

Separately Managed Account

Western Asset GSM 3-Year Portfolios

1Q 2025

Separately Managed Accounts (SMAs) are investment services provided by Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), a federally registered investment advisor. Client portfolios are managed based on investment instructions or advice provided by one or more of the following Franklin Templeton affiliated subadvisors: Western Asset Management Company, LLC. Management is implemented by FTPPG, the designated subadvisor or, in the case of certain programs, the program sponsor or its designee. These materials are being provided for illustrative and informational purposes only. The information contained herein is obtained from multiple sources that are believed to be reliable. However, such information has not been verified, and may be different from the information included in documents and materials created by the sponsor firm in whose investment program a client participates. Some sponsor firms may require that these materials be preceded or accompanied by investment profiles or other documents, or materials prepared by such sponsor firms, which will be provided upon a client's request. For additional information, documents and/or materials, please speak to your financial professional or contact your sponsor firm.

Western Asset Management Approach and Philosophy

Western Asset is a global investment management firm committed to understanding the needs of each client, identifying investment solutions, and delivering superior long-term investment results

Team-managed approach

- Team unites groups of specialists dedicated to different market sectors
- Each group of sector specialists utilizes its expertise in bottom-up analysis of each portfolio sector

Investment Philosophy

Long-term, fundamental value discipline

- Bottom-up
- Top-down

Diversified strategies

- Depth of resources
- Global

Integrated analytics and risk management

- Relative value analysis
- Transparency and communication

Objective-Driven Investing

Seeks to:

- Protect from rising rates
- Protect from inflation
- Preserve capital
- Diversify globally
- Hedge liabilities
- Enhance income
- Generate tax-free income
- Generate total return
- Achieve ESG objectives

Core Fixed Income

- Intermediate
- Core
- Core Full Discretion
- Investment-Grade Credit
- Agency Mortgage-Backed

Generate Total Return

- Total Return Unconstrained
- Global Total Return
- Global Multi-Sector
- Dynamic Fixed Income
- Credit Opportunities
- MBS Opportunities
- Emerging Market

Enhance Income

- Short-Duration High Income
- Emerging Markets Debt
- High Yield
- Diversified High Income
- Structured Products/REIT/ CLO

Increase Alpha

- Global Credit Absolute Return
- Macro Opportunities

Hedge Liabilities

- Long Duration
- Long Credit
- Liability-Driven Investing
- Tail Risk Management

Our team offers a range of actively managed strategies that span the risk/return spectrum

Lower risk, lower return potential

Higher risk, higher return potential

Fixed income investments are subject to interest rate risk. As rates rise, the price of fixed income securities falls. GSM portfolios are comprised of US Treasury and US Agency securities (except Gov/Corp, which also includes investments in corporate bonds). The three GSM programs available, GSM 3-Year, GSM 5-Year and GSM 7-Year, have maximum average maturities of three, five and seven years, respectively.

Potential benefits of active management

Western Asset is a global investment management firm committed to understanding the needs of each client, identifying investment solutions, and delivering superior long-term investment results

While active fixed income management does not guarantee superior performance — and may entail additional risks beyond those in passive portfolios — it does offer a number of potential benefits.

- May provide opportunity for growth through focus on total return versus focus on yield alone
- Flexibility to pursue market opportunities
- Ongoing monitoring and portfolio restructuring based on changing conditions
- Risk management — including duration management, yield curve positioning and other strategies

All fixed income investments are subject to interest rate risk. As interest rates rise, the price of fixed income securities fall. This chart is for illustrative purposes only and does not represent the performance of any specific investment.

Western Asset GSM 3-Year Portfolios

Overview

The GSM 3-Year Portfolios actively manage portfolios of U.S. Treasury bills, notes, bonds and U.S. government agency securities to seek to maximize total return. GSM 3-Year has a maximum individual security limit of five years and a maximum average portfolio maturity of three years.

Key differentiators

- Team-Managed Approach.
- Leverage Western Asset Management Resources.
 - Institutional-caliber buying power and trading expertise.
 - Access to proprietary credit research team.
 - Exclusive focus on fixed-income management.

Philosophy

We seek:

- Long-term.
- Active duration management.
- Sector rotation between treasuries and agencies Strive to add incremental value over time and potentially reduce volatility.
- The GSM 3-Year Portfolios predominantly focus on U.S. government debt (including treasuries and agencies).

Objectives

The Strategy seeks to:

Produce total returns over complete market cycles that exceed appropriate benchmark returns. As part of this total return investment approach, the portfolios seek to preserve principal.

What are the risks?

All investments involve risks, including possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. **Asset-backed, mortgage-backed or mortgage-related securities** are subject to prepayment and extension risks.

Western Asset GSM 3-Year Portfolios investment process

STEP 1

Interest Rate Exposure/ Duration Weighting

Western Asset's investment team comprehensively analyzes a variety of domestic and international macroeconomic factors to establish a duration target

STEP 2

Term Structure Weighting

The Firm carefully employs strategies in an attempt to take advantage of changes in the yield curve's shape and shifts in the relationship between short-, intermediate-, and long-maturity securities.

STEP 3

Sector Allocation

Western Asset seeks to add value to a portfolio by actively rotating between the Treasury and Agency sectors.

Fixed Income portfolio characteristics

As of 3/31/2025

Sector weightings	GSM 3-Year
Treasury	100.00

Characteristics (%)	GSM 3-Year

The strategy returns shown are preliminary composite returns, subject to future revision (downward or upward). Past performance is not a guarantee of future results. An investment in this strategy can lose value. Please visit www.franklintempleton.com for the latest performance figures. Investors cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges.

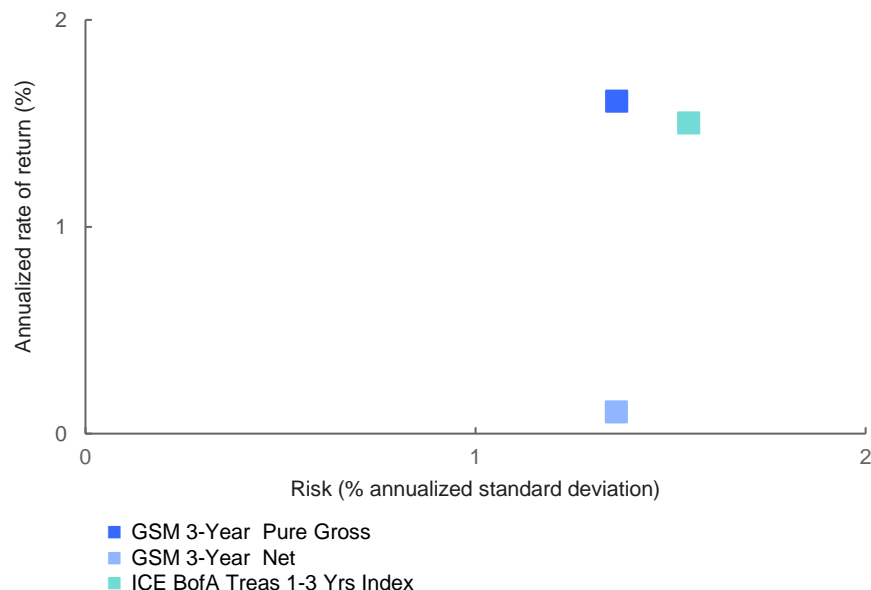

Periods less than one year are not annualized. Performance results are for the composite which includes all actual, fully discretionary accounts with substantially similar investment policies and objectives managed to the composite's investment strategy. Composite returns are stated in U.S. dollars and assume reinvestment of any dividends, interest income, capital gains, or other earnings. The composite may include account(s) that are gross of fees and pure gross of fees. "Pure" gross-of-fee returns do not reflect the deduction of any expenses, including transaction costs. A traditional (or "true") gross-of-fee return reflects performance after the reduction of transaction costs but before the reduction of the investment advisory fee. The gross-of-fee return may include a blend of "true" gross-of-fee returns for non-wrap accounts and "pure" gross-of-fee returns for wrap accounts. Net-of-fee returns are reduced by a model "wrap fee" (1.5% is the maximum anticipated wrap fee for fixed income portfolios) which includes trading expenses as well as investment management, administrative and custodial fees. The model wrap fee used represents the highest anticipated wrap fee applicable to the strategy. Actual fees and account minimums may vary.

For fee schedules, contact your financial professional, or if you enter into an agreement directly with Franklin Templeton Private Portfolio Group, LLC ("FTPPG"), refer to FTPPG's Form ADV Part 2A disclosure document. Management and performance of individual accounts may vary for reasons that include the existence of different implementation practices and model requirements in different investment programs. Past performance is not a guarantee of future results. Please see appendix for GIPS® Report and term definitions.

Compliance Statement:

Western Asset claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Western Asset has been independently verified for the periods from January 1, 1993 to December 31, 2023. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Firm Information:

Founded in 1971, Western Asset Management Company is a global fixed-income investment manager with offices in Pasadena, New York, London, Singapore, Tokyo, Melbourne, São Paulo, Hong Kong, and Zürich. Western Asset is a wholly owned subsidiary of Franklin Resources, Inc. but operates autonomously. Western Asset is comprised of six legal entities across the globe, each with distinct regional registrations: Western Asset Management Company, LLC, a registered Investment Adviser with the Securities and Exchange Commission; Western Asset Management Company Distribuidora de Títulos e Valores Mobiliários Limitada is authorized and regulated by Comissão de Valores Mobiliários and Brazilian Central Bank; Western Asset Management Company Pty Ltd ABN 41 117 767 923 is the holder of the Australian Financial Services License 303160; Western Asset Management Company Pte. Ltd. Co. Reg. No. 200007692R is a holder of a Capital Markets Services License for fund management and regulated by the Monetary Authority of Singapore; Western Asset Management Company Ltd, a registered Financial Instruments Business Operator and regulated by the Financial Services Agency of Japan; and Western Asset Management Company Limited is authorised and regulated by the Financial Conduct Authority ("FCA") (FRN 145930). This communication is intended for distribution to Professional Clients only if deemed to be a financial promotion in the UK as defined by the FCA. This communication may also be intended for certain EEA countries where Western Asset has been granted permission to do so. For the current list of the approved EEA countries please contact Western Asset at +44 (0)20 7422 3000.

Composite Information:

Western Asset GSM - 3 Year portfolios are discretionary fixed-income portfolios that offer - to individual and taxable institutional investors - tailored management of U.S. Treasury and federal agency securities with average maturities of three years or less. These portfolios seek to produce total returns over complete market cycles that exceed appropriate benchmark returns. The portfolios also seek to preserve principal. The GSM 3 Year strategy has a maximum maturity of five years. The composite is comprised of accounts that are separately managed accounts (SMAs) managed in accordance with the strategy with an account minimum of US \$10,000. The composite employs a 10% significant cash flow policy.

Input and Calculation Data:

The current fee schedule is 1.50% on all assets. Net returns are calculated by deducting the anticipated maximum annual wrap fee applied on a monthly basis from the "pure" gross monthly return. The wrap fee includes all charges for trading costs, portfolio management, custody, and other administrative fees. Wrap fees may vary across different financial firms and across different accounts based upon account size and other factors. Dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year (equal-weighted prior to 2014). Periods with five or fewer accounts are not statistically representative and are not presented. The three-year annualized ex-post standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. Past investment results are not indicative of future investment results. Information contained herein is believed to be accurate, but cannot be guaranteed. Employees and/or clients of Western Asset may have a position in the securities mentioned. A list of composite and limited distribution pooled fund descriptions and a list of broad distribution pooled funds is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Please contact Michael Van Raaphorst at 212-601-6211 or Michael.VanRaaphorst@westernasset.com. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Benchmark Information:

For comparison purposes, composite returns are shown against returns of the ICE BofA® 1-3 Year U.S. Treasury Bond Index.

Definitions

Term definitions

Maturity is the date at which a debt instrument is due and payable. A bond due to mature on January 1, 2025, will return the bondholder's principal and final interest payment when it reaches maturity on that date. Bond yields are frequently calculated on a yield-to-maturity basis.

Duration (Modified Duration) is the measure of the price sensitivity of a fixed income security to an interest rate change of 100 basis points. Calculation is based on the weighted average of the present values for all cash flows.

Yield to Worst (YTW) is based on a portfolio's current holdings on one specific day, is gross of all portfolio expenses, and is calculated based on assumptions that prepayment occurs if the bond has called or put provisions, and the issuer can offer a lower coupon rate based on current market rates. If market rates are higher than the current yield of a bond, the YTW calculation will assume no prepayments are made, and YTW will equal the yield to maturity. The YTW will be the lowest of yield to maturity or yield to call (if the bond has prepayment provisions). The YTW of a bond portfolio is the market-weighted average of the YTWs of all the bonds in the portfolio.

Insured municipal bonds are ones where scheduled interest and principal payments are guaranteed by AAA-rated municipal bond insurers.

General Obligation municipal bonds are backed by the credit and taxing power of the issuing jurisdiction rather than the revenue of a given project.

Revenue bonds are municipal bonds supported by the revenue from a specific project.

Pre-refunded bonds are municipal bonds that are generally backed or secured by U.S. Treasury bonds.

Effective Duration is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change.

Average Maturity is the average length of maturity for all fixed-rate debt instruments held in a portfolio.

Average Coupon based on the portfolio's underlying holdings, which may differ and are subject to change. Coupon rate is the annual coupon payments paid by the issuer relative to a bond's face or par value.

Yield to Maturity - The rate of return anticipated on a bond if it is held until the maturity date. The calculation of YTM takes into account the current market price, par value, coupon interest rate and time to maturity.

Weighted Average Life - An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings.

The **Sharpe Ratio** is a risk-adjusted measure that is calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the portfolio's historical adjusted performance.

Alpha is a measure of the difference between actual returns and expected performance, given the level of risk as measured by **Beta**, where Beta measures sensitivity to benchmark movements.

R-Squared measures the strength of the linear relationship between the portfolio and its benchmark. R-squared at 1.0 implies perfect linear relationship and zero implies no relationship exists.

Standard Deviation is a measure of the variability of returns; the higher the standard deviation, the greater the range of performance (i.e., volatility).

The **Capture Ratios** measure a manager's composite performance relative to the benchmark, considering only those months that are either positive (Up) or negative (Down) for the benchmark.

An **Up-Market Capture Ratio** greater than 1.0 indicates a manager who has outperformed the benchmark in the benchmark's positive months.

A **Down-Market Capture Ratio** of less than 1.0 indicates a manager who has outperformed the relative benchmark in the benchmark's negative months.

Investments for the program(s) discussed herein are traded primarily in U.S. markets and unless otherwise noted, equity and fixed income investments for such program(s) are primarily of U.S. issuers. In addition, unless otherwise noted, indexes referred to herein represent groups of securities that are issued primarily by U.S. issuers.

IMPORTANT TAX INFORMATION:

Franklin Templeton, its affiliates, and its employees are not in the business of providing tax or legal advice to taxpayers. These materials and any tax-related statements are not intended or written to be used, and cannot be used or relied upon, by any such taxpayer for the purpose of avoiding tax penalties or complying with any applicable tax laws or regulations. Tax-related statements, if any, may have been written in connection with the "promotion or marketing" of the transaction(s) or matter(s) addressed by these materials, to the extent allowed by applicable law. Any such taxpayer should seek advice based on the taxpayer's particular circumstances from an independent tax advisor.

Investments are not obligations of, and are not guaranteed by, FTPPG or any other Franklin Templeton affiliate or subsidiary; are not FDIC or government insured; and are subject to risks, including possible loss of the principal amount invested. Professional money management may not be suitable for all investors.

Any information, statement or opinion set forth herein is general in nature, is not directed to or based on the financial situation or needs of any particular investor, and does not constitute, and should not be construed as, investment advice, forecast of future events, a guarantee of future results, or a recommendation with respect to any particular security or investment strategy or type of retirement account. Investors seeking financial advice regarding the appropriateness of investing in any securities or investment strategies should consult their financial professional.
