) policy response dominated the economic and market discussion. Yields changed rapidly in response to an evolving macroeconomic landscape and changing global monetary policies. Geopolitical risk remained an overhang to the market throughout the quarter as the war in Ukraine continued and a new conflict in the Middle East emerged, putting temporary pressure on global energy prices. Inflation, as reflected in the Consumer Price Index, moderated towards the end of 2023. While markets were unsettled, corporate fundamentals continued on a robust pace, which benefited the Fund's corporate holdings. The U.S. Fed paused its interest rate hikes at the September and subsequent meetings. Although 2024 began with financial market exuberance as investors anticipated imminent rate cuts from developed market central banks, sentiments turned cautious upon the end of first quarter as economic growth continued to be robust (especially in the U.S.) and price pressures persistent. March 2024's Fed Summary of Economic Projections continued to project three rate cuts for the year. Ten-year U.S. Treasury (UST) yields traded in a wide range, peaking at 5.0% in October before falling, ending March at 4.20%.

# Q. How did we respond to these changing market conditions?

**A.** During the fourth quarter, the Fed signaled that its hiking cycle was likely over, and they would consider rate cuts in 2024. With rate hikes off the table, we began shifting from floating-rate to fixed-rate corporate securities to help lock in attractive yield in anticipation of future rate cuts.

### Performance Overview

During the 12-month period, the Fund posted cumulative total returns of +6.24% based on market price and +6.41% based on net asset value (NAV). In comparison, the ICE BofA U.S. 3-Month Treasury Bill Index, which tracks the performance of short-term U.S. government securities with a remaining term to final maturity of less than three months, posted a +5.24% cumulative total return. You can find more of the Fund's performance data in the Performance Summary beginning on page 108.

Performance data represent past performance, which does not guarantee future results. Investment return and principal value will fluctuate, and you may have a gain or loss when you sell your shares. Current performance may differ from figures shown. For most recent month-end performance, go to franklintempleton.com or call (800) 342-5236.

Westpac Banking Corp., 5.35%, 10/18/24	2.7%
Charles Schwab Corp., 5.874%, 5/13/26	2.7%

Q. What were the leading contributors to performance?

**A.** Sector allocations outside of UST bills contributed to returns including investment-grade (IG) corporate holdings in banking, communications, insurance and consumer cyclicals. Additionally, our holdings of asset back securities (ABS) from credit card receivables benefited results, as did our real estate investment trust (REIT) holdings.

#### Q. What were the leading detractors from performance?

**A.** There weren't any material performance detractors from our IG corporate bond allocations. The Fund had a slightly shorter duration compared to the benchmark and our overweight allocation to cash and short-term investments slightly detracted from relative results.

Thank you for your participation in Franklin Ultra Short Bond ETF. We look forward to serving your future investment needs.

Shawn Lyons, CFA Thomas Runkel, CFA Kent Burns, CFA Johnson Ng, CFA

Portfolio Management Team

The foregoing information reflects our analysis, opinions and portfolio holdings as of March 31, 2024, the end of the reporting period. The way we implement our main investment strategies and the resulting portfolio holdings may change depending on factors such as market and economic conditions. These opinions may not be relied upon as investment advice or an offer for a particular security. The information is not a complete analysis of every aspect of any market, country, industry, security or the Fund. Statements of fact are from sources considered reliable, but the investment manager makes no representation or warranty as to their completeness or accuracy. Although historical performance is no guarantee of future results, these insights may help you understand our investment management philosophy.

## Performance Summary as of March 31, 2024

Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not include brokerage commissions that may be payable on secondary market transactions. The performance tables and graph do not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale or redemption of Fund shares.

Net asset value or "NAV" is the value of one share of a fund as calculated in accordance with the standard formula for valuing mutual fund shares. The price used to calculate market return (Market Price) is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which shares of a fund are listed for trading, as of the time that such fund's NAV is calculated. Since shares of the Fund did not trade in the secondary market until after the Fund's inception, for the period from inception to the first day of secondary trading (7/16/20), the NAV of the Fund is used as a proxy for the Market Price to calculate market returns. Market and NAV returns assume that dividends and capital gain distributions have been reinvested at Market Price and NAV.

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities.

Events such as the spread of deadly diseases, disasters, and financial, political or social disruptions, may heighten risks and adversely affect performance. The Fund is actively managed but there is no guarantee that the manager's investment decisions will produce the desired results.

All investments involve risks, including possible loss of principal. Changes in the credit rating of a bond, or in the credit rating or financial strength of a bond's issuer, insurer or guarantor, may affect the bond's value. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. The Fund should not be considered an alternative to money market funds or certificates of deposit (CDs). To the extent the portfolio invests in a concentration of certain securities, regions or industries, it is subject to increased volatility. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets.

Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on performance. The manager may consider environmental, social and governance (ESG) criteria in the research or investment process; however, ESG considerations may not be a determinative factor in security selection. In addition, the manager may not assess every investment for ESG criteria, and not every ESG factor may be identified or evaluated. These and other risks are discussed in the Fund's prospectus.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below their net asset value. Brokerage commissions and ETF expenses will reduce returns.

- 1. The total annual operating expenses are as of the Fund's prospectus available at the time of publication. Actual expenses may be higher and may impact portfolio returns.
- 2. Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated. Return for less than one year, if any, has not been annualized.
- 3. Assumes reinvestment of distributions based on net asset value.
- 4. Assumes reinvestment of distributions based on market price.
- 5. Distribution Rate is calculated by annualizing the most recent distribution amount paid, divided by the closing market price or NAV as of the date indicated. The Distribution Rate calculation includes income and return of capital, and includes a prorated special distribution in the month it is paid. The Distribution Rate is not guaranteed, subject to change, and is not a quotation of fund performance.
- 6. The Fund's 30-day standardized yield is calculated over a trailing 30-day period using the yield to maturity on bonds and/or the dividends accrued on stocks. It may not equal the Fund's actual income distribution rate, which reflects the Fund's past dividends paid to shareholders.
- 7. Source: FactSet. The ICE BofA U.S. 3-Month Treasury Bill Index tracks the performance of short-term U.S. government securities with a remaining term to final maturity of less than three months.
- 8. Figures are as stated in the Fund's current prospectus and may differ from the expense ratios disclosed in the Your Fund's Expenses and Financial Highlights sections in this report.

Important data provider notices and terms available at www.franklintempletondatasources.com.

# Your Fund's Expenses

As a Fund shareholder, you can incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of Fund shares; and (2) ongoing Fund costs, including management fees and other Fund expenses. All funds have ongoing costs, sometimes referred to as operating expenses. The table below shows ongoing costs of investing in the Fund and can help you understand these costs and compare them with those of other funds. The table assumes a \$1,000 investment held for the six months indicated.

### **Actual Fund Expenses**

The table below provides information about actual account values and actual expenses in the columns under the heading "Actual." In these columns the Fund's actual return, which includes the effect of Fund expenses, is used to calculate the "Ending Account Value." You can estimate the expenses you paid during the period by following these steps (of course, your account value and expenses will differ from those in this illustration): Divide your account value by \$1,000 (if your account had an \$8,600 value, then \$8,600 ÷ \$1,000 = 8.6). Then multiply the result by the number in the row under the headings "Actual" and "Expenses Paid During Period" (if Actual Expenses Paid During Period were \$7.50, then 8.6 × \$7.50 = \$64.50). In this illustration, the actual expenses paid this period are \$64.50.

#### Hypothetical Example for Comparison with Other Funds

Under the heading "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful in comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

	Actual (actual return after expenses)		Hypothetical (5% annual return before expenses)		
Beginning Account Value 10/1/23	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23–3/31/24 <sup>1</sup>	Ending Account Value 3/31/24	Expenses Paid During Period 10/1/23-3/31/241	Net Annualized Expense Ratio
\$1,000.00	\$1,032.20	\$0.20	\$1,024.80	\$0.20	0.04%

<sup>1.</sup> Expenses are equal to the annualized expense ratio for the six-month period as indicated above—in the far right column—multiplied by the simple average account value over the period indicated, and then multiplied by 183/366 to reflect the one-half year period.

<sup>&</sup>lt;sup>a</sup>For the period February 25, 2020 (commencement of operations) to March 31, 2020.

<sup>&</sup>lt;sup>b</sup>The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Creation Unit Fund shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

Based on average daily shares outstanding.

dTotal return is not annualized for periods less than one year. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period.

Ratios are annualized for periods less than one year.

Portfolio turnover rate includes portfolio transactions that are executed as a result of the Fund offering and redeeming Creation Units solely for cash ("Cash creations").

Portfolio turnover rate excluding cash creations was as follows:

12.69% 47.01% 89.79% 45.81% 0.94%

<sup>\*</sup>Effective after the market close on November 3, 2023, the Fund's predecessor mutual fund, Franklin Focused Growth Fund, reorganized into this Fund (the "Reorganization"). See Note 1 in the Notes to Financial Statements for additional information about the Reorganization.

<sup>†</sup>For the period October 1, 2023 through March 31, 2024.

<sup>&</sup>lt;sup>a</sup>The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases Creation Unit Fund shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

<sup>b</sup>Based on average daily shares outstanding.

Total return is not annualized for periods less than one year. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period.

dThe Fund adopted the performance of the predecessor mutual fund as the result of the Reorganization. Prior to the Reorganization, the Fund had not yet commenced operations. The returns shown for periods ending on or prior to November 3, 2023, are those of the predecessor mutual fund. The predecessor mutual fund's performance is represented by the performance of the predecessor mutual fund's Advisor Class Shares. Had the predecessor mutual fund been structured as an ETF, its performance may have differed.

eRatios are annualized for periods less than one year.

Benefit of expense reduction rounds to less than 0.01%.

Portfolio turnover rate includes portfolio transactions that are executed as a result of the Fund offering and redeeming Creation Units solely for cash ("Cash creations").

hPortfolio turnover rate excluding cash creations was as follows:

Net assets, end of year (000's)	\$9,826	\$10,641	\$14,799	\$15,140	\$2,258
Portfolio turnover ratef	19.19% <sup>9</sup>	32.63% <sup>g</sup>	61.43% <sup>g</sup>	46.58% <sup>g</sup>	2.20%9

<sup>&</sup>lt;sup>a</sup>For the period February 25, 2020 (commencement of operations) to March 31, 2020.

<sup>&</sup>lt;sup>b</sup>The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Creation Unit Fund shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

Based on average daily shares outstanding.

dTotal return is not annualized for periods less than one year. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period.

Ratios are annualized for periods less than one year.

Portfolio turnover rate includes portfolio transactions that are executed as a result of the Fund offering and redeeming Creation Units solely for cash ("Cash creations").

Portfolio turnover rate excluding cash creations was as follows:

18.18%

31.65%

59.54%

44.75%

2.20%

<sup>\*</sup>The principal amount is stated in U.S. dollars unless otherwise indicated.

aSecurity was purchased pursuant to Rule 144A under the Securities Act of 1933 and may be sold in transactions exempt from registration only to qualified institutional buyers or in a public offering registered under the Securities Act of 1933. At March 31, 2024, the value of was \$227,733,363, representing 84.6% of net assets.

<sup>&</sup>lt;sup>b</sup>Defaulted security or security for which income has been deemed uncollectible. See Note 7.

<sup>&</sup>lt;sup>c</sup>Fair valued using significant unobservable inputs. See Note 10 regarding fair value measurements.

dNon-income producing.
eVariable rate security. The rate shown represents the yield at period end.

<sup>&</sup>lt;sup>f</sup>The security was issued on a discount basis with no stated coupon rate.

## Financial Highlights

#### Franklin Income Focus ETF \*

	Period Ended March 31, 2024
Per share operating performance (for a share outstanding throughout the period)	
Net asset value, beginning of period	\$25.00
Income from investment operations <sup>a</sup> :	
Net investment income <sup>b</sup>	1.12
Net realized and unrealized gains (losses)	0.92
Total from investment operations	2.04
Less distributions from net investment income	(1.01)
Net asset value, end of period	\$26.03
Total return <sup>c</sup>	8.40%
Ratios to average net assets <sup>d</sup>	
Total expenses	0.38%
Net investment income	5.49%
Supplemental data	
Net assets, end of period (000's)	\$177,033
Portfolio turnover ratee	46.93% <sup>f</sup>

<sup>\*</sup>For the period June 06, 2023 (commencement of operations) to March 31, 2024.

<sup>&</sup>lt;sup>a</sup>The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Creation Unit Fund shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

bBased on average daily shares outstanding.

cTotal return is not annualized for periods less than one year. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period. dRatios are annualized for periods less than one year.

ePortfolio turnover rate includes portfolio transactions that are executed as a result of the Fund offering and redeeming Creation Units solely for cash ("Cash creations").

Portfolio turnover rate excluding cash creations was as follows:

46.93%

# Schedule of Investments, March 31, 2024

Portfolio turnover rateg	11.93% <sup>h</sup>	19.82% <sup>h</sup>	35.98% <sup>h</sup>	75.25% <sup>h</sup>	—%h	

<sup>&</sup>lt;sup>a</sup>For the period February 25, 2020 (commencement of operations) to March 31, 2020.

<sup>&</sup>lt;sup>b</sup>The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Creation Unit Fund shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

Based on average daily shares outstanding.

dAmount rounds to less than \$0.005 per share.

eTotal return is not annualized for periods less than one year. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period. Ratios are annualized for periods less than one year.

<sup>9</sup>Portfolio turnover rate includes portfolio transactions that are executed as a result of the Fund offering and redeeming Creation Units solely for cash ("Cash creations").

hPortfolio turnover rate excluding cash creations was as follows:

Net investment income	3.45%	2.57%	1.34%	1.50%	1.77%
Supplemental data					
Net assets, end of year (000's)	\$112,954	\$112,349	\$104,939	\$126,221	\$28,674
Portfolio turnover rate <sup>e</sup>	43.86% <sup>f</sup>	66.77% <sup>f</sup>	48.41% <sup>f</sup>	11.86% <sup>f</sup>	17.21% <sup>f</sup>

<sup>&</sup>lt;sup>a</sup>The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Creation Unit Fund shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

<sup>&</sup>lt;sup>b</sup>Based on average daily shares outstanding.

cTotal return is not annualized for periods less than one year. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period. dRatios are annualized for periods less than one year.

ePortfolio turnover rate includes portfolio transactions that are executed as a result of the Fund offering and redeeming Creation Units solely for cash ("Cash creations").

Portfolio turnover rate excluding cash creations was as follows:
43.86%
66.77%
48.41%
11.86%
17.21%

a Security was purchased pursuant to Rule 144A under the Securities Act of 1933 and may be sold in transactions exempt from registration only to qualified institutional buyers or in a public offering registered under the Securities Act of 1933. At March 31, 2024, the value of was \$4,054,570, representing 3.6% of net assets. bVariable rate security. The rate shown represents the yield at period end.

### Financial Highlights

#### Franklin Senior Loan ETF

	Year Ended March 31,					
	2024	2023	2022	2021	2020	
Per share operating performance (for a share outstanding throughout the year)						
Net asset value, beginning of year	\$23.83	\$24.70	\$24.83	\$22.85	\$24.85	
Income from investment operations <sup>a</sup> :						
Net investment income <sup>b</sup>	2.12	1.49	0.91	0.70	0.99	
Net realized and unrealized gains (losses)	0.56	(0.92)	(0.23)	1.99	(1.90)	
Total from investment operations	2.68	0.57	0.68	2.69	(0.91)	
Less distributions from net investment income	(2.09)	(1.44)	(0.81)	(0.71)	(1.09)	
Net asset value, end of year	\$24.42	\$23.83	\$24.70	\$24.83	\$22.85	
Total return <sup>c</sup>	11.80%	2.53%	2.76%	11.91%	(3.92)%	
Ratios to average net assets <sup>d</sup>						
Expenses before waiver and payments by affiliates	0.45%	0.45%	0.58%	0.92%	0.97%	
Expenses net of waiver and payments by affiliates	0.45%	0.45%	0.45%	0.45%	0.45%	
Net investment income	8.84%	6.28%	3.72%	2.88%	4.02%	
Supplemental data						
Net assets, end of year (000's)	\$328,487	\$206,120	\$292,722	\$201,101	\$54,833	
Portfolio turnover rate <sup>e</sup>	16.05% <sup>f</sup>	26.07% <sup>f</sup>	35.67% <sup>f</sup>	45.87% <sup>f</sup>	51.48% <sup>f</sup>	

<sup>&</sup>lt;sup>a</sup>The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Creation Unit Fund shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

bBased on average daily shares outstanding.

cTotal return is not annualized for periods less than one year. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period. dRatios are annualized for periods less than one year.

ePortfolio turnover rate includes portfolio transactions that are executed as a result of the Fund offering and redeeming Creation Units solely for cash ("Cash creations").

Portfolio turnover rate excluding cash creations was as follows:
16.05%
26.08%
35.67%
45.87%
51.48%

# Schedule of Investments, March 31, 2024

<sup>\*</sup>The principal amount is stated in U.S. dollars unless otherwise indicated.

<sup>†</sup>Rounds to less than 0.1% of net assets.

<sup>&</sup>lt;sup>a</sup>Security was purchased pursuant to Rule 144A under the Securities Act of 1933 and may be sold in transactions exempt from registration only to qualified institutional buyers or in a public offering registered under the Securities Act of 1933. At March 31, 2024, the value of was \$19,514,408, representing 5.9% of net assets.

<sup>&</sup>lt;sup>b</sup>Defaulted security or security for which income has been deemed uncollectible. See Note 7.

<sup>&</sup>lt;sup>c</sup>The coupon rate shown represents the rate at period end.

<sup>&</sup>lt;sup>d</sup>A portion or all of the security represents an unsettled loan commitment. The coupon rate is to-be determined (TBD) at the time of settlement and will be based upon a reference index/floor plus a spread.

eThe coupon rate shown represents the rate inclusive of any caps or floors, if applicable, in effect at period end.

The security was issued on a discount basis with no stated coupon rate.

Portfolio turnover ratef	180.11% <sup>g</sup>	188.38% <sup>g</sup>	189.89% <sup>g</sup>	171.16% <sup>g</sup>	60.95% <sup>g</sup>	

<sup>&</sup>lt;sup>a</sup>For the period December 18, 2019 (commencement of operations) to March 31, 2020.

<sup>&</sup>lt;sup>b</sup>The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Creation Unit Fund shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

Based on average daily shares outstanding.

dTotal return is not annualized for periods less than one year. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period.

Ratios are annualized for periods less than one year.

Portfolio turnover rate includes portfolio transactions that are executed as a result of the Fund offering and redeeming Creation Units solely for cash ("Cash creations").

Portfolio turnover rate excluding cash creations was as follows:

180.11%

189.38%

189.89%

171.16%

60.95%

Portfolio turnover ratef	37.74% <sup>g</sup>	68.70% <sup>g</sup>	69.88% <sup>g</sup>	90.99% <sup>g</sup>	126.68% <sup>g</sup>

<sup>&</sup>lt;sup>a</sup>For the period September 17, 2019 (commencement of operations) to March 31, 2020.

<sup>&</sup>lt;sup>b</sup>The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Creation Unit Fund shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

Based on average daily shares outstanding.

dTotal return is not annualized for periods less than one year. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period.

Ratios are annualized for periods less than one year.

Portfolio turnover rate includes portfolio transactions that are executed as a result of the Fund offering and redeeming Creation Units solely for cash ("Cash creations").

Portfolio turnover rate excluding cash creations was as follows:

37.74% 68.70% 69.88% 90.99% 126.68%

Supplemental data				
Net assets, end of year (000's)	\$3,733	\$2,458	\$3,682	\$2,488
Portfolio turnover ratef	38.70% <sup>g</sup>	48.71% <sup>g</sup>	24.71%9	10.49%9

<sup>&</sup>lt;sup>a</sup>For the period July 14, 2020 (commencement of operations) to March 31, 2021.

<sup>&</sup>lt;sup>b</sup>The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations for the period due to the timing of sales and repurchases of Creation Unit Fund shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

Based on average daily shares outstanding.

dTotal return is not annualized for periods less than one year. Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period.

Ratios are annualized for periods less than one year.

Portfolio turnover rate includes portfolio transactions that are executed as a result of the Fund offering and redeeming Creation Units solely for cash ("Cash creations").

Portfolio turnover rate excluding cash creations was as follows:

38.70%

48.71%

24.17%

10.49%

### Notes to Financial Statements

#### 1. Organization and Significant Accounting Policies

Franklin Templeton ETF Trust (Trust) is registered under the Investment Company Act of 1940 (1940 Act) as an open-end management investment company consisting of forty-nine separate funds, seventeen of which are included in this report (Funds). The Funds follow the accounting and reporting guidance in Financial Accounting Standards Board ("FASB") Accounting Standard Codification Topic 946, Financial Services - Investment Companies ("ASC 946"), and applies the specialized accounting and reporting guidance in U.S. Generally Accepted Accounting Principles (U.S. GAAP), including, but not limited to, ASC 946. The Funds are exchange traded funds (ETF) and are actively managed, thus they are not designed to track an index.

Effective June 6, 2023, the Trust began offering shares of Franklin Income Focus ETF. Each of the Funds are an exchange traded funds (ETF) and are actively managed, thus they are not designed to track an index.

The Franklin Focused Growth ETF adopted the performance of the Franklin Focused Growth Fund (the "predecessor mutual fund") as the result of a reorganization of the predecessor mutual fund into the fund (the "Reorganization") that was effective after the market close on November 3, 2023. Prior to the Reorganization, the Fund had not yet commenced operations. The returns shown for periods ended on or prior to November 3, 2023 are those of the predecessor mutual fund. The predecessor mutual fund's performance is represented by the performance of the predecessor mutual fund's Advisor Class Shares.

Prior to the Franklin Focused Growth ETF's listing on November 6, 2023, the NAV performance of the Advisor Class Shares of the predecessor mutual fund is used as a proxy for the Fund's market price returns. Had the predecessor mutual fund have been structured as an ETF, its performance may have differed.

State Street Bank and Trust Company, serves as the Funds' Custodian and Transfer Agent pursuant to a Global Custodial and Agency Services Agreement with the Trust. American Stock Transfer & Trust Company, LLC serves as stock transfer agent for the Acquiring Fund listed above. Prior to the Reorganizations, The JPM was the Custodian and Franklin Templeton Investor Services, LLC was the Transfer Agent for the Target Fund.

The following summarizes the Funds' significant accounting policies.

#### a. Financial Instrument Valuation

The Funds' investments in financial instruments are carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Funds calculates the net asset value (NAV) per share each business day as of 4 p.m. Eastern time or the regularly scheduled close of the New York Stock Exchange (NYSE), whichever is earlier. Under compliance policies and procedures approved by the Trust's Board of Trustees (the Board), the Board has designated the Fund's investment manager as the valuation designee and has responsibility for oversight of valuation. The investment manager is assisted by the Fund's administrator in performing this responsibility, including leading the cross-functional Valuation Committee (VC).

The Funds may utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value.

Equity securities and exchange traded funds listed on an exchange or on the NASDAQ National Market System are valued at the last quoted sale price or the official closing price of the day, respectively. Foreign equity securities are valued as of the close of trading on the foreign stock exchange on which the security is primarily traded or as of 4 p.m. Eastern time. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at 4 p.m. London time on the day that the value of the security is determined. Over-the-counter (OTC) securities are valued within the range of the most recent quoted bid and ask prices. Securities that trade in multiple markets or on multiple exchanges are valued according to the broadest and most representative market. Certain equity securities are valued based upon fundamental characteristics or relationships to similar securities.

Certain derivative financial instruments are centrally cleared or trade in the OTC market. The Funds pricing services use various techniques including industry standard option pricing models and proprietary discounted cash flow models to determine the fair value of those instruments. The Funds' net benefit or obligation under the derivative contract, as measured by the fair value of the contract, is included in net assets.

Debt securities generally trade in the over-the-counter (OTC) market rather than on a securities exchange. The Funds' pricing services use multiple valuation techniques to determine fair value. In instances where sufficient market

franklintempleton.com Annual Report 247

# 1. Organization and Significant Accounting Policies (continued)

#### a. Financial Instrument Valuation (continued)

activity exists, the pricing services may utilize a marketbased approach through which quotes from market makers are used to determine fair value. In instances where sufficient market activity may not exist or is limited, the pricing services also utilize proprietary valuation models which may consider market characteristics such as benchmark yield curves, credit spreads, estimated default rates, anticipated market interest rate volatility, coupon rates, anticipated timing of principal repayments, underlying collateral, and other unique security features in order to estimate the relevant cash flows, which are then discounted to calculate the fair value. Securities denominated in a foreign currency are converted into their U.S. dollar equivalent at the foreign exchange rate in effect at 4 p.m. Eastern time on the date that the values of the foreign debt securities are determined.

The Funds have procedures to determine the fair value of financial instruments for which market prices are not reliable or readily available. Under these procedures, the Funds primarily employ a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, As per standards minutes, and other relevant information for the investment to determine the fair value of the investment. An income-based valuation approach may also be used in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an active market existed.

Trading in securities on foreign securities stock exchanges and OTC markets may be completed before 4 p.m. Eastern time. In addition, trading in certain foreign markets may not take place on every Funds' business day. Occasionally, events occur between the time at which trading in a foreign security is completed and 4 p.m. Eastern time that might call into question the reliability of the value of a portfolio security held by the Fund. As a result, differences may arise between the value of the Funds' portfolio securities as determined at the foreign market close and the latest indications of value at 4 p.m. Eastern time. The VC monitors price movements for significant events following the close of trading in foreign stock markets through a series of country specific market

proxies (such as baskets of American Depositary Receipts, futures contracts and exchange traded funds). These price movements are measured against established trigger thresholds for each specific market proxy to assist in determining if an event has occurred that may call into question the reliability of the values of the foreign securities held by the Funds. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services.

When the last day of the reporting period is a non-business day, certain foreign markets may be open on those days that the Funds' NAV is not calculated, which could result in differences between the value of the Funds' portfolio securities on the last business day and the last calendar day of the reporting period. Any significant security valuation changes due to an open foreign market are adjusted and reflected by the Funds for financial reporting purposes.

#### b. Foreign Currency Translation

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. The Funds may enter into foreign currency exchange contracts to facilitate transactions denominated in a foreign currency. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Portfolio securities and assets and liabilities denominated in foreign currencies contain risks that those currencies will decline in value relative to the U.S. dollar. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Board.

The Funds does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments in the Statements of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and

248 Annual Report franklintempleton.com

# 1. Organization and Significant Accounting Policies (continued)

#### b. Foreign Currency Translation (continued)

losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

#### c. Derivative Financial Instruments

Certain or all Funds invested in derivative financial instruments in order to manage risk or gain exposure to various other investments or markets. Derivatives are financial contracts based on an underlying or notional amount, require no initial investment or an initial net investment that is smaller than would normally be required to have a similar response to changes in market factors, and require or permit net settlement. Derivatives contain various risks including the potential inability of the counterparty to fulfill their obligations under the terms of the contract, the potential for an illiquid secondary market, and/or the potential for market movements which expose the Fund to gains or losses in excess of the amounts shown in the Statement of Assets and Liabilities. Realized gain and loss and unrealized appreciation and depreciation on these contracts for the period are included in the Statement of Operations.

Derivative counterparty credit risk is managed through a formal evaluation of the creditworthiness of all potential counterparties. Certain or all Funds attempt to reduce their exposure to counterparty credit risk on OTC derivatives, whenever possible, by entering into International Swaps and Derivatives Association (ISDA) master agreements with certain counterparties. These agreements contain various provisions, including but not limited to collateral requirements, events of default, or early termination.

Termination events applicable to the counterparty include certain deteriorations in the credit quality of the counterparty. Termination events applicable to the Funds include failure of the Funds to maintain certain net asset levels and/or limit the decline in net assets over various periods of time. In the event of default or early termination, the ISDA master agreement gives the non-defaulting party the right to net and close-out all transactions traded, whether or not arising under the ISDA agreement, to one net amount payable by one counterparty to the other. Early termination by the counterparty may result in an immediate payment by the Funds of any net liability owed to that counterparty under the ISDA agreement.

Certain or all Funds entered into credit default swap contracts primarily to manage and/or gain exposure to credit risk. A credit default swap is an agreement between the Fund and a counterparty whereby the buyer of the contract receives credit protection and the seller of the contract guarantees the credit worthiness of a referenced debt obligation. These agreements may be privately negotiated in the over-the-counter market (OTC credit default swaps) or may be executed in a multilateral trade facility platform, such as a registered exchange (centrally cleared credit default swaps). The underlying referenced debt obligation may be a single issuer of corporate or sovereign debt, a credit index, a basket of issuers or indices, or a tranche of a credit index or basket of issuers or indices. In the event of a default of the underlying referenced debt obligation, the buyer is entitled to receive the notional amount of the credit default swap contract from the seller in exchange for the referenced debt obligation, a net settlement amount equal to the notional amount of the credit default swap less the recovery value of the referenced debt obligation, or other agreed upon amount. For centrally cleared credit default swaps, required initial margins are pledged by the Fund, and the daily change in fair value is accounted for as a variation margin payable or receivable. Over the term of the contract, the buyer pays the seller a periodic stream of payments, provided that no event of default has occurred. Such periodic payments are accrued daily as an unrealized appreciation or depreciation until the payments are made, at which time they are realized. Upfront payments and receipts are reflected in the Statements of Assets and Liabilities and represent compensating factors between stated terms of the credit default swap agreement and prevailing market conditions (credit spreads and other relevant factors). These upfront payments and receipts are amortized over the term of the contract as a realized gain or loss in the Statements of Operations.

Collateral requirements differ by type of derivative. Collateral terms are contract specific for OTC derivatives. For OTC derivatives traded under an ISDA master agreement, posting of collateral is required by either the Fund or the applicable counterparty if the total net exposure of all OTC derivatives with the applicable counterparty exceeds the minimum transfer amount, which typically ranges from \$100,000 to \$250,000, and can vary depending on the counterparty and the type of agreement. Generally, collateral is determined at the close of Fund business each day and any additional collateral required due to changes in derivative values may be delivered by the Fund or the counterparty the next business day, or within a few business days. Collateral

franklintempleton.com Annual Report 249

# 1. Organization and Significant Accounting Policies (continued)

#### c. Derivative Financial Instruments (continued)

pledged and/or received by the Fund, if any, is held in segregated accounts with the Fund's custodian/counterparty broker and can be in the form of cash and/or securities. Unrestricted cash may be invested according to the Funds' investment objectives. To the extent that the amounts due to the Fund from its counterparties are not subject to collateralization or are not fully collateralized, the Funds bears the risk of loss from counterparty non-performance.

Certain or all Funds entered into exchange traded futures contracts primarily to manage and/or gain exposure to equity price risk. A futures contract is an agreement between the Fund and a counterparty to buy or sell an asset at a specified price on a future date. Required initial margins are pledged by the Fund, and the daily change in fair value is accounted for as a variation margin payable or receivable in the Statements of Assets and Liabilities.

Certain or all Funds entered into OTC forward exchange contracts primarily to manage and/or gain exposure to certain foreign currencies. A forward exchange contract is an agreement between the Fund and a counterparty to buy or sell a foreign currency at a specific exchange rate on a future date.

The forward contract is marked-to-market daily and the change in value is recorded by the Funds as an unrealized gain or loss. When a forward foreign currency contract is closed, through either delivery or offset by entering into another forward foreign currency contract, the Funds recognize a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value of the contract at the time it is closed. Non-deliverable forward foreign currency exchange contracts are settled with the counterparty in cash without the delivery of foreign currency.

Certain or all Funds entered into OTC total return swap contracts primarily to manage and/or gain exposure to equity price risk of an underlying instrument such as a stock, bond, index or basket of securities or indices. A total return swap is an agreement between the Fund and a counterparty to exchange a return linked to an underlying instrument for a floating or fixed rate payment, both based upon a notional amount. Over the term of the contract, contractually required payments to be paid or received are accrued daily and recorded as unrealized appreciation or depreciation until the

payments are made, at which time they are recognized as realized gain or loss.

Certain or all Funds purchased or wrote option contracts primarily to manage and/or gain exposure to equity price risk. An option is a contract entitling the holder to purchase or sell a specific amount of shares or units of an asset or notional amount of a swap (swaption), at a specified price. When an option is purchased or written, an amount equal to the premium paid or received is recorded as an asset or liability, respectively. Upon exercise of an option, the acquisition cost or sales proceeds of the underlying investment is adjusted by any premium received or paid. Upon expiration of an option, any premium received or paid is recorded as a realized gain or loss. Upon closing an option other than through expiration or exercise, the difference between the premium received or paid and the cost to close the position is recorded as a realized gain or loss.

See Note 9 regarding other derivative information.

# d. Securities Purchased on a When-Issued and Delayed Delivery Basis

Certain or all Funds purchase securities on a when-issued and delayed delivery basis, with payment and delivery scheduled for a future date. These transactions are subject to market fluctuations and are subject to the risk that the value at delivery may be more or less than the trade date purchase price. Although the Funds will generally purchase these securities with the intention of holding the securities, they may sell the securities before the settlement date.

#### e. Senior Floating Rate Interests

Certain or all Funds invest in senior secured corporate loans that pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. These base lending rates are generally the prime rate offered by a designated U.S. bank, the Secured Overnight Financing Rate (SOFR) or the London Interbank Offered Rate (LIBOR). Senior secured corporate loans often require prepayment of principal from excess cash flows or at the discretion of the borrower. As a result, actual maturity may be substantially less than the stated maturity. Senior secured corporate loans in which the Funds invest are generally readily marketable, but may be subject to certain restrictions on resale.

#### f. Equity-Linked Securities

Certain or all Funds invest in equity-linked securities. Equity-linked securities are hybrid financial instruments that generally combine both debt and equity characteristics into a single note form. Income received from equity-linked

250 Annual Report franklintempleton.com

# 1. Organization and Significant Accounting Policies (continued)

#### f. Equity-Linked Securities (continued)

securities is recorded as realized gains in the Statements of Operations and may be based on the performance of an underlying equity security, an equity index, or an option position. The risks of investing in equity-linked securities include unfavorable price movements in the underlying security and the credit risk of the issuing financial institution. There may be no guarantee of a return of principal with equity-linked securities and the appreciation potential may be limited. Equity-linked securities may be more volatile and less liquid than other investments held by the Funds.

#### g. Income and Deferred Taxes

It is the Funds' policy to qualify as a regulated investment company under the Internal Revenue Code. The Funds intend to distribute to shareholders substantially all of its taxable income and net realized gains to relieve it from federal income and excise taxes. As a result, no provision for U.S. federal income taxes is required.

The Funds may be subject to foreign taxation related to income received, capital gains on the sale of securities and certain foreign currency transactions in the foreign jurisdictions in which the Funds invests. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Funds invest. When a capital gain tax is determined to apply, Funds records an estimated deferred tax liability in an amount that would be payable if the securities were disposed of on the valuation date.

Each Fund may recognize an income tax liability related to its uncertain tax positions under U.S. GAAP when the uncertain tax position has a less than 50% probability that it will be sustained upon examination by the tax authorities based on its technical merits. As of March 31, 2024, each Fund has determined that no tax liability is required in its financial statements related to uncertain tax positions for any open tax years (or expected to be taken in future tax years). Open tax years are those that remain subject to examination and are based on the statute of limitations in each jurisdiction in which the Funds invest.

# h. Security Transactions, Investment Income, Expenses and Distributions

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income (including interest income from payment-in-kind securities, if any) and estimated expenses are accrued daily. Amortization of premium and accretion of discount on debt securities are included in interest income. Certain or all Funds may receive other income from investments in senior secured corporate loans or unfunded commitments, including amendment fees, consent fees or commitment fees. These fees are recorded as income when received by the Funds. Dividend income and capital gain distributions are recorded on the ex-dividend date except for certain dividends from securities where the dividend rate is not available. In such cases, the dividend is recorded as soon as the information is received by the Funds. Distributions to shareholders are recorded on the ex-dividend date. Distributable earnings are determined according to income tax regulations (tax basis) and may differ from earnings recorded in accordance with U.S. GAAP. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

Common expenses incurred by the Trust are allocated among the Funds based on the ratio of net assets of each Funds to the combined net assets of the Trust. Certain Fund specific expenses are allocated directly to the Fund that incurred the expense. These expenses are paid by the Fund or by the investment manager, as applicable, according to the terms of the unified management fee agreement.

#### i. Insurance

The scheduled payments of interest and principal for each insured municipal security in the Trust are insured by either a new issue insurance policy or a secondary insurance policy. Some municipal securities in the Funds are secured by collateral guaranteed by an agency of the U.S. government. Depending on the type of coverage, premiums for insurance are either added the cost basis of the security or paid by a third party.

Insurance companies typically insure municipal bonds that tend to be of very high quality, with the majority of underlying municipal bonds rated A or better. However, an event involving an insurer could have an adverse effect on the value of the securities insured by that insurance company. There can be no assurance the insurer will be able to fulfill its obligations under the terms of the policy.

# 1. Organization and Significant Accounting Policies (continued)

#### j. Accounting Estimates

The preparation of financial statement in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Trust. Additionally, in the normal course of business, the Trust, on behalf of the Funds, enters into contracts with service providers that contain general indemnification clauses. The Trust's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Trust that have not yet occurred. Currently, the Trust expects the risk of loss to be remote.

liabilities arising out of the performance of their duties to the

#### k. Guarantees and Indemnifications

Under the Trust's organizational documents, its officers and trustees are indemnified by the Trust against certain

#### 2. Shares of Beneficial Interest

Shares of the Funds are issued and redeemed at their respective NAV only in aggregations of a specific number of shares or multiples thereof (Creation Units). Only certain large institutional investors (Authorized Participants) may engage in creation or redemption transactions directly with the Funds. Once created, shares of the Funds generally trade in the secondary market in amounts less than one Creation Unit. The market price of the Funds' shares will be based on the price in the secondary market which may be at, above or below the most recent NAV. Creation Units may be issued and redeemed in exchange for a designated portfolio of securities and/or cash (which may include cash in lieu of certain securities).

Authorized Participants pay a standard transaction fee to the shareholder servicing agent when purchasing or redeeming Creation Units of the Funds regardless of the number of Creation Units that are being created or redeemed on the same day by the Authorized Participant. The standard transaction fee is imposed to offset transfer and other transaction costs associated with the issuance and redemption of Creation Units and is not charged to or paid by the Funds.

In addition, for cash Creation Unit transactions, a variable fee for creation transactions and redemption transactions may be charged to the Authorized Participant to cover certain brokerage, tax, foreign exchange, execution, market impact and other costs and expenses related to the execution of trades. Variable fees, if any, are included in capital share transactions in the Statements of Changes in Net Assets.

At March 31, 2024, there were an unlimited number of shares authorized (without par value). Transactions in the Funds' shares were as follows:

<sup>&</sup>lt;sup>a</sup> Effective September 13, 2023, Class R6 was liquidated.
<sup>b</sup> Effective after the market close on November 3, 2024, the Fund's predecessor mutual fund, Franklin Focused Growth Fund, reorganized into this Fund (the "Reorganization"). The predecessor mutual fund's Advisor Class Shares' performance and financial history have been adopted by Franklin Focused Growth ETF and will be used going

forward. As a result, the information prior to the Reorganization reflects that of the predecessor mutual fund's Advisor Class Shares. Shares of the other classes of the predecessor mutual fund were converted into Advisor Class Shares as a part of the Reorganization. Such conversion of the other classes of shares into Advisor Class Shares is included under "Shares sold".

<sup>&</sup>lt;sup>d</sup> May include a portion of Class C shares that were automatically converted to Class A.

#### 3. Transactions with Affiliates

Franklin Resources, Inc. is the holding company for various subsidiaries that together are referred to as Franklin Templeton. Certain officers and trustees of the Funds are also officers and/or directors of the following subsidiaries:

Subsidiary	Affiliation
Franklin Advisers, Inc. (Advisers)	Investment manager
Franklin Templeton Institutional, LLC (FT Institutional)	Investment manager
Franklin Templeton Investimentos (Brasil) Ltda. (FTI Brasil)	Investment manager
Franklin Templeton Investment Management Limited (FTIML)	Investment manager
Franklin Templeton Investment Trust Management Co., Ltd. (FT Korea)	Investment manager
Franklin Templeton Investments (ME) Limited (FTIME)	Investment manager
Franklin Templeton Investments Corp. (FTIC)	Investment manager
Franklin Advisory Services, LLC (FASL)	Investment manager
Templeton Asset Management Ltd. (TAML)	Investment manager
Franklin Templeton Services, LLC (FT Services)	Administrative manager
Franklin Distributors, LLC (Distributors)	Principal underwriter

#### a. Management Fees

The Funds pay a unified management fee to Advisers whereby Advisers has agreed to reimburse the Funds' acquired fund fees and expenses (if any) and pay all of the ordinary operating expenses of the Funds, including custody, transfer agency, and Trustee fees and expenses, among others, but excluding payments under the Funds' Rule 12b-1 plan (if any), brokerage expenses (including any costs incidental to transactions in portfolio securities or instruments), taxes, interest (including borrowing costs and dividend expenses on securities sold short and overdraft charges), litigation expenses (including litigation to which the Trust or a Fund may be a party and indemnification of the Trustees and officers with respect thereto), and other non-routine or extraordinary expenses. The fee is calculated daily and paid monthly according to the terms of the management agreement.

With respect to Franklin Focused Growth ETF, for the period October 1, 2023 through November 3, 2023 the predecessor mutual fund paid an investment management fee to Advisers, the investment advisor to the predecessor fund based on the average daily net assets of the fund as follows:

Average Daily Net Assets	Annual Rate
Up to and including \$500 million	0.700%
Over \$500 million, up to and including \$1 billion	0.600%
Over \$1 billion, up to and including \$3 billion	0.550%
Over \$3 billion, up to and including \$5 billion	0.500%
In excess of \$5 billion	0.450%

Effective after the market close on November 3, 2023, pursuant to the investment management agreement with the Trust on behalf of the Fund, the Fund pays Advisers a unified management fee equal to the annual rate of 0.55% based on the average daily net assets of the Fund. Pursuant to the investment management agreement, Advisers reimburses the Fund for all acquired fund fees and expenses (if any) and pay all of the ordinary operating expenses of the Funds, including custody, transfer agency and Trustee fees and expenses, among others, but excluding payments under the Funds' Rule 12b-1 plan (if any), brokerage expenses (including any costs incidental to transactions in portfolio securities or instruments), taxes, interest (including borrowing costs and dividend expenses on securities sold short and overdraft charges), litigation expenses (including litigation to which the Trust or a Fund may be a party and indemnification of the Trustees and officers with respect thereto), and other non-routine or extraordinary expenses. The fee is calculated daily and paid monthly according to the terms of the management agreement.

#### 3. Transactions with Affiliates (continued)

#### a. Management Fees (continued)

The gross effective investment management fees are based on the average daily net assets of each of the Funds as follows:

	Gross Effective Investment Management Fee Rate
Franklin Disruptive Commerce ETF	0.50%
Franklin Dynamic Municipal Bond ETF	0.30%
Franklin Exponential Data ETF	0.50%
Franklin Focused Growth ETF	0.58%
Franklin Genomic Advancements ETF	0.50%
Franklin High Yield Corporate ETF	0.40%
Franklin Income Focus ETF	0.38%
Franklin Intelligent Machines ETF	0.50%
Franklin International Aggregate Bond ETF	0.25%
Franklin Investment Grade Corporate ETF	0.35%
Franklin Municipal Green Bond ETF	0.30%
Franklin Senior Loan ETF	0.45%
Franklin Systematic Style Premia ETF	0.65%
Franklin U.S. Core Bond ETF	0.15%
Franklin U.S. Low Volatility ETF	0.29%
Franklin U.S. Treasury Bond ETF	0.09%
Franklin Ultra Short Bond ETF	0.15%

#### b. Administrative Fees

Under an agreement with Advisers and FTIML, FT Services provides administrative services to the Funds. The fee is paid by Advisers and FTIML based on the Funds' average daily net assets, and is not an additional expense of the Funds.

#### c. Waiver and Expense Reimbursements

For Franklin Systematic Style Premia ETF, pursuant to the terms of the Fund's Investment Management Agreement, the investment manager reimburses the Fund for all acquired Fund fees as well as all expenses related to the Fund's investment in a Cayman Islands-based company that is wholly owned by the Fund (the "Subsidiary"). Thus, expenses incurred in connection with the Fund's investment in the Subsidiary are not separately disclosed because they are paid/reimbursed by the investment manager under the unitary management fee structure. Total expenses waived or paid are not subject to recapture subsequent to the Funds' fiscal year end.

#### d. Transfer Agent Fees

Each class of shares pays transfer agent fees, calculated monthly and paid monthly, to Investor Services for its performance of shareholder servicing obligations. Effective October 1, 2023, the fees are allocated to the Funds based upon relative assets and relative transactions. Prior to October 1, 2023, the fees were based on an annualized asset based fee of 0.016% plus a transaction based fee. In addition, each class reimburses Investor Services for out of pocket expenses incurred and, except for Class R6, reimburses shareholder servicing fees paid to third parties. These fees are accrued and allocated daily based upon their relative proportion of such classes' aggregate net assets. Class R6 pays Investor Services transfer agent fees allocated specifically to that class based upon its relative assets and relative transactions.

For the year ended March 31, 2024, the Funds paid transfer agent fees as noted in the Statements of Operations of which the following amounts were retained by Investor Services:

#### 3. Transactions with Affiliates (continued)

#### d. Transfer Agent Fees (continued)

	Franklin Focused	
	Gro	wth ETF
Transfer agent Fees	\$	4,137

#### e. Investments in Affiliated Management Investment Companies

Certain or all Funds invest in one or more affiliated management investment companies. As defined in the 1940 Act, an investment is deemed to be a "Controlled Affiliate" of a fund when a fund owns, either directly or indirectly, 25% or more of the affiliated fund's outstanding shares or has the power to exercise control over management or policies of such fund. The Funds do not invest for purposes of exercising a controlling influence over the management or policies. Management fees paid by the Funds are waived on assets invested in the affiliated management investment companies, as noted in the Statements of Operations, in an amount not to exceed the management and administrative fees paid directly or indirectly by each affiliate. During the year ended March 31, 2024, investments in affiliated management investment companies were as follows:

	Value at Beginning of Year	Purchases	Sales	Realized Gain (Loss)	Net Change in Unrealized Appreciation (Depreciation)	Value at End of Year	Number of Shares Held at End of Year	Investment Income

#### 6. Global Credit Facility

The Funds, together with other U.S. registered and foreign investment funds (collectively, Borrowers), managed by Franklin Templeton, are borrowers in a joint syndicated senior unsecured credit facility totaling \$2.675 billion (Global Credit Facility) which matures on January 31, 2025. This Global Credit Facility provides a source of funds to the Borrowers for temporary and emergency purposes, including the ability to meet future unanticipated or unusually large redemption requests.

Under the terms of the Global Credit Facility, the Funds could, in addition to interest charged on any borrowings made by the Funds and other costs incurred by the Funds, pay its/their share of fees and expenses incurred in connection with the implementation and maintenance of the Global Credit Facility, based upon their relative share of the aggregate net assets of

#### 6. Global Credit Facility (continued)

all of the Borrowers, including an annual commitment fee of 0.15% based upon the unused portion of the Global Credit Facility. During the year ended March 31, 2024, the Funds did not use the Global Credit Facility.

#### 7. Concentration of Risk

Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as fluctuating currency values and changing local, regional and global economic, political and social conditions, which may result in greater market volatility. Political and financial uncertainty in many foreign regions may increase market volatility and the economic risk of investing in foreign securities. In addition, certain foreign securities may not be as liquid as U.S. securities.

Certain investments in Chinese companies are made through a special structure known as a (VIE). In a VIE structure, foreign investors, such as Franklin Disruptive Commerce ETF & Franklin U.S. Core Bond ETF will only own stock in a shell company rather than directly in the VIE, which must be owned by Chinese nationals (and/or Chinese companies) to obtain the licenses and/or assets required to operate in a restricted or prohibited sector in China. The value of the shell company is derived from its ability to consolidate the VIE into its financials pursuant to contractual arrangements that allow the shell company to exert a degree of control over, and obtain economic benefits arising from, the VIE without formal legal ownership. While VIEs are a longstanding industry practice and are well known by Chinese officials and regulators, the structure historically has not been formally recognized under Chinese law and it is uncertain whether Chinese officials or regulators will withdraw their implicit acceptance of the structure. It is also uncertain whether the contractual arrangements, which may be subject to conflicts of interest between the legal owners of the VIE and foreign investors, would be enforced by Chinese courts or arbitration bodies. Prohibitions of these structures by the Chinese government, or the inability to enforce such contracts, from which the shell company derives its value, would likely cause the VIE-structured holding(s) to suffer significant, detrimental, and possibly permanent losses, and in turn, adversely affect the Funds' returns and net asset value.

#### 8. Credit Risk and Defaulted Securities

At March 31, 2024, Franklin Dynamic Municipal Bond ETF, Franklin Municipal Green Bond ETF, Franklin High Yield Corporate ETF, and Franklin Senior Loan ETF had 40.84%, 8.45%, 91.70%, and 88.07%, respectively, of their portfolio invested in high yield securities, senior secured floating rate notes, or other securities rated below investment grade and unrated securities, if any. These securities may be more sensitive to economic conditions causing greater price volatility and are potentially subject to a greater risk of loss due to default than higher rated securities.

The Fund may purchase the pre-default or defaulted debt of distressed companies. Distressed companies are financially troubled and could be or are already involved in financial restructuring or bankruptcy. Risks associated with purchasing these securities include the possibility that the bankruptcy or other restructuring process takes longer than expected, or that distributions in restructuring are less than anticipated, either or both of which may result in unfavorable consequences to the Fund. If it becomes probable that the income on debt securities, including those distressed companies, will not be collected, the Fund discontinues accruing income and recognizes an adjustment for uncollectible interest. At March 31, 2024, Franklin High Yield Corporate ETF, Franklin Dynamic Municipal Bond ETF and Franklin Senior Loan ETF the aggregate long value of distressed company securities for which interest recognition has been discontinued representing 0.12%, 0.00% and 0.18% of the Fund's net assets respectively. For information as to specific securities, see the accompanying Schedule of Investments.

#### 9. Other Derivative Information

At March 31, 2024, the Funds' investments in derivative contracts are reflected in the Statements of Asset and Liabilities as follows:

	Asset Derivatives		Liability Derivatives			
	Statements of Assets and Liabilities Location	Fair Value	Statements of Assets and Liabilities Location	Fair Value

See Note 1(c) regarding derivative financial instruments.

#### 10. Fair Value Measurements

The Funds follow a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Funds' own market assumptions (unobservable inputs). These inputs are used in determining the value of the Funds' financial instruments and are summarized in the following fair value hierarchy:

- Level 1 quoted prices in active markets for identical financial instruments
- Level 2 other significant observable inputs (including quoted prices for similar financial instruments, interest rates, prepayment speed, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Funds' own assumptions in determining the fair value of financial instruments)

The input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level.

A summary of inputs used as of March 31, 2024, in valuing the Funds' assets and liabilities carried at fair value, is as follows:

	Level 1	Level 2		Level 3	Total
Franklin Disruptive Commerce ETF

# 11. Investments in FLSP Holdings Corporation

Franklin Systematic Style Premia ETF, (the "Fund"), invests in certain financial instruments and commodities/or commodity-linked derivative investments. The FLSP Holdings Corporation is a Cayman Islands exempted company with limited liability, is a wholly-owned subsidiary of the Fund, and is able to invest in certain financial instruments and/or commodity-linked derivative investments consistent with the investment objective of the Fund. At March 31, 2024, the Franklin Systematic Style Premia ETF investment(s) FLSP Holdings Corporation is reflected in the Fund's Consolidated Schedule of Investments. At March 31, 2024, the net assets of the FLSP Holdings Corporation were \$6,098,399, representing 3.31% of the Fund's consolidated net assets. The Fund's investment(s) in the FLSP Holdings Corporation is limited to 25% of consolidated assets.

<sup>&</sup>lt;sup>b</sup>Includes common and preferred stocks, warrants, as well as other equity investments.

clncludes financial instruments determined to have no value.

#### 12. New Accounting Pronouncements

In March 2020, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2020-04, Reference Rate Reform (Topic 848) – Facilitation of the Effects of Reference Rate Reform on Financial Reporting. In January 2021 and December 2022, the FASB issued ASU No. 2021-01 and ASU No. 2022-06, with further amendments to Topic 848. The amendments in the ASUs provide optional temporary accounting recognition and financial reporting relief from the effect of certain types of contract modifications due to the planned discontinuation of the London Interbank Offered Rate (LIBOR) and other interbank-offered based reference rates as of the end of 2021 for certain LIBOR settings and 2023 for the remainder. The ASUs are effective for certain reference rate-related contract modifications that occur during the period March 12, 2020 through December 31, 2024. Management has reviewed the requirements and believes the adoption of these ASUs will not have a material impact on the financial statements.

#### 13. Subsequent Events

The Funds have evaluated subsequent events through the issuance of these Financial Statements and determined that no events have occurred that require disclosure other than those already disclosed in the financial statements, except for the following:

On February 29, 2024, the Board approved changes to Franklin U.S. Low Volatility ETF's (i) name and ticker symbol, (ii) investment goal, strategies and policies (including the Fund's 80% investment policy), (iii) primary benchmark index, and (iv) other related changes. Effective on or about May 31, 2024, the Fund will be renamed the Franklin Income Equity Focus ETF (Ticker: INCE). The Fund's investment goal will change to seek income and capital appreciation with an emphasis on lower volatility.

- <sup>(4)</sup> Consolidated statement of assets and liabilities, including the consolidated schedule of investments, as of March 31, 2024, the related consolidated statement of operations for the year ended March 31, 2024, the consolidated statements of changes in net assets for each of the two years in the period ended March 31, 2024 and the consolidated financial highlights for each of the four years in the period ended March 31, 2024 and for the period December 18, 2019 (commencement of operations) to March 31, 2020.

#### **Basis for Opinions**

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of March 31, 2024 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

PricewaterhouseCoopers LLP

San Francisco, California May 22, 2024

We have served as the auditor of one or more investment companies in the Franklin Templeton Group of Funds since 1948.

# Tax information (unaudited)

By mid-February, tax information related to a shareholder's proportionate share of distributions paid during the preceding calendar year will be received, if applicable. Please also refer to www.franklintempleton.com for per share tax information related to any distributions paid during the preceding calendar year. Shareholders are advised to consult with their tax advisors for further information on the treatment of these amounts on their tax returns.

The following tax information for the Funds is required to be furnished to shareholders with respect to the income earned and distributions paid during their fiscal year.

The Funds below hereby report the following amounts, or if subsequently determined to be different, the maximum allowable amounts, for the fiscal year ended March 31, 2024:

#### Principal Occupation During at Least the Past 5 Years:

Treasurer, U.S. Fund Administration & Reporting and officer of certain funds in the Franklin Templeton/Legg Mason fund complex.

Note 1: Officer information is current as of the date of this report. It is possible that after this date, information about officers may change.

- 1. Information is for the calendar year ended December 31, 2023, unless otherwise noted. We base the number of portfolios on each separate series of the U.S. registered investment companies within the Franklin Templeton fund complex. These portfolios have a common investment manager or affiliated investment managers.
- 2. Jennifer M. Johnson is considered to be an interested person of the Fund under the federal securities laws due to her position as an officer and director of Franklin Resources. Inc., which is the parent company of the Fund's investment manager and distributor.

The Sarbanes-Oxley Act of 2002 and Rules adopted by the Securities and Exchange Commission require the Fund to disclose whether the Fund's Audit Committee includes at least one member who is an audit committee financial expert within the meaning of such Act and Rules. The Fund's Board has determined that there is at least one such financial expert on the Audit Committee and has designated Rohit Bhagat and Deborah D. McWhinney as its audit committee financial experts. The Board believes that Mr. Bhagat and Ms. McWhinney qualify as such an expert in view of their extensive business background and experience, including extensive experience in the asset management and financial services industries. Mr. Bhagat has been a Member and Chairman of the Fund's Audit Committee since 2017. Ms. McWhinney has been a member of the Fund Audit Committee since 2020. As a result of such background and experience, the Board believes that Mr. Bhagat and Ms. McWhinney have acquired an understanding of generally accepted accounting principles and financial statements, the general application of such principles in connection with the accounting estimates, accruals and reserves, and analyzing and evaluating financial statements that presents a breadth and level of complexity of accounting issues generally comparable to those of the Fund, as well as an understanding of internal controls and procedures for financial reporting and an understanding of audit committee functions. Mr. Bhagat and Ms. McWhinney are independent Board members as that term is defined under the relevant Securities and Exchange Commission Rules and Releases.

\*Effective August 1, 2022, "Liberty" was removed from the name of the Fund.

At a meeting held on May 25, 2022 (Meeting), the Board of Trustees (Board) of Franklin Templeton ETF Trust (Trust), including a majority of the trustees who are not "interested persons" as defined in the Investment Company Act of 1940 (Independent Trustees), reviewed and approved the continuance of (i) the investment management agreement between Franklin Advisers, Inc. (FAV) and the Trust, on behalf of each Fund (except the Franklin International Aggregate Bond ETF); (ii) an investment management agreement between Franklin Templeton Investment Management Limited (FTIML) and the Trust, on behalf of the Franklin International Aggregate Bond ETF; (iii) an investment sub-advisory agreement between FAV and Franklin Templeton Institutional, LLC (FT Institutional), an affiliate of FAV, on behalf of each of the Franklin Investment Grade Corporate ETF and Franklin U.S. Treasury Bond ETF; and (iv) an investment sub-advisory agreement between FTIML and FAV, an affiliate of FTIML, on behalf of the Franklin International Aggregate Bond ETF (each a Management Agreement) for an additional one-year period. The Independent Trustees received advice from and met separately with Independent Trustee counsel in considering whether to approve the continuation of each Management Agreement. Although the Management Agreements for the

Funds were considered at the same Board meeting, the Board considered the information provided to it about the Funds together and with respect to each Fund separately as the Board deemed appropriate. FAV, FTIML and FT Institutional are each referred to herein as a Manager.

In considering the continuation of each Management Agreement, the Board reviewed and considered information provided by each Manager at the Meeting and throughout the year at meetings of the Board and its committees. The Board also reviewed and considered information provided in response to a detailed set of requests for information submitted to each Manager by Independent Trustee counsel on behalf of the Independent Trustees in connection with the annual contract renewal process. In addition, prior to the Meeting, the Independent Trustees held a virtual contract renewal meeting at which the Independent Trustees conferred amongst themselves and Independent Trustee counsel about contract renewal matters and subsequently, requested additional information from management that the Independent Trustees reviewed and considered at the Meeting. The Board reviewed and considered all of the factors it deemed relevant in approving the continuance of each Management Agreement, including, but not limited to: (i) the nature, extent and quality of the services provided by each Manager; (ii) the investment performance of each Fund; (iii) the costs of the services provided and profits realized by each Manager and its affiliates from the relationship with each Fund; (iv) the extent to which economies of scale are realized as each Fund grows; and (v) whether fee levels reflect these economies of scale for the benefit of Fund investors.

In approving the continuance of each Management Agreement, the Board, including a majority of the Independent Trustees, determined that the terms of each Management Agreement are fair and reasonable and that the continuance of such Management Agreement is in the best interests of the applicable Fund and its shareholders. While attention was given to all information furnished, the following discusses some primary factors relevant to the Board's determination.

#### Nature, Extent and Quality of Services

The Board reviewed and considered information regarding the nature, extent and quality of investment management services provided by each Manager and its affiliates to the Funds and their shareholders. This information included, among other things, the qualifications, background and experience of the senior management and investment personnel of each Manager; the structure of investment

personnel compensation; oversight of third-party service providers; investment performance reports and related financial information for each Fund; reports on expenses; legal and compliance matters; risk controls; pricing and other services provided by each Manager and its affiliates; and management fees charged by each Manager and its affiliates to US funds and other accounts, including management's explanation of differences among accounts where relevant. The Board acknowledged the ongoing integration of the Legg Mason family of funds into the Franklin Templeton (FT) family of funds and developing strategies to address areas of heightened concern in the registered fund industry, including various regulatory initiatives and recent geopolitical concerns. The Board also considered the investment management services that the Manager provides to the Cayman Islands-based company, which is wholly owned by the Franklin Systematic Style Premia ETF (Cayman Subsidiary).

The Board also reviewed and considered the benefits provided to Fund shareholders of investing in a fund that is part of the FT family of funds. The Board noted the financial position of Franklin Resources, Inc. (FRI), the Managers' parent, and its commitment to the registered fund business as evidenced by its continued introduction of new funds, reassessment of the fund offerings in response to the market environment and project initiatives and capital investments relating to the services provided to the Funds by the FT organization. The Board specifically noted FT's commitment to being a global leader in stewardship and sustainability and the recent addition of a senior executive focused on environmental, social and governance and climate control initiatives.

Following consideration of such information, the Board was satisfied with the nature, extent and quality of services provided by each Manager and its affiliates to the Funds and their shareholders.

#### **Fund Performance**

The Board reviewed and considered the performance results of each Fund for various time periods ended February 28, 2022. The Board considered the performance returns for each Fund in comparison to the performance returns of registered funds deemed comparable to the Fund included in a universe (Performance Universe) selected by Broadridge Financial Solutions, Inc. (Broadridge), an independent provider of investment company data. The Board received a description of the methodology used by Broadridge to select the registered funds included in a Performance Universe. The Board also reviewed and considered Fund performance

reports provided and discussions that occurred with portfolio managers at Board meetings throughout the year. The Board noted its ongoing discussions with management about the performance of the Funds to date, particularly as compared to peers, the importance of performance to asset growth and growth of market share, and the performance of the Funds in periods of volatility. In addition, the Board acknowledged information provided regarding management's strategy behind the overall product line up, the sources of asset growth, the nature of management's research, potential use of innovative data and technology, and investments in marketing and distribution. Finally, the Board noted management's high level of client engagement and the strength of its compliance program. A summary of each Fund's performance results is below.

Franklin Disruptive Commerce ETF, Franklin Exponential Data ETF and Franklin Genomic Advancements ETF - The Performance Universe for the Franklin Disruptive Commerce ETF included the Fund and all retail and institutional consumer services funds and exchange-traded funds. The Performance Universe for the Franklin Exponential Data ETF included the Fund and all retail and institutional science and technology funds and exchangetraded funds. The Performance Universe for the Franklin Genomic Advancements ETF included the Fund and all retail and institutional health/biotechnology funds and exchangetraded funds. The Franklin Disruptive Commerce ETF and the Franklin Genomic Advancements ETF commenced operations on February 25, 2020, and the Franklin Exponential Data ETF commenced operations on January 12, 2021, and thus have been in operation for less than three years. The Board noted that the Funds' annualized total returns for the one-year period were below the medians of their respective Performance Universes. The Board discussed this performance with management and management explained that the Performance Universe for each of the Franklin Disruptive Commerce ETF and the Franklin Genomic Advancements ETF was not directly comparable to the respective Fund. The Board concluded that, based on the foregoing and the short operating history of these two funds, each Fund's Management Agreement should be continued for an additional one-year period and management's efforts should continue to be closely monitored. The Board further concluded that, given the Franklin Exponential Data ETF's short operating history, the Board would need more time to evaluate the performance of the Fund.

<u>Franklin Dynamic Municipal Bond ETF and Franklin Senior</u> <u>Loan ETF - The Performance Universe for the Franklin</u>

Dynamic Municipal Bond ETF included the Fund and all retail and institutional intermediate municipal debt funds and exchange-traded funds. The Performance Universe for the Franklin Senior Loan ETF included the Fund and all retail and institutional loan participation funds and exchange-traded funds. The Franklin Dynamic Municipal Bond ETF commenced operations on August 31, 2017, and the Franklin Senior Loan ETF commenced operations on May 30, 2018, and thus have been in operation for less than five years. The Board noted that the Funds' annualized total returns for the one- and three-year periods were above the medians of their respective Performance Universes. The Board concluded that the Funds' performance was satisfactory.

Franklin Intelligent Machines ETF, Franklin Systematic Style Premia ETF and Franklin U.S. Treasury Bond ETF - The Performance Universe for the Franklin Intelligent Machines ETF included the Fund and all retail and institutional science and technology funds and exchangetraded funds. The Performance Universe for the Franklin Systematic Style Premia ETF included the Fund and all retail and institutional absolute-return funds and exchange-traded funds. The Performance Universe for the Franklin U.S. Treasury Bond ETF included the Fund and all retail and institutional general US Treasury funds and exchange-traded funds. The Franklin Intelligent Machines ETF commenced operations on February 25, 2020, the Franklin Systematic Style Premia ETF commenced operations on December 18, 2019 and the Franklin U.S. Treasury Bond ETF commenced operations on June 9, 2020, and thus have been in operation for less than three years. The Board noted that the Funds' annualized total returns for the one-year period were above the medians of their respective Performance Universes. The Board concluded that the Funds' performance was satisfactory.

Franklin Investment Grade Corporate ETF - The Performance Universe for the Fund included the Fund and all retail and institutional BBB-rated corporate debt funds and exchange-traded funds. The Fund commenced operations on October 3, 2016 and thus has been in operation for less than ten years. The Board noted that the Fund's annualized total return for the one-, three- and five-year periods was below the median of its Performance Universe. The Board discussed this performance with management and management explained that the Fund's relative underperformance in comparison to its Performance Universe was due, in part, to the Fund having less exposure to high yield securities than its peers, noting that high yield securities strongly outperformed investment grade bonds during the one-year period. Management further explained the steps

the portfolio management team is taking in an effort to improve the Fund's peer rankings. Based on the foregoing, the Board concluded that the Fund's Management Agreement should be continued for an additional one-year period, and that management's efforts should continue to be closely monitored.

Franklin High Yield Corporate ETF and Franklin Municipal Green Bond ETF - The Performance Universe for the Franklin High Yield Corporate ETF included the Fund and all retail and institutional high yield funds and exchange-traded funds. The Performance Universe for the Franklin Municipal Green Bond ETF included the Fund and all retail and institutional general and insured municipal debt funds and exchange-traded funds. The Franklin High Yield Corporate ETF commenced operations on May 30, 2018, and the Franklin Municipal Green Bond ETF commenced operations on August 31, 2017, and thus have been in operation for less than five years. The Board noted that Funds' annualized total returns for the for the one-year period were below the medians of their respective Performance Universes, but the Funds' annualized total returns for the three-year period were above the medians and in the first (best) or second quintiles of their respective Performance Universes. The Board also noted the short operating history of each Fund and that each Fund had an annualized total return that exceeded 4.45% for the three-year period. The Board concluded that each Fund's performance was acceptable.

Franklin International Aggregate Bond ETF - The Performance Universe for the Fund included the Fund and all retail and institutional international income funds and exchange-traded funds. The Fund commenced operations on May 30, 2018 and thus has been in operation for less than five years. The Board noted that the annualized total return the Fund for the one-year period was above the median of its Performance Universe, but its annualized total return for the three-year period was below its Performance Universe. The Board concluded that the Fund's performance was satisfactory.

<u>Franklin U.S. Low Volatility ETF</u> - The Performance Universe for the Fund included the Fund and all retail and institutional large-cap core funds and exchange-traded funds. The Fund commenced operations on September 20, 2016 and thus has been in operation for less than ten years. The Board noted that the Fund's annualized total return for the one-year period was above the median of its Performance Universe, but its annualized total return for the three- and five-year periods was below the median of its Performance Universe.

The Board noted that, while the Fund's annualized total return for the three- and five-year periods was below median, it was 14.55% and 13.77%, respectively. The Board concluded that the Fund's performance was satisfactory.

Franklin U.S. Core Bond ETF and Franklin Ultra Short Bond ETF - The Performance Universe for the Franklin U.S. Core Bond ETF included the Fund and all retail and institutional core bond funds and exchange-traded funds. The Performance Universe for the Franklin Ultra Short Bond ETF included the Fund and all retail and institutional ultra-short obligation funds and exchange-traded funds. The Franklin U.S. Core Bond ETF Fund commenced operations on September 17, 2019 and the Franklin Ultra Short Bond ETF commenced operations on July 14, 2020, and thus have been in operation for less than three years. The Board noted that the Funds' annualized total returns for the one-year period were below the medians of their respective Performance Universes. The Board concluded that, given each Fund's short operating history, the Board would need additional time to evaluate the performance of the Fund.

#### **Comparative Fees and Expenses**

The Board reviewed and considered information regarding each Fund's actual total expense ratio and its various components, including, as applicable, management fees; transfer agent expenses; underlying fund expenses; Rule 12b-1 and non-Rule 12b-1 service fees: and other non-management fees. The Board considered the actual total expense ratio and, separately, the contractual management fee rate, without the effect of fee waivers, if any (Management Rate) of each Fund in comparison to the median expense ratio and median Management Rate, respectively, of other exchange-traded funds deemed comparable to and with a similar expense structure to the Fund selected by Broadridge (Expense Group). Broadridge fee and expense data is based upon information taken from each fund's most recent annual or semi-annual report, which reflects historical asset levels that may be quite different from those currently existing, particularly in a period of market volatility. While recognizing such inherent limitation and the fact that expense ratios and Management Rates generally increase as assets decline and decrease as assets grow, the Board believed the independent analysis conducted by Broadridge to be an appropriate measure of comparative fees and expenses. The Broadridge Management Rate includes administrative charges. The Board received a description of the methodology used by Broadridge to select the exchange-traded funds included in an Expense Group.

Franklin Disruptive Commerce ETF - The Expense Group for the Fund was comprised of actively managed exchangetraded funds, which included the Fund, two other consumer services funds, and one financial services fund. The Board noted that the Management Rate and the actual total expense ratio for the Fund were below the medians of its Expense Group. The Board also noted the small size of the Fund's Expense Group. The Board further noted that effective October 1, 2021, the Fund implemented a unified management fee (Unified Fee). The Board also noted that pursuant to the Unified Fee arrangement the Manager reimburses the Fund for all of its acquired fund fees and expenses (if any) and pays all of the ordinary operating expenses of the Fund, except for (i) the Fund's Unified Fee, (ii) payments under the Fund's Rule 12b-1 plan (if any), (iii) brokerage expenses, (iv) taxes, (v) interest (including borrowing costs and dividend expenses on securities sold short and overdraft charges), (vi) litigation expenses (including litigation to which the Trust or the Fund may be a party and indemnification of the Trustees and officers with respect thereto), and (vii) other non-routine or extraordinary expenses (Unified Fee Arrangement). The Board concluded that the Management Rate charged to the Fund is reasonable.

Franklin Exponential Data ETF, Franklin Genomic Advancements ETF, Franklin Intelligent Machines ETF, Franklin International Aggregate Bond ETF, Franklin Senior Loan ETF, Franklin Systematic Style Premia ETF, Franklin Ultra Short Bond ETF, Franklin U.S. Core Bond ETF and Franklin U.S. Treasury Bond ETF - The Expense Group for the Franklin Exponential Data ETF was comprised of actively managed exchange-traded funds, which included the Fund, four other science and technology funds, two global science/technology funds, and one financial services fund. The Expense Group for the Franklin Genomic Advancements ETF was comprised of actively managed exchangetraded funds, which included the Fund, one other health/biotechnology fund, and three science and technology funds. The Expense Group for the Franklin Intelligent Machines ETF was comprised of actively managed exchange-traded funds, which included the Fund and four other science and technology funds. The Expense Group for the Franklin International Aggregate Bond ETF was comprised of actively managed exchange-traded funds, which included the Fund, one other international income fund, and four emerging markets hard currency debt funds. The Expense Group for the Franklin Senior Loan ETF was comprised of actively managed exchange-traded funds, which included the Fund and six other loan participation

funds. The Expense Group for the Franklin Systematic Style Premia ETF was comprised of actively managed exchange-traded funds, which included the Fund, two other absolute-return funds, four alternative long/short equity funds, and one alternative multi-strategy fund. The Expense Group for the Franklin Ultra Short Bond ETF was comprised of pure index exchange-traded funds, which included the Fund and nine other ultra-short obligation funds. The Expense Group for the Franklin U.S. Core Bond ETF was comprised of actively managed exchange-traded funds, which included the Fund, three other core bond funds, and five short investment-grade debt funds. The Expense Group for the Franklin U.S. Treasury Bond ETF was comprised of actively managed exchange-traded funds, which included the Fund and eight general US government funds. The Board noted that the Management Rates and actual total expense ratios for the Funds were below the medians of their respective Expense Groups. The Board also noted the small size of the Franklin Genomic Advancements ETF's, the Franklin Intelligent Machines ETF's, the Franklin International Aggregate Bond ETF's, Franklin Senior Loan ETF's and the Franklin Systematic Style Premia ETF's Expense Groups. The Board further noted that effective October 1, 2021, the Funds implemented a Unified Fee. The Board also noted the terms of the Unified Fee Arrangement. The Board further noted that FAV is paid by FTIML out of the management fee FTIML receives from the Franklin International Aggregate Bond ETF and that the allocation of the fee between FTIML and FAV reflected the services provided by each to the Fund. The Board also noted that FT Institutional is paid by FAV out of the management fee FAV receives from the Franklin U.S. Treasury Bond ETF and that the allocation of the fee between FAV and FT Institutional reflected the services provided by each to the Fund. The Board concluded that the Management Rate charged to each Fund and the sub-advisory fee paid to each of FAV and FT Institutional are reasonable.

Franklin Dynamic Municipal Bond ETF and Franklin Municipal Green Bond ETF - The Expense Group for the Franklin Dynamic Municipal Bond ETF was comprised of actively managed exchange-traded funds, which included the Fund and five other intermediate municipal debt funds. The Expense Group for the Franklin Municipal Green Bond ETF was comprised of actively managed exchange-traded funds, which included the Fund and four other general and insured municipal debt funds. The Board noted that the Management Rate for the Funds was above the medians of their respective Expense Groups, but the actual total expense ratio was equal to the medians of their respective Expense

Groups. The Board also noted the small size of the Funds' Expense Groups and that the Funds' actual total expense ratio reflected an expense cap from management. The Board concluded that the Management Rates charged to the Funds are reasonable.

Franklin Investment Grade Corporate ETF - The Expense Group for the Fund was comprised of actively managed exchange-traded funds, which included the Fund and three other BBB-rated corporate debt funds. The Board noted that the Management Rate for the Fund was approximately 1.6 basis points above the median of its Expense Group, but its actual total expense ratio was below the median of its Expense Group. The Board also noted the small size of the Expense Group. The Board further noted that effective October 1, 2021, the Fund implemented a Unified Fee. The Board also noted the terms of the Unified Fee Arrangement. The Board also noted that FT Institutional is paid by FAV out of the management fee FAV receives from the Fund and that the allocation of the fee between FAV and FT Institutional reflected the services provided by each to the Fund. The Board concluded that the Management Rate charged to the Fund and the sub-advisory fee paid to FT Institutional are reasonable.

Franklin High Yield Corporate ETF - The Expense Group for the Fund was comprised of actively managed exchange-traded funds, which included the Fund and eight other high yield funds. The Board noted that the Management Rate for the Fund was equal to the median of its Expense Group, but its actual total expense ratio was below the median of its Expense Group. The Board further noted that effective October 1, 2021, the Fund implemented a Unified Fee. The Board also noted the terms of the Unified Fee Arrangement. The Board concluded that the Management Rate charged to the Fund is reasonable.

Franklin U.S. Low Volatility ETF - The Expense Group for the Fund was comprised of actively managed exchange-traded funds, which included the Fund, one other large-cap core fund, one large-cap value fund, and two multi-cap value funds. The Board noted that the Management Rate for the Fund was below the median of its Expense Group, but its actual expense ratio was equal to the median of its Expense Group. The Board also noted the small size of the Expense Group. The Board further noted that effective October 1, 2021, the Fund implemented a Unified Fee. The Board also noted the terms of the Unified Fee Arrangement. The Board concluded that the Management Rate charged to the Fund is reasonable.

#### **Profitability**

The Board reviewed and considered information regarding the profits realized by each Manager and its affiliates in connection with the operation of each Fund. In this respect, the Board considered the Fund profitability analysis that addresses the overall profitability of FT's US fund business, as well as its profits in providing investment management and other services to each of the individual funds during the 12-month period ended September 30, 2021, being the most recent fiscal year-end for FRI. The Board noted that although management continually makes refinements to its methodologies used in calculating profitability in response to organizational and product-related changes, the overall methodology has remained consistent with that used in the Funds' profitability report presentations from prior years. The Board also noted that PricewaterhouseCoopers LLP, auditor to FRI and certain FT funds, has been engaged to periodically review and assess the allocation methodologies to be used solely by the Funds' Board with respect to the profitability analysis.

The Board noted management's belief that costs incurred in establishing the infrastructure necessary for the type of fund operations conducted by each Manager and its affiliates may not be fully reflected in the expenses allocated to each Fund in determining its profitability, as well as the fact that the level of profits, to a certain extent, reflected operational cost savings and efficiencies initiated by management. As part of this evaluation, the Board considered management's outsourcing of certain operations, which effort has required considerable up-front expenditures but, over the long run, is expected to result in greater efficiencies. The Board also noted management's expenditures in improving shareholder services provided to the Funds, as well as the need to implement systems and meet additional regulatory and compliance requirements resulting from recent US Securities and Exchange Commission and other regulatory requirements.

The Board also considered the extent to which each Manager and its affiliates might derive ancillary benefits from fund operations, including potential benefits resulting from personnel and systems enhancements necessitated by fund growth, as well as increased leverage with service providers and counterparties. Based upon its consideration of all these factors, the Board concluded that the level of profits realized by each Manager and its affiliates from providing services to each Fund was not excessive in view of the nature, extent and quality of services provided to each Fund.

#### **Economies of Scale**

The Board reviewed and considered the extent to which each Manager may realize economies of scale, if any, as each Fund grows larger and whether each Fund's management fee structure reflects any economies of scale for the benefit of shareholders. With respect to possible economies of scale, the Board noted the existence of management fee breakpoints for certain of the Funds, which operate generally to share any economies of scale with a Fund's shareholders by reducing the Fund's effective management fees as the Fund grows in size. The Board considered that each Fund (except the Franklin Dynamic Municipal Bond ETF and Franklin Municipal Green Bond ETF) would likely experience benefits from the Unified Fee at the Fund's projected asset levels because of the applicable Manager's contractual requirement to bear most of the Fund's ordinary operating expenses. The Board noted that, under the Unified Fee, it is not anticipated that any of the Funds will generate significant, if any, profit for the applicable Manager and/or its affiliates for some time. The Board considered management's view that any analyses of potential economies of scale in managing a particular fund are inherently limited in light of the joint and common costs and investments the Managers incur across the FT family of funds as a whole. The Board also noted that, as of December 31, 2021, each Fund (except for the Franklin Investment Grade Corporate ETF and the Franklin U.S. Core Bond ETF) had net assets below \$500 million (and in most cases much less). The Board also noted management's representation that, while the Franklin Investment Grade Corporate ETF and the Franklin U.S. Core Bond ETF had net assets of \$1.03 billion and \$1.69 billion, respectively, as of December 31, 2021, the only Fund that experienced a profit for the fiscal year ended September 30, 2021 was the Franklin Investment Grade Corporate ETF. The Board recognized that there would not likely be any economies of scale for a Fund until the Fund's assets grow.

#### Conclusion

Based on its review, consideration and evaluation of all factors it believed relevant, including the above-described factors and conclusions, the Board unanimously approved the continuation of each Management Agreement for an additional one-year period.

## Board Approval of Investment Management Agreements FRANKLIN TEMPLETON ETF TRUST

Franklin Liberty High Yield Corporate ETF
Franklin Liberty International Aggregate Bond ETF

### Franklin Liberty Senior Loan ETF Franklin Liberty Systematic Style Premia ETF (each a Fund)

At a meeting held on May 26, 2021 (Meeting), the Board of Trustees (Board) of Franklin Templeton ETF Trust (Trust), including a majority of the trustees who are not "interested persons" as defined in the Investment Company Act of 1940 (Independent Trustees), reviewed and approved the continuance of the investment management agreements between Franklin Advisers, Inc. (FAI) and the Trust, on behalf of the Franklin Liberty High Yield Corporate ETF, the Franklin Liberty Senior Loan ETF and the Franklin Liberty Systematic Style Premia ETF, an investment management agreement between Franklin Templeton Investment Management Limited (FTIML) and the Trust, on behalf of the Franklin Liberty International Aggregate Bond ETF and an investment sub-advisory agreement between FTIML and FAI, on behalf of the Franklin Liberty International Aggregate Bond ETF (each a Management Agreement) for an additional one-year period. The Independent Trustees received advice from and met separately with Independent Trustee counsel in considering whether to approve the continuation of each Management Agreement. Although the Management Agreements for the Funds were considered at the same Board meeting, the Board considered the information provided to it about the Funds together and with respect to each Fund separately as the Board deemed appropriate. FAI and FTIML are each referred to herein as a Manager.

In considering the continuation of each Management Agreement, the Board reviewed and considered information provided by each Manager at the Meeting and throughout the year at meetings of the Board and its committees, including a number of special meetings during the pandemic to enhance Board oversight of Fund-related matters during this period. The Board also reviewed and considered information provided in response to a detailed set of requests for information submitted to each Manager by Independent Trustee counsel on behalf of the Independent Trustees in connection with the annual contract renewal process. In addition, prior to the Meeting, the Independent Trustees held a telephonic contract renewal meeting at which the Independent Trustees conferred amongst themselves and Independent Trustee counsel about contract renewal matters and, in some cases, requested additional information from each Manager relating to the contract. The Board reviewed and considered all of the factors it deemed relevant in approving the continuance of each Management Agreement, including, but not limited to: (i) the nature, extent and quality of the services provided by each Manager; (ii)

the investment performance of each Fund; (iii) the costs of the services provided and profits realized by the Manager and its affiliates from the relationship with each Fund; (iv) the extent to which economies of scale are realized as each Fund grows; and (v) whether fee levels reflect these economies of scale for the benefit of Fund investors.

In approving the continuance of each Management Agreement, the Board, including a majority of the Independent Trustees, determined that the terms of each Management Agreement are fair and reasonable and that the continuance of such Management Agreement is in the best interests of the applicable Fund and its shareholders. While attention was given to all information furnished, the following discusses some primary factors relevant to the Board's determination.

#### Nature, Extent and Quality of Services

The Board reviewed and considered information regarding the nature, extent and quality of investment management services provided by each Manager and its affiliates to the Funds and their shareholders. This information included, among other things, the qualifications, background and experience of the senior management and investment personnel of each Manager; as well as information on succession planning where appropriate; the structure of investment personnel compensation; oversight of third-party service providers; investment performance reports and related financial information for each Fund; reports on expenses; legal and compliance matters; risk controls; pricing and other services provided by each Manager and its affiliates; and management fees charged by each Manager and its affiliates to US funds and other accounts, including management's explanation of differences among accounts where relevant. The Board noted management's continuing efforts and expenditures in establishing effective business continuity plans, including the effectiveness of those plans during the pandemic, and developing strategies to address areas of heightened concern in the registered fund industry, such as cybersecurity in the current work-from-home environment and liquidity risk management. The Board also considered the investment management services that the Manager provides to the Cayman Islands-based company, which is wholly owned by the Franklin Liberty Systematic Style Premia ETF (Cayman Subsidiary).

The Board also reviewed and considered the benefits provided to Fund shareholders of investing in a fund that is part of the Franklin Templeton (FT) family of funds. The Board noted the financial position of Franklin Resources, Inc. (FRI), the Managers' parent, and its commitment to the

registered fund business as evidenced by its continued introduction of new funds, reassessment of the fund offerings in response to the market environment and project initiatives and capital investments relating to the services provided to the Funds by the FT organization. The Board specifically noted FT's commitment to enhancing services and controlling costs, as reflected in its outsourcing of certain administrative functions, and growth opportunities, as evidenced by its recent acquisition of the Legg Mason companies. The Board also noted FT's attention focused on expanding the distribution opportunities for all funds in the FT family of funds.

Following consideration of such information, the Board was satisfied with the nature, extent and quality of services provided by each Manager and its affiliates to the Funds and their shareholders.

#### **Fund Performance**

The Board reviewed and considered the performance results of each Fund for the one-year period ended February 28, 2021. The Board considered the performance returns for each Fund in comparison to the performance returns of registered funds deemed comparable to the Fund included in a universe (Performance Universe) selected by Broadridge Financial Solutions, Inc. (Broadridge), an independent provider of investment company data. The Board received a description of the methodology used by Broadridge to select the registered funds included in a Performance Universe. The Board also reviewed and considered Fund performance reports provided and discussions that occurred with portfolio managers at Board meetings throughout the year. The Board noted its ongoing discussions with each Manager about the performance of the Funds to date, particularly as compared to peers, the importance of performance to asset growth and growth of market share, and the performance of the Funds in periods of volatility. In addition, the Board acknowledged information provided regarding each Manager's strategy behind the overall product line-up, the sources of asset growth, the nature of each Manager's research, potential use of innovative data and technology, and investments in marketing and distribution. Finally, the Board noted each Manager's high level of client engagement and the strength of its compliance program. A summary of each Fund's performance results is below.

The Performance Universe for the Franklin Liberty High Yield Corporate ETF included the Fund and all retail and institutional high yield funds and exchange-traded funds. The Performance Universe for the Franklin Liberty Senior Loan ETF included the Fund and all retail and institutional

loan participation funds and exchange-traded funds. The Funds commenced operations on May 30, 2018, and thus have been in operation for less than three years. The Board noted that the Funds' annualized total returns for the one-year period were above the medians of their respective Performance Universes. The Board concluded that the Funds' performance was satisfactory.

The Performance Universe for the Franklin Liberty International Aggregate Bond ETF included the Fund and all retail and institutional international income funds and exchange-traded funds. The Performance Universe for the Franklin Liberty Systematic Style Premia ETF included the Fund and all retail and institutional absolute-return funds and exchange-traded funds. The Franklin Liberty International Aggregate Bond ETF commenced operations on May 30, 2018 and the Franklin Liberty Systematic Style Premia ETF commenced operations on December 18, 2019, and thus have been in operation for less than three years. The Board noted that the Funds' annualized total returns for the one-year period were below the medians of their respective Performance Universes. The Board concluded that the Funds' performance was acceptable given their short periods of operation.

#### **Comparative Fees and Expenses**

The Board reviewed and considered information regarding each Fund's actual total expense ratio and its various components, including, as applicable, management fees; transfer agent expenses; underlying fund expenses; Rule 12b-1 and non-Rule 12b-1 service fees; and other non-management fees. The Board considered the actual total expense ratio and, separately, the contractual management fee rate, without the effect of fee waivers, if any (Management Rate) of each Fund in comparison to the median expense ratio and median Management Rate, respectively, of other exchange-traded funds deemed comparable to and with a similar expense structure to the Fund selected by Broadridge (Expense Group). Broadridge fee and expense data is based upon information taken from each fund's most recent annual report, which reflects historical asset levels that may be guite different from those currently existing, particularly in a period of market volatility. While recognizing such inherent limitation and the fact that expense ratios and Management Rates generally increase as assets decline and decrease as assets grow, the Board believed the independent analysis conducted by Broadridge to be an appropriate measure of comparative fees and expenses. The Broadridge Management Rate includes administrative charges. The Board received a description of

the methodology used by Broadridge to select the exchange-traded funds included in an Expense Group.

Franklin Liberty High Yield Corporate ETF - The Expense Group for the Fund was comprised of actively managed exchange-traded funds, which included the Fund and five other high yield funds. The Board noted that the Management Rate for the Fund was approximately five basis points above the median of its Expense Group, but its actual total expense ratio was below the median of its Expense Group. The Board also noted that the Fund's actual total expense ratio reflected a fee waiver from management. The Board concluded that the Management Rate charged to the Fund is reasonable.

Franklin Liberty International Aggregate Bond ETF and Franklin Liberty Senior Loan ETF - The Expense Group for the Franklin Liberty International Aggregate Bond ETF was comprised of actively managed exchange-traded funds. which included the Fund, one other international income fund, and three emerging markets hard currency debt funds. The Expense Group for the Franklin Liberty Senior Loan ETF was comprised of actively managed exchange-traded funds. which included the Fund and four other loan participation funds. The Board noted that the Management Rate and actual total expense ratio for each Fund were below the medians of its respective Expense Group. The Board also noted the small size of each Expense Group and that each Fund's actual total expense ratio reflected a fee waiver from management. The Board further noted that FAI is paid by FTIML out of the management fee FTIML receives from the Franklin Liberty International Aggregate Bond ETF. The Board concluded that the Management Rates charged to the Funds are reasonable.

Franklin Liberty Systematic Style Premia ETF - The Expense Group for the Fund was comprised of actively managed exchange-traded funds, which included the Fund, one other absolute-return fund, one alternative long/short equity fund, and one alternative multi-strategy fund. The Board noted that the Management Rate for the Fund was equal to the median of its Expense Group, and its actual total expense ratio was below the median of its Expense Group. The Board also noted the small size of the Fund's Expense Group and that the Fund's actual total expense ratio reflected a fee waiver from management. The Board concluded that the Management Rate charged to the Fund is reasonable.

#### **Profitability**

The Board reviewed and considered information regarding the profits realized by each Manager and its affiliates in connection with the operation of each Fund. In this respect, the Board considered the Fund profitability analysis that addresses the overall profitability of FT's US fund business. as well as its profits in providing investment management and other services to each of the individual funds during the 12-month period ended September 30, 2020, being the most recent fiscal year-end for FRI. The Board noted that although management continually makes refinements to its methodologies used in calculating profitability in response to organizational and product-related changes, the overall methodology has remained consistent with that used in the Funds' profitability report presentations from prior years. The Board further noted management's representation that the profitability analysis excluded the impact of the recent acquisition of the Legg Mason companies and that management expects to incorporate the legacy Legg Mason companies into the profitability analysis beginning next year. The Board also noted that PricewaterhouseCoopers LLP, auditor to FRI and certain FT funds, has been engaged to periodically review and assess the allocation methodologies to be used solely by the Funds' Board with respect to the profitability analysis.

The Board noted management's belief that costs incurred in establishing the infrastructure necessary for the type of fund operations conducted by each Manager and its affiliates may not be fully reflected in the expenses allocated to each Fund in determining its profitability, as well as the fact that the level of profits, to a certain extent, reflected operational cost savings and efficiencies initiated by management. As part of this evaluation, the Board considered management's outsourcing of certain operations, which effort has required considerable up-front expenditures by each Manager but, over the long run is expected to result in greater efficiencies. The Board also noted management's expenditures in improving shareholder services provided to the Funds, as well as the need to implement systems and meet additional regulatory and compliance requirements resulting from recent US Securities and Exchange Commission and other regulatory requirements.

The Board also considered the extent to which each Manager and its affiliates might derive ancillary benefits from fund operations, including revenues generated from transfer agent services, potential benefits resulting from personnel and systems enhancements necessitated by fund growth, as well as increased leverage with service providers and counterparties. Based upon its consideration of all these factors, the Board concluded that the level of profits realized by each Manager and its affiliates from providing services to each Fund was not excessive in view of the nature, extent and quality of services provided to each Fund.

#### **Economies of Scale**

The Board reviewed and considered the extent to which each Manager may realize economies of scale, if any, as each Fund grows larger and whether each Fund's management fee structure reflects any economies of scale for the benefit of shareholders. With respect to possible economies of scale, the Board noted the existence of management fee breakpoints for each Fund (except the Franklin Liberty Systematic Style Premia ETF), which operate generally to share any economies of scale with the Fund's shareholders by reducing the Fund's effective management fees as the Fund grows in size. The Board considered management's view that any analyses of potential economies of scale in managing a particular fund are inherently limited in light of the joint and common costs and investments the Managers incur across the FT family of funds as a whole. The Board concluded that to the extent economies of scale may be realized by a Manager and its affiliates, the management fee structure for each Fund (except the Franklin Liberty Systematic Style Premia ETF) provided a sharing of benefits with the Fund and its shareholders as the Fund grows. The Board noted that as of December 31, 2020, the net assets of each Fund were less than approximately \$228 million. The Board recognized that there would not likely be any economies of scale for a Fund until the Fund's assets grow.

#### Conclusion

Based on its review, consideration and evaluation of all factors it believed relevant, including the above-described factors and conclusions, the Board unanimously approved the continuation of each Management Agreement for an additional one-year period.

# Board Approval of Investment Management Agreements FRANKLIN TEMPLETON ETF TRUST

### Franklin Income Focus ETF (Fund)

At a meeting held on March 3, 2023 (Meeting), the Board of Trustees (Board) of Franklin Templeton ETF Trust (Trust), including a majority of the trustees who are not "interested persons" as defined in the Investment Company Act of 1940 (Independent Trustees), reviewed and approved an investment management agreement between Franklin Advisers, Inc. (Manager) and the Trust, on behalf of the Fund, for an initial two-year period (the Management Agreement). The Independent Trustees received advice from and met separately with Independent Trustee counsel in

considering whether to approve the Management Agreement.

In considering the approval of the Management Agreement, the Board reviewed and considered information provided by the Manager at the Meeting and throughout the year at meetings of the Board and its committees. The Board reviewed and considered all of the factors it deemed relevant in approving the Management Agreement, including, but not limited to: (i) the nature, extent and quality of the services to be provided by the Manager; (ii) the costs of the services to be provided by the Manager; and (iii) the extent to which economies of scale may be realized as the Fund grows. The Board also reviewed and considered the form of the Management Agreement and the terms of the Management Agreement which were explained at the Meeting. The Board noted that the Manager would provide general investment management and administrative services and that the Fund would operate under a unified management fee structure whereby the Manager would reimburse the Fund for all acquired fund fees and expenses and pay all of the ordinary operating expenses of the Fund, except for certain excluded items (Unified Fee). The Board also noted that the Unified Fee was consistent with the current management fee structure for the existing Franklin Templeton (FT) exchange-traded funds.

In approving the Management Agreement, the Board, including a majority of the Independent Trustees, determined that the terms of the proposed Management Agreement are fair and reasonable and that such Management Agreement is in the best interests of the Fund and its shareholders. While attention was given to all information furnished, the following discusses some primary factors relevant to the Board's determination.

#### Nature, Extent and Quality of Services

The Board reviewed and considered information regarding the nature, extent and quality of investment management services to be provided by the Manager and its affiliates to the Fund and its shareholders. This information included, among other things, the Fund's proposed investment strategies and the ability of the Manager to implement such investment strategies; the qualifications, background and experience of the investment personnel that will be responsible for the day-to-day portfolio management of the Fund; the Manager's experience as the Manager of other funds and accounts, including other series of the Trust and other funds in the FT family of funds; the Manager's strength and reputation within the industry; the personnel, operations, financial condition, and investment management capabilities,

methodologies and resources of the Manager; and the Manager's compliance capabilities, as demonstrated by, among other things, its policies and procedures reasonably designed to prevent violations of the Federal Securities Laws (as defined in Rule 38a-1 of the Investment Company Act of 1940). Following consideration of such information, the Board was satisfied with the nature, extent and quality of services to be provided by the Manager and its affiliates to the Fund and its shareholders.

#### **Fund Performance**

The Board noted that, as the Fund had not yet commenced investment operations, there was no investment performance for the Fund. The Board also considered the proposed performance benchmark for the Fund and how such benchmark would be utilized to measure performance of the Manager.

#### **Comparative Fees and Expenses**

The Board reviewed and considered information regarding the Fund's estimated total expense ratio, noting that the Fund will pay a Unified Fee. The Board considered the estimated total expense ratio and, separately, the proposed contractual Unified Fee, without the effect of fee waivers, if any (Management Rate) of the Fund in comparison to the median expense ratio and median Management Rate, respectively, of other exchange-traded funds deemed comparable to and with a similar expense structure as the Fund (Expense Group) as selected by Broadridge Financial Solutions, Inc. (Broadridge), an independent provider of investment company data. Broadridge fee and expense data is based upon information taken from each fund's most recent annual report (excluding the Fund), which reflects historical asset levels that may be quite different from those currently existing, particularly in a period of market volatility. While recognizing such inherent limitation and the fact that expense ratios and Management Rates generally increase as assets decline and decrease as assets grow, the Board believed the independent analysis conducted by Broadridge to be an appropriate measure of comparative fees and expenses. The Broadridge Management Rate includes administrative charges. The Board received a description of the methodology used by Broadridge to select the exchange-traded funds included in the Expense Group.

The Expense Group for the Fund was comprised of actively managed exchange-traded funds, which included the Fund and nine other flexible portfolio funds. The Board noted that the proposed Management Rate and estimated total expense ratio for the Fund were below the median of its Expense Group. The Board noted that pursuant to the

proposed Unified Fee arrangement the Manager would reimburse the Fund for all of its acquired fund fees and expenses (if any) and pay all of the ordinary operating expenses of the Fund, except for (i) the Fund's Unified Fee, (ii) payments under the Fund's Rule 12b-1 plan (if any), (iii) brokerage expenses (including any costs incidental to transactions in portfolio securities or instruments), (iv) taxes, (v) interest (including borrowing costs and dividend expenses on securities sold short and overdraft charges), (vi) litigation expenses (including litigation to which the Trust or the Fund may be a party and indemnification of the Trustees and officers with respect thereto), and (vii) other non-routine or extraordinary expenses. After consideration of the above, the Board concluded that the Management Rate to be charged to the Fund is reasonable.

#### **Profitability**

The Board noted that the Manager (and its affiliates) could not report any financial results from their relationships with the Fund because the Fund has not yet commenced investment operations, and thus, the Board could not evaluate the Manager's (or its affiliates') profitability with respect to the Fund.

#### **Economies of Scale**

The Board reviewed and considered the extent to which the Manager may realize economies of scale, if any, as the Fund grows larger and whether the Fund's management fee structure reflects any economies of scale for the benefit of shareholders. With respect to possible economies of scale in the future, the Board noted that it is not anticipated that the Fund will generate significant, if any, profit for the Manager and/or its affiliates for some time.

#### Conclusion

Based on its review, consideration and evaluation of all factors it believed relevant, including the above-described factors and conclusions, the Board unanimously approved the Management Agreement for the Fund for an initial two-year period.

# Liquidity Risk Management Program Franklin Templeton ETF Trust In Kind ETF

#### Franklin U.S. Low Volatility ETF

Each of the Funds has adopted and implemented a written Liquidity Risk Management Program (the "LRMP") as required by Rule 22e-4 under the Investment Company Act of 1940 (the "Liquidity Rule"). The LRMP is designed to assess and manage each Fund's liquidity risk, which is

defined as the risk that the Fund could not meet requests to redeem shares issued by the Fund without significant dilution of remaining investors' interests in the Fund. Each of the Funds is an exchange-traded fund ("ETF") that is considered an "In-Kind ETF" under the Liquidity Rule, which means that the Fund satisfies requests for redemption through in-kind transfers of portfolio securities, positions, and other assets, except for a de minimis amount of cash, and publishes its portfolio holdings daily. In accordance with the Liquidity Rule, the LRMP includes policies and procedures that provide for: (1) assessment, management, and review (no less frequently than annually) of each Fund's liquidity risk; (2) prohibiting the Fund's acquisition of Illiquid investments that would result in the Fund holding more than 15% of its net assets in Illiquid assets. The LRMP also requires reporting to the SEC (on a non-public basis) and to the Board if the Fund's holdings of Illiquid assets exceed 15% of the Fund's net assets. As an In-Kind ETF, the Fund is not required to include in the LRMP policies and procedures relating to classification of portfolio holdings into four liquidity categories or establishing a highly liquid investment minimum ("HLIM").

The Funds' Board of Trustees approved the appointment of the Director of Liquidity Risk within the Investment Risk Management Group (the "IRMG") as the Administrator of the LRMP. The IRMG maintains the Investment Liquidity Committee (the "ILC") to provide oversight and administration of policies and procedures governing liquidity risk management for FT products and portfolios. The ILC includes representatives from Franklin Templeton's Risk, Trading, Global Compliance, Legal, Investment Compliance, Investment Operations, Valuation Committee, Product Management and Global Product Strategy.

In assessing and managing each Fund's liquidity risk, the ILC considers, as relevant, a variety of factors, including the Fund's investment strategy and the liquidity of its portfolio investments during both normal and reasonably foreseeable stressed conditions; its short and long-term cash flow projections; and its cash holdings and access to other funding sources including the Funds' interfund lending facility and line of credit. Because the Funds are ETFs, the ILC also considers, as relevant, (1) the relationship between the Fund's portfolio liquidity and the way in which, and the prices and spread at which, Fund shares trade, including the efficiency of the arbitrage function and the level of active participation by market participants, including authorized participants and (2) the effect of the composition of baskets on the overall liquidity of the Fund's portfolio.

At meetings of the Funds' Board of Trustees held in May 2023, the Program Administrator provided a written report to the Board addressing the adequacy and effectiveness of the program for the year ended December 31, 2022. The Program Administrator report concluded that (i.) the LRMP, as adopted and implemented, remains reasonably designed to assess and manage each Fund's liquidity risk; (ii.) the LRMP, including the Highly Liquid Investment Minimum ("HLIM") where applicable, was implemented and operated effectively and achieved the goal of assessing and managing each Fund's liquidity risk; and (iii.) each Fund was able to meet requests for redemption without significant dilution of remaining investors' interests in the Fund.

Each of the Franklin Templeton and Legg Mason Funds has adopted and implemented a written Liquidity Risk Management Program (the "LRMP") as required by Rule 22e-4 under the Investment Company Act of 1940 (the "Liquidity Rule"). The LRMP is designed to assess and manage each Fund's liquidity risk, which is defined as the risk that the Fund could not meet requests to redeem shares issued by the Fund without significant dilution of remaining investors' interests in the Fund. In accordance with the Liquidity Rule, the LRMP includes policies and procedures that provide for: (1) assessment, management, and review (no less frequently than annually) of each Fund's liquidity risk; (2) classification of each Fund's portfolio holdings into one of four liquidity categories (Highly Liquid, Moderately Liquid, Less Liquid, and Illiquid); (3) for Funds that do not primarily hold assets that are Highly Liquid, establishing and maintaining a minimum percentage of the Fund's net assets in Highly Liquid investments (called a "Highly Liquid

Investment Minimum" or "HLIM"); and (4) prohibiting the Fund's acquisition of Illiquid investments that would result in the Fund holding more than 15% of its net assets in Illiquid assets. The LRMP also requires reporting to the Securities and Exchange Commission ("SEC") (on a non-public basis) and to the Board if the Fund's holdings of Illiquid assets exceed 15% of the Fund's net assets. Funds with HLIMs must have procedures for addressing HLIM shortfalls, including reporting to the Board and, with respect to HLIM shortfalls lasting more than seven consecutive calendar days, reporting to the SEC (on a non-public basis).

The Director of Liquidity Risk within the Investment Risk Management Group (the "IRMG") is the appointed Administrator of the LRMP. The IRMG maintains the Investment Liquidity Committee (the "ILC") to provide oversight and administration of policies and procedures governing liquidity risk management for Franklin Templeton and Legg Mason products and portfolios. The ILC includes representatives from Franklin Templeton's Risk, Trading, Global Compliance, Legal, Investment Compliance, Investment Operations, Valuation Committee, Product Management and Global Product Strategy.

In assessing and managing each Fund's liquidity risk, the ILC considers, as relevant, a variety of factors, including the Fund's investment strategy and the liquidity of its portfolio investments during both normal and reasonably foreseeable stressed conditions; its short and long-term cash flow projections; and its cash holdings and access to other funding sources including the Funds' interfund lending facility and line of credit. Classification of the Fund's portfolio holdings in the four liquidity categories is based on the number of days it is reasonably expected to take to convert the investment to cash (for Highly Liquid and Moderately Liquid holdings) or sell or dispose of the investment (for Less Liquid and Illiquid investments), in current market conditions without significantly changing the investment's market value.

Each Fund primarily holds liquid assets that are defined under the Liquidity Rule as "Highly Liquid Investments," and therefore is not required to establish an HLIM. Highly Liquid Investments are defined as cash and any investment reasonably expected to be convertible to cash in current market conditions in three business days or less without the conversion to cash significantly changing the market value of the investment.

At meetings of the Funds' Board of Trustees held in May 2023, the Program Administrator provided a written report to the Board addressing the adequacy and effectiveness of the program for the year ended December 31, 2022. The

Program Administrator report concluded that (i.) the LRMP, as adopted and implemented, remains reasonably designed to assess and manage each Fund's liquidity risk; (ii.) the LRMP, including the Highly Liquid Investment Minimum ("HLIM") where applicable, was implemented and operated effectively to achieve the goal of assessing and managing each Fund's liquidity risk; and (iii.) each Fund was able to meet requests for redemption without significant dilution of remaining investors' interests in the Fund.

#### Liquidity Risk Management Program Franklin Templeton ETF Trust

#### Franklin Senior Loan ETF

Each of the Funds has adopted and implemented a written Liquidity Risk Management Program (the "LRMP") as required by Rule 22e-4 under the Investment Company Act of 1940 (the "Liquidity Rule"). The LRMP is designed to assess and manage each Fund's liquidity risk, which is defined as the risk that the Fund could not meet requests to redeem shares issued by the Fund without significant dilution of remaining investors' interests in the Fund. In accordance with the Liquidity Rule, the LRMP includes policies and procedures that provide for: (1) assessment, management, and review (no less frequently than annually) of each Fund's liquidity risk; (2) classification of each Fund's portfolio holdings into one of four liquidity categories (Highly Liquid, Moderately Liquid, Less Liquid, and Illiquid); (3) for Funds that do not primarily hold assets that are Highly Liquid, establishing and maintaining a minimum percentage of the Fund's net assets in Highly Liquid investments (called a "Highly Liquid Investment Minimum" or "HLIM"); and (4) prohibiting the Fund's acquisition of Illiquid investments that would result in the Fund holding more than 15% of its net assets in Illiquid assets. The LRMP also requires reporting to the Securities and Exchange Commission ("SEC") (on a non-public basis) and to the Board if the Fund's holdings of Illiquid assets exceed 15% of the Fund's net assets. Funds with HLIMs must have procedures for addressing HLIM shortfalls, including reporting to the Board and, with respect to HLIM shortfalls lasting more than seven consecutive calendar days, reporting to the SEC (on a non-public basis).

The Funds' Board of Trustees approved the appointment of the Director of Liquidity Risk within the Investment Risk Management Group (the "IRMG") as the Administrator of the LRMP. The IRMG maintains the Investment Liquidity Committee (the "ILC") to provide oversight and administration of policies and procedures governing liquidity risk management for FT products and portfolios. The ILC

includes representatives from Franklin Templeton's Risk, Trading, Global Compliance, Investment Compliance, Investment Operations, Valuation Committee, Product Management and Global Product Strategy.

In assessing and managing each Fund's liquidity risk, the ILC considers, as relevant, a variety of factors, including (i) the Fund's investment strategy and the liquidity of its portfolio investments during both normal and reasonably foreseeable stressed conditions; (ii) its short and long-term cash flow projections; (iii) its cash holdings and access to other funding sources including the Funds' interfund lending facility and line of credit; (iv) the relationship between the Fund's portfolio liquidity and the way in which, and the prices and spread at which, Fund shares trade, including the efficiency of the arbitrage function and the level of active participation by market participants, including authorized participants and (v) the effect of the composition of baskets on the overall liquidity of the Fund's portfolio. Classification of the Fund's portfolio holdings in the four liquidity categories is based on the number of days it is reasonably expected to take to convert the investment to cash (for Highly Liquid and Moderately Liquid holdings) or sell or dispose of the investment (for Less Liquid and Illiquid investments), in current market conditions without significantly changing the investment's market value.

The Fund primarily holds investments where the time required to settle a sale of the investment may exceed 7 calendar days and are classified as "Less Liquid Investments". Less liquid Investments are defined as any investment reasonably expected to be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment, but where the sale or disposition is reasonably expected to settle in more than seven calendar days. The Fund established and maintained a HLIM. During the reporting period, the Fund maintained the necessary level of Highly Liquid Investments and did not experience any HLIM shortfalls.

At meetings of the Funds' Board of Trustees held in May 2023, the Program Administrator provided a written report to the Board addressing the adequacy and effectiveness of the program for the year ended December 31, 2022. The Program Administrator report concluded that (i.) the LRMP, as adopted and implemented, remains reasonably designed to assess and manage each Fund's liquidity risk; (ii.) the LRMP, including the Highly Liquid Investment Minimum ("HLIM") where applicable, was implemented and operated effectively to achieve the goal of assessing and managing

each Fund's liquidity risk; and (iii.) each Fund was able to meet requests for redemption without significant dilution of remaining investors' interests in the Fund.

#### **Proxy Voting Policies and Procedures**

The Trust's investment manager has established Proxy Voting Policies and Procedures (Policies) that the Trust uses to determine how to vote proxies relating to portfolio securities. Shareholders may view the Trust's complete Policies online at franklintempleton.com. Alternatively, shareholders may request copies of the Policies free of charge by calling the Proxy Group collect at (954) 527-7678 or by sending a written request to: Franklin Templeton Companies, LLC, 300 S.E. 2nd Street, Fort Lauderdale, FL 33301, Attention: Proxy Group. Copies of the Trust's proxy voting records are also made available online at franklintempleton.com and posted on the U.S. Securities and Exchange Commission's website at sec.gov and reflect the most recent 12-month period ended June 30.

#### Quarterly Schedule of Investments

The Trust files a complete schedule of investments with the U.S. Securities and Exchange Commission for the first and third quarters for each fiscal year as an exhibit to its report on Form N-PORT. Shareholders may view the filed Form N-PORT by visiting the Commission's website at sec.gov. The filed form may also be viewed and copied at the Commission's Public Reference Room in Washington, DC. Information regarding the operations of the Public Reference Room may be obtained by calling (800) SEC-0330.

#### Premium/Discount Information

Information about the differences between the daily market price on the secondary market for the shares of each Fund and each Fund's net asset value may be found on each Fund's website at franklintempleton.com
